# Kester Dynamos

Represent the highest degree of perfection in Electrical Machinery. During the Holiday time, when the load is heaviest, our friend the Waxahachie Electric Light Company, of Texas, takes time to write us how pleased he is with the Dynamo, and the same mail brings a like letter from The Piedmont Pulp & Paper Company of Piedmont, W. Va. Speaking of paper mills reminds us that all the mills of the Louis Snider's Sons Company of Hamilton, Ohio, use Kester Dynamos. And the City Railway Company of Galveston, Texas, as well as the Electric Light Company of Sault Ste. Marie, Mich., express themselves as well pleased with the Kester Machines. From Buffalo and New York City westward to the thriving little city of Astoria, Oregon, you will find the Kester Machines. The Water-works of Atlanta, Ga., as well as our friend at San Cristobal, Los Andes, Venezuela (who writes in Spanish), all express the same degree of satisfaction. And all this because the Kester has distinguishing features of superiority which convince every purchaser, no matter what his nationality or politics.

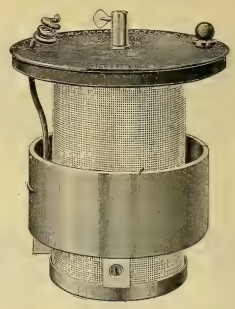
# 1896 Welcomes the Unparalleled Success of the GORDON BATTERY. WHY?

**BECAUSE IT EXCELS IN**

1. **LONG LIFE.** Warranted to operate, at a discharge rate of eight or ten one-hundredths of an ampere, six months without any attention whatever, as required for Railway Signal Service, and much longer where less power is required.
2. **EFFICIENCY.** It will perform many kinds of work that cannot be obtained from the Gravity Battery.
3. **ECONOMY.** The installation and maintenance of the Gordon Battery for one year for Railway Signal Service is about one-half the cost of the Gravity Battery.
4. **ADAPTABILITY.** The Gordon Battery will work equally well on either open or closed circuit.
5. **IT IS ABSOLUTELY NON-FREEZING.** In practical operation in Railway Signal Service, the Gordon Battery on the surface of the ground has worked uninterruptedly, with the mercury four degrees below zero. Gravity Batteries, at the same station, eight feet under ground, at the same time, froze solid.
6. **LABOR SAVING.** It requires no supervision whatever during its life.
7. **FREE FROM LOCAL ACTION.** It is not consumed by local action when not in service. Gravity Batteries require constant attention and "feeding," whether in use or not, while the Gordon Battery is not a self-consumer, all its elements remaining intact until required to produce power.
8. **FREEDOM FROM GASES AND ODORS.** It is clean and neat in appearance, and absolutely free from noxious fumes and gases, and "creeping" salts.
9. **SUPERIOR GENERATION OF ENERGY.** Its product in useful energy is four times greater, weight for weight, than the Gravity Battery.



**THESE BATTERIES ARE IN USE BY THE MOST PROMINENT RAILROAD, TELEPHONE AND FIRE ALARM COMPANIES OF AMERICA.**

Send for descriptive circular and price list. MANUFACTURED B We guarantee all our Cells.

THE
# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

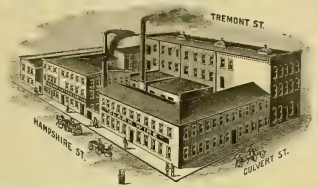
TRADE MARK.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in Insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

**GREAT REDUCTION IN TIME TO CALIFORNIA.**

Once more the North-Western Line has reduced the time of its trans-continental trains, and the journey from Chicago to California via this popular route is now made in the marvelously short time of three days. Pullman Drawing-Room Sleeping cars leave Chicago daily, and run through to San Francisco and Los Angeles without change, and all meals en route are served in Dining cars. Daily Tourist Sleeping car service is also maintained by this line between Chicago and San Francisco and Los Angeles, completely equipped berths in upholstered Tourist Sleepers being furnished at a cost of only $6.00 each from Chicago to the Pacific Coast. Through trains leave Chicago for California at 6 p. m. and 10:45 p. m. daily, after arrival of trains of connecting lines from the East and South.

For detailed information concerning rates, routes, etc., apply to ticket agents of connecting lines or address:

THE growing demand for simple electrical apparatus in dwelling houses, offices and work-hops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, nother is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.

The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described

## CALIFORNIA EXCURSIONS.

**PERSONALLY CONDUCTED.**

Leave Chicago via the Burlington Route (C. B. & Q. R. R.) every Wednesday at 6.35 p. m. Route via Denver, Denver & Rio Grande Ry. (the scenic line) and Salt Lake City. These excursions are accompanied by an experienced agent, of the Burlington Route, thoroughly familiar with California. The latest model of Pullman tourist sleeping cars are used. They are fitted with every comfort: carcets, upholstered seats, mattresses, pillows, bed linen, toilet room, etc. They lack only some of the expensive finish of the Pullmans run on the limited express trains, while the cost per berth is only about one-third. Ask your nearest ticket agent for particulars and descriptive folders, or write to P. A. Peabody, Manager Burlington Route Excursion Bureau, 211 Clark Street Chicago, Ill.

SANTA CLAUS

has induced the Nickel Plate Road to sell excursion tickets at very low rates to all points on its line between Chicago and Buffalo during the Holidays. Tickets at one and one-third fare for the round trip. Special excursion dates December 24th, 25th, 31st and January 1st, good returning until January 2d. For further information address J. Y. Calahan, Gen'l Agent, 111 Adams St., Chicago, Ill. Memo No. 113.

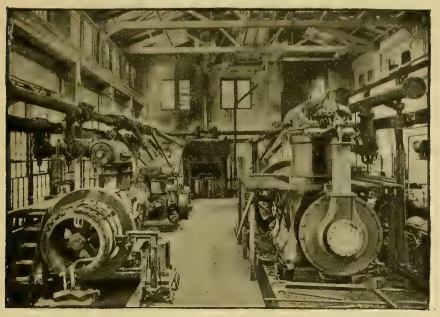
# Something About Westinghouse Engines.



TESTING ROOM.

....TESTING....

Every Westinghouse Engine, from the five horse-power Junior to the seven hundred horse-power Compound, is tested under full load before shipment. Ample facilities for testing the larger sizes of engines will be provided in our new shops, now approaching completion. Our present testing room has accommodations for nine engines at once. The piping is arranged so that the exhaust from any one engine can be turned into a surface condenser, condensed and weighed. The engines are loaded by means of a Prony Friction Brake. Every engine carries its full load from two to four days.

We make running tests on all Junior and Standard engines and economy tests on two engines taken at random from every shop order. We make a careful test of the steam consumption of every Compound engine we build Reports of these tests with sample indicator cards are on file for every Compound engine ever built by us. This means that when you buy a Westinghouse engine you may be sure it is in perfect running order, its adjustments correct, its internal friction not excessive, and its steam consumption well within the limits of good economy. Further, it means that when we make a guarantee as to the economical performance of our engines, it is not a "bluff," but a fact which may be verified by our records, or by a test which the purchaser is free to make in our shops under the supervision of his own expert, and for which we will gladly furnish every facility. In this respect the Westinghouse Machine Company has no imitators. We cordially invite the most critical inspection of our product and methods of manufacture. Our shops are open at all times to engineers and others interested in steam power. If this subject is of interest we will send you a little circular which explains it more fully.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.** Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations ........ $1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations ........ $1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages ........ $1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition ........ $2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition ........ $2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches ........ $1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches ........ $1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches. $1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations. 27 original tables ........ $1.00

Gives more *Practical* information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations ........ $2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth ........ $1.50

**Bonney, G. E.** Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth ........ $1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone ........ $0.50

**Bottone, S. R.**—The Dynamo. How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations ........ $1.00

**Bottone, S. R.** Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to ........ $0 50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers ........ $0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth ........ $2.00
Paper ........ 1.00

**Cox, Frank P.** Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated ........ $2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged ........ $1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways. Second edition revised and enlarged. 183 illustrations ........ $2.5.

**Desmond, Chas.**—Electricity for Engineers. Part I. Constant Current. A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition ........ $2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards ........ $0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations ........ $1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition ........ $3.00

Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.

Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892 ........ $5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition ........ $2 00

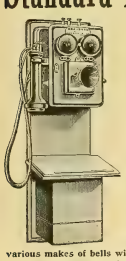
## Standard Telephone and Electric Co.

MADISON - - WISCONSIN,

MANUFACTURERS OF THE

### Standard Loud-Speaking, Long-Distance and Exchange Telephone.

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.



Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

**Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.**

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

### Standard Telephone Exchange Switchboards

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

# Happy New Year and the Western Electrician...

**$3.00 FOR 52 NUMBERS.**

You cannot begin the New Year more auspiciously than by subscribing for the WESTERN ELECTRICIAN, America's leading electrical journal.

No matter what your connection with electrical industries, it will *help* you enormously, because you will know everything of interest that is going on in the field, all the new inventions, practical applications, labor-saving devices, and general news.

THE WESTERN ELECTRICIAN is simply invaluable on account of its *practical* descriptive articles, copiously illustrated, by the leading writers and workers of the day.

A general manager of one of the great manufacturing companies recently summed it up when he wrote:

"As subscribers, advertisers and *readers of your most excellent journal* we take pleasure in stating that we have nothing but the *highest praise* for it."

Send us $3.00 and we will enter your name for one year's subscription.

**3 MONTHS TRIAL TRIP 50c.**

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

# THE

# Fort Wayne Electric Corporation

Announces through its new catalogue the manufacture of complete systems of high grade electric lighting and power apparatus. This apparatus, made under the personal supervision of the inventor, James J. Wood, has attained a remarkable record in point of high efficiency, excellence of design and superior workmanship.

The improvements in arc light dynamos for 1896 include ventilated armature, lowering the temperature fifty degrees F.; commutator mounted on spider, preventing vibration of connections; self-oiling boxes of improved design, and dynamo and automatic regulator constructed to operate perfectly when run in either direction.

To the already numerous sizes is added a new size, 9A, for 100 2,000 c. p. lights, or 125 1,200 c. p. lights. This makes our list of arc light dynamos the most complete in the world.

Send for Circulars.
BRANCHES: 164 Summer St., Boston; 113 Liberty St., New York; 129 North 3d St., Philadelphia.

GRAPHITE SPECIALTIES
FOR ELECTRICAL USES:
Graphite Rods of Various Lengths, from 1-5 Ohm to 100 Ohms Resistance to the inch. Graphite Boxes and Crucibles, Resisting Heats of 4,000 Degrees. Inquiries Gladly Answered.
JOS. DIXON CRUCIBLE CO., Jersey City, N. J.

HELMET OIL
THE BEST LUBRICANT KNOWN
LUBRICATES ANYTHING
DOES NOT CLOG NOR GUM NOR MELT NOR FREEZE
LUBRICATE YOUR BICYCLE WITH IT.
CHARLES H BESLY & CO
METAL WORKERS FINE TOOLS & SUPPLIES.
10 & 12 N. CANAL ST. CHICAGO ILL. U. S. A.

Thousands of our Cells are in Service in U.S. and Abroad....
STORAGE BATTERIES FOR ALL PURPOSES
Solid Rolled Lead Plate. Immense Strength. Large Surface.
Electro-Chemical Formation of Active Material.
INSURING GREATEST DURABILITY COMBINED WITH EFFICIENCY.
——ALL SIZES FOR SALE BY——
Established 1889.
Highest Award Granted at World's Columbian Exposition, Chicago, 1893.
American Battery Company,
42 West Quincy Street,
CHICAGO, ILL.
Absolutely Non-Infringing. Protection Guaranteed to all Purchasers.

VULCANIZED FIBRE CO.
ESTABLISHED 1878.
SOLE MANUFACTURERS OF
HARD VULCANIZED FIBRE
In Sheets, Tubes, Rods, Sticks, and Special Shapes to order. Colors, Red, Black and Gray. Send for Catalogue and Prices.
FACTORY: WILMINGTON, DEL. The Standard Electrical Insulating Material of the World. OFFICE: 14 DEY ST., NEW YORK.

Black Diamond File Works.
Est. 1863. Inc. 1895.
TRADE MARK.
We make any kind of File or Rasp known to the File Trade.
Prompt attention to special work.
Files made to order to suit any purpose.
Our regular goods are on sale in every leading Hardware Store in the United States and Canada.
G. & H. BARNETT COMPANY,
Philadelphia, Pa.

SPEAKING TUBES AND WHISTLES.
Oral, Electric, Pneumatic and Mechanical
ANNUNCIATORS AND BELLS.
Full Line Always in Stock.
W. R. OSTRANDER & CO.,
204 Fulton St., New York.
Factory, 1461 and 1463 DeKalb Ave., Brooklyn, N. Y.
Send for New Catalogue. Out August 1st.

MEDBERY SWITCHES

15 TO 600 AMPERES.
Our Pony Switch is the only absolutely reliable Switch made.
SELLING AGENTS:
MASON ELECTRIC EQUIPMENT CO., CHICAGO, ILL.
A. W. SOLOMON, Savannah, Ga.
HOEFGEN, MOXHAM & CO., No. 80 William St., New York.

**WESTON** Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

**Illuminated Dial Station Instruments.**

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Voltmeter.

**Weston Standard**

Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milliammeters. Wattmeters and Voltmeters, for Alternating and Direct Current circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

J. Frank Dunbar, Treasurer,

## NEWTON RUBBER CO.,

87 Summer St., Boston Mass.

# The S. K. C. Two Phase Alternating Current System.

**THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.**

## POINTS OF SUPERIORITY:

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multi-phase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.

# THE OHIO STORAGE BATTERY COMPANY,

SOLE MANUFACTURERS, UNDER EXCLUSIVE LICENSE, OF THE

## Ford-Washburn Storelectro Co.'s Storage Batteries.

**THE MOST DURABLE BATTERIES EVER PRODUCED. FOR STREET RAILWAYS, LIGHTING PLANTS, ELECTRIC LAUNCHES, ELECTRIC CARRIAGES, DOCTORS AND DENTISTS; AND FOR ANY OTHER WORK WHERE STORAGE BATTERIES CAN BE USED.**

## SPECIALTIES:

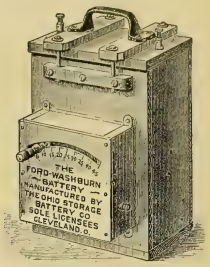
**ISOLATED PLANTS for HOUSE LIGHTING, and CELLS for SURGICAL, TELEGRAPH, TELEPHONE and PHONOGRAPHIC USES. SMALL CELLS MADE TO ORDER**

**The entire absence of plates** in our cells is an advantage, the full strength of which is only known to those who have had a weary experience with batteries of the plate type. Not only are the lead grids in plate batteries very heavy, but they are always "buckling," "needing" and "disintegrating." The construction of our cell obviates the necessity of ruinous repairs; in other words, it **stands incessant charge and discharge with so little perceptible wear, that it compares with a well-built dynamo and motor as to absence of repairs and in requiring no attention. Not only will our battery stand repeated discharges on dead short circuit without injury, but it will remain in first-class condition for an indefinite period of time, when unused, on an open circuit.**

**We have frequently replaced the most widely advertised Storage Battery in this country with our cells.**

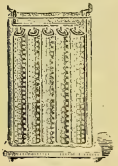
**AGENTS WANTED IN UNOCCUPIED TERRITORY.**

**Our Prices Lower Than Those Of Any Other First-Class Makes.**



MEDICAL CELL.

The Ford-Washburn Storelectro Co.'s Car "Ideal," Equipped with its Cells, ascending a 6 per cent grade on the Cleveland & Berea Street Railway, with Loaded Trailer.



5 G CELL.

6 G CELL.

**The only Storage Battery that ever successfully operated a Railroad in winter as well as in summer. These Cells are soon to be used in another Railroad enterprise that will attract the attention of the whole country, they having been selected after a thorough examination of all other makes. Watch the press!**

**Many of our cells have been in hard use for four years without deterioration.**

The Cleveland *Leader*, of Oct. 25, 1895, had the following:

"The instantaneous death of Franklin Leonard Pope, the eminent electrical expert and publicist, at his home in Great Barrington, Mass., on the 13th inst., is the sensation of the hour in scientific circles. Mr. Pope descended to his cellar to examine a powerful converter, and by some means unknown received a shock which killed him on the spot. It is a fact of local interest that among the last important acts of Mr. Pope's life was the preparation of an elaborate opinion that the patents covering the Ford-Washburn Storelectro Company's storage battery DO NOT INFRINGE IN THE SLIGHTEST DEGREE ANY OTHER STORAGE BATTERY PATENTS. Mr. Pope's paper was dated the 5th inst., and was accompanied by an autograph personal letter."

Other opinions, equally strong, from H. T. Fisher, late U. S. Examiner in the Patent Office, E. A. Angell and others. WE WILL PROTECT ALL OUR CUSTOMERS FROM LITIGATION.

Department of Physics and Electrical Engineering
UNIVERSITY OF ILLINOIS.

Champaign Ill. Aug 19 1895

The Ohio Storage Battery Co
52 Wade Building.
Cleveland, Ohio

Gentlemen -

Please furnish the Department of Physics and Electrical Engineering with 100 Ford-Washburn storage cells in glass, type 6 G of 150 ampere hours capacity each, the time of shipment to be such that we may receive the cells by the middle of September My experience with them thus far, and the favorable comparison of these cells with the other types which we have already in use, show them to be the most satisfactory thing for general purposes that there is now on the market I sincerely hope you may meet with the success in your business that you deserve, If the cells which you are now manufacturing are as good a quality as the five which I have had in constant and hard use during the last three years

Yours truly
Dennis M. Sheehan
Assistant Professor of Physics & Elec. Eng.

Cell for operating Fans, Sewing Machines, Dentists' Lathes, Drills, etc.

CONDUITS.

In lengths of 4 ft. 6 in., any number of ducts.

Are you interested in Conduits?

If you are it will pay you to look into the merits of the latest — undoubtedly the best.

JOHN T. McROY,
36 S. Clark Street, Chicago.

DOMESTIC ELECTRICAL WORK.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting from Batteries.

*Illustrated with Twenty-two Diagrams.*

By WILLIAM A. WITTBECKER.

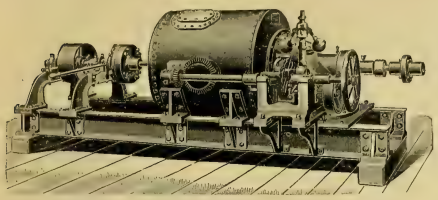
Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

THE growing demand for simple electrical apparatus in dwelling houses, offices and workshops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings the little volume is addressed.

The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described

ELECTRICIAN PUBLISHING CO.,
6 Lakeside Building, CHICAGO

# Victor Turbine Water Wheel.



**Cylinder or Register Gate—Close Regulation and High Efficiency at Full and Partial Gate.**

The attention of ELECTRIC COMPANIES is called to this **CELEBRATED WATER WHEEL** as particularly adapted to their use, on account of its **remarkably steady motion, high speed and great efficiency and large capacity** for its **diameter,** being **double** the **power** of most wheels of the same diameter. It is used by a number of the leading electric companies with great satisfaction. In the economical use of water it is without an equal, producing the highest per cent of useful effect **guaranteed.**

*SEND FOR CATALOGUE AND PARTICULARS.*

The accompanying engraving represents a single 10-inch Victor Turbine on horizontal shaft to develop 36 H. P. under 38 feet head. Arranged with 12-inch Worrell Friction Coupling at one end to disconnect pulley.

We are now prepared to furnish Victor Turbines, either single or in pairs, on horizontal shafts, and where the situation admits of their use we recommend them.

# WHEN YOU HEAR YOUR NEIGHBOR TALKING

About the very best motor and dynamo made it is a ten to one shot that he will mention the name "Kester," because every purchaser becomes a friend and, like quality, talks. Our motors are doing duty in thirty-seven states of the Union, and in point of electrical efficiency and mechanical durability they are without an equal. They are sold on their merits and guaranteed to be absolutely perfect. Our dynamos are superior to any machine of like rated capacity now on the market. Each size has

**SLIDING BASE, SELF-OILING AND SELF-ALIGNING BEARINGS**

and will carry the rated capacity without any Sparking or Heating, are Noiseless and guaranteed free from any defect. Further particulars cheerfully furnished

# SOLD ON THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

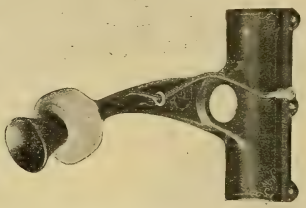
**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation;**

**Least Affected by Induction of any Instrument now on the Market;**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**



**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm, as shown in cut, to those who may wish to replace the transmitters on other makes of instruments.

We make any kind of File or Rasp known to the File Trade.

Prompt attention to special work.

Files made to order to suit any purpose.

**Our regular goods are on sale in every leading Hardware Store in the United States and Canada.**

**G. & H. BARNETT COMPANY,**

Philadelphia, Pa.

**GRAPHITE SPECIALTIES**

FOR ELECTRICAL USES:

Graphite Rods of Various Lengths, from 1-5 Ohm to 100 Ohms Resistance to the inch. Graphite Boxes and Crucibles, Resisting Heats of 4,000 Degrees. Inquiries Gladly Answered.

**JOS. DIXON CRUCIBLE CO., Jersey City, N. J.**

**MEDBERY SWITCHES**

15 TO 600 AMPERES.

Our Pony Switch is the only absolutely reliable Switch made.

SELLING AGENTS:

**MASON ELECTRIC EQUIPMENT CO., CHICAGO, ILL.**

A. W. SOLOMON, Savannah, Ga. HOEFGEN, MOXHAM & CO., No. 86 William St., New York. JOSHUA HENDY MACH. WORKS, San Francisco, Cal.

Manufactured by THE FIBERITE CO., Mechanicville, N. Y.

Electric Lighting and Power Apparatus.

No. 10 Arc Dynamo. 100 lights, 2,000 candle power.

THE

**BRUSH**

ELECTRIC CO.,

The Brush Double Arc Lamp Patents sustained by repeated decisions of U. S. Courts.

Agencies in all large cities. The Russell Electric Company, Denver, Colo. Bagnall & Hillis, Yokohama, Japan.

**Office and Works, Cor. Belden and Mason Sts., CLEVELAND, OHIO.**

Institute of Technology
Boston Mass

# Western Electrician.

$3 per Annum. Copyrighted, 1896, by Electrician Publishing Company, Chicago. EVERY SATURDAY. Entered at Chicago Postoffice as mail matter of the second class. 10 cents per Copy.

Vol. XVIII. CHICAGO, JANUARY 18, 1896. No. 3

**SIMPLEX** INSULATED WIRES AND CABLES.

RUBBER COVERED, WEATHERPROOF, UNDERGROUND and SUBMARINE.

WESTERN SELLING AGENT. H. R. HIXSON, 1137 Monadnock Block, CHICAGO.

Simplex Electrical Company, 75-81 Cornhill, BOSTON, MASS.

**ALFRED F. MOORE.**

MANUFACTURER OF

**INSULATED ELECTRIC WIRE,**

FLEXIBLE CORDS and CABLES.

206 and 208 North Third Street. - - PHILADELPHIA, PA.

**INSULATED WIRES AND CABLES**

Aerial, Underground and Submarine,

For TELEPHONE, TELEGRAPH, LIGHT and POWER.

Lead encasing in all its Branches.

KERITE TAPES.

DAY IS KERITE

W. R. BRIXEY, Mfr., J. E. HAM, Gen'l Agt., 203 Broadway, New York.

**SOLAR CARBON AND MANUFACTURING CO.,**

MANUFACTURERS OF

**Carbon Brushes, Battery Carbons,**

**Solid Electric Light Carbons,**

For any System, of any degree of hardness.

**Soft Cored Carbons (NOT HOLLOW),**

For Arc Lamps on Incandescent and Railway Circuits

**SOLAR CARBON AND MANUFACTURING CO.,**

**95 FIFTH AVENUE, PITTSBURG, PA.**

BABCOCK & WILCOX BOILERS

THE BABCOCK & WILCOX CO.

STEAM

29 CORTLANDT ST. NEW YORK.

SEND FOR BOOK ON STEAM.

**WESTON** Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

**Illuminated Dial Station Instruments.**

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Ammeter, Style B.

**Weston Standard**

Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

**WESTON ENGINES.**

**High Pressure Boilers. Complete Power Plants.**

Estimates and Drawings Submitted.

**WESTON ENGINE CO., PAINTED POST, N. Y.**

# THE FREEMAN BATTERY CELLS.

ESTIMATES FURNISHED ON APPLICATION. PROMPT DELIVERY.

STANDARD SIZES ALWAYS ON HAND.

The composition used in the manufacture of these battery cells makes them positively acid-proof, which result has never before been accomplished, providing additional strength to such an extent that this cell can be used where no other would be practical.

THESE CELLS ARE A NEW PRODUCTION AND FULLY GUARANTEED.

AGENTS WANTED IN ALL CITIES. WRITE US FOR INFORMATION AND CATALOGUE.

FOR PROMPT REPLY ADDRESS

J. Frank Dunbar, Treasurer, NEWTON RUBBER CO.,

87 SUMMER ST., BOSTON, MASS.

# STOP! We Want That ORDER.

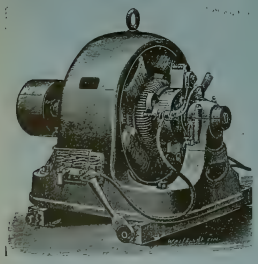
WE CAN FILL IT AT ONCE, WITH

# THE TRIUMPH,

The LATEST and BEST MACHINE on the Market.

TENS, HUNDREDS, THOUSANDS,

In Actual Operation under Varied Conditions. All Sizes Carried in Stock. Parts Interchangeable.



MULTIPOLAR.

The Triumph Machines are Sparkless, extremely simple, and require little attention. Motors are Iron-clad and entirely enclosed and protected.

Electric Light or Power Transmission.
Belted or Direct Connected Generators or Motors.
Bipolar or Multipolar Generators or Motors.
Motors and Automatic Controllers for Electric Elevators, Cranes or Hoists.

BIPOLAR.

COMPLETE INSTALLATIONS. Write us. Wire us.

## The TRIUMPH ELECTRIC CO.,

New York Office, Mail and Express Building. Chicago Office, Medinah Temple. Sales Offices in all Large Cities.

Office and Factory,

CINCINNATI, O.

## The Haller Tube Cleaner

Sent to responsible parties on approval.
Return it if not found satisfactory.

**STRONGEST, BEST, SIMPLEST.**

Body is cast steel. Cutting wheels are best tool steel.
☞ SET SCREW enables you to regulate the jaws.

All tube cleaners heretofore manufactured have had a spring to maintain the distance between the jaws, and when used in a tube and brought into contact with a place having an unusually heavy deposit of scale, these springs at once contracted, permitting the cleaner to pass over without removing it.

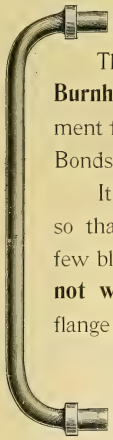
## INCANDESCENT LAMPS

Monadnock Building, Chicago. **THE BUCKEYE ELECTRIC CO., Cleveland, O.**

# Electric Railway and Central Station Supplies.

This cut illustrates the Kelsey **Noiseless** Ratchet Brake.

Backward turn is made **without** friction on the teeth and consequently there is no **wear** and **tear.** We carry these in stock.



There must be a great measure of **real merit** in the **Benedict** and **Burnham** solid one-piece **Rail Bonds,** else there would be no inducement for a Railway Company to pull out hundreds of other fairly good Bonds to replace with them.

It is the only solid Bond with a ***shoulder*** and can be headed up so that it fills the hole perfectly. A button head is formed with a few blows, drawing the shoulder up tight against the rail. **They will not work loose** if **properly set.** Bond lies close up under the rail flange and is thereby well protected.

# Strictly Weatherproof.

The necessity of a high grade weatherproof insulation that can be relied upon at all times is appreciated by every careful station manager. A poor overhead line means heavy loss. "O. K." weatherproof wire has a perfectly uniform insulation, and every foot of it is as good as a weatherproof wire can be made.

## Prompt Shipments from Chicago.

The purchaser who fails to specify a particular high grade of weatherproof wire is going to get the cheapest the market affords, which will, in all probability, be weatherproof in name only. We fill all orders for weatherproof wire with our celebrated "O. K." product and are its exclusive handlers in this territory.

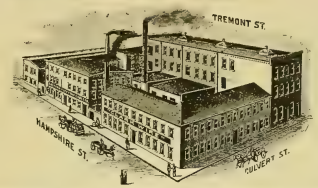
THE
# "CLARK" WIRE.

TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

BRANCH OFFICE:
1649, 1650, 1651 MONADNOCK BLDG.,
CHICAGO, ILLINOIS.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

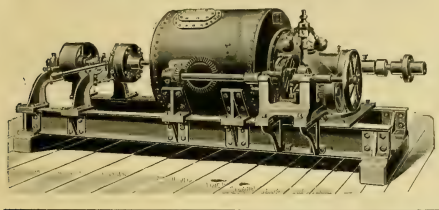
**Price in Cloth, 50 Cents.**

THE growing demand for simple electrical apparatus in dwelling houses, offices and workshops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.

The information given is above all else practical, and with a close observance of the rules laid down anyone without the slightest knowledge of electricity should be able to do the work described

ELECTRICIAN PUBLISHING CO.,
6 Lakeside Building, CHICAGO

# Victor Turbine Water Wheel.



**Cylinder or Register Gate—Close Regulation and High Efficiency at Full and Partial Gate.**

The attention of ELECTRIC COMPANIES is called to this **CELEBRATED WATER WHEEL**, as particularly adapted to their use, on account of its **remarkably steady motion, high speed and great efficiency and large capacity** for its **diameter,** being **double** the **power** of most wheels of the same diameter. It is used by a number of the leading electric companies with great satisfaction. In the economical use of water it is without an equal, producing the highest per cent of useful effect **guaranteed.**

*SEND FOR CATALOGUE AND PARTICULARS.*

The accompanying engraving represents a single 10 inch Victor Turbine on horizontal shaft to develop 36 H. P. under 38 feet head. Arranged with 12 inch Worrell Friction Coupling at one end to disconnect pulley.

We are now prepared to furnish Victor Turbines, either single or in pairs, on horizontal shafts, and where the situation admits of their use we recommend them.

# Happy New Year and the Western Electrician...

**$3.00 FOR 52 NUMBERS.**

You cannot begin the New Year more auspiciously than by subscribing for the WESTERN ELECTRICIAN, America's leading electrical journal.

No matter what your connection with electrical industries, it will *help* you enormously, because you will know everything of interest that is going on in the field, all the new inventions practical applications, labor-saving devices, and general news.

THE WESTERN ELECTRICIAN is simply invaluable on account of its *practical* descriptive articles, copiously illustrated, by the leading writers and workers of the day.

A general manager of one of the great manufacturing companies recently summed it up when he wrote:

"As subscribers, advertisers and *readers of your most excellent journal* we take pleasure in stating that we have nothing but the *highest praise* for it."

Send us $3.00 and we will enter your name for one year's subscription.

## SOLAR CARBON AND MANUFACTURING CO.,

MANUFACTURERS OF

Carbon Brushes, Battery Carbons,

Solid Electric Light Carbons,

For any System, of any degree of hardness.

Soft Cored Carbons (NOT HOLLOW),

For Arc Lamps on Incandescent and Railway Circuits

SOLAR CARBON AND MANUFACTURING CO.,

95 FIFTH AVENUE. PITTSBURG, PA.

## WESTON Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

### Illuminated Dial Station Instruments.

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Potential Indicator, Style B. "Flush Type."

### Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters, Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

Mention the WESTERN ELECTRICIAN when writing for catalogues.

## PACKARD LAMPS

....ARE....

STANDARD

AND ARE MADE ONLY BY

NEW YORK & OHIO COMPANY,

WARREN, OHIO.

## ANDERSON STEEL TROLLEY POLES AND HARPS.

PIVOTAL BOSTON TROLLEYS

Received only Award for Trolleys at Chicago

Manufactured by ALBERT & J. M. ANDERSON, 289-293 A St., Boston, Mass.

## Best Boilers.

Our Boiler Shop is equipped for making large boilers in two sheets as shown in the cut. No seams in fire, no laps to catch scale and mud; bottoms smooth and easily cleaned.

WRITE FOR PRICES.

The Murray Iron Works Co., BURLINGTON, IA.

## FARIES UNIVERSAL LAMP HOLDER.

# JUST A WORD.....

Don't Wait Till the Horse is Gone to Lock the Stable Doors.

You Don't Know When that First Storm is Coming. Are You Sure You are "Lightning Proof?"

## GARTON LIGHTNING ARRESTERS

Will Protect You Where All Others Have Failed.

**FOREWARNED IS FOREARMED!**

*SEND IN YOUR ORDER TO-DAY.*

## THE GARTON LIGHTNING ARRESTERS

Have Received the Highest Approval of Some of the Leading Electrical Men of the Country.

**"Carton Lightning Arrester" is a Synonym for "Durability, Reliability, Efficiency."**

NO High Ohmic Resistance to Break Down After a Few Discharges!
NO Pivots, Sliding Contacts or Hinges to Blister and Stick!
NO Fuses to Replace! NO Inductive Resistance to the Discharge!
NO Copper Balls to Melt.

**Made for Use in Station, on Poles and in cars. For any Voltage, any Amperage, either Direct or Alternating.**

Write to your Supply Dealer for Information and prices, or to

## GARTON - DANIELS ELECTRIC CO., KEOKUK, IOWA.

# The S. K. C. Two Phase Alternating Current System.

THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALY SUCCESSFUL.

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service; i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.

# STANLEY ELECTRIC MANUFACTURING CO.,

PITTSFIELD, MASS.

**WESTERN OFFICE, 305 DEARBORN STREET, CHICAGO, ILL.**

The Royal Electric Co., Montreal, Can., are exclusive licensees for the manufacture of the S. K. C. System in the Dominion of Canada.

# a gilt edge bond at par.

Several Electric Railways have found it necessary to re-bond their **tracks. Why?** Well, the old bonds were "loose." (The corporation attorney did not pass judgment, but the Chief Engineer **did.**) They made poor contact, were not properly constructed, were too small, had too many parts, etc., etc. **Was there anything better?** Certainly! The **Benedict & Burnham solid, one-piece** bond was just the thing. No parts to "assemble," nothing to get lost. Will go with any kind of rail. The **heavy shoulder** enables the mechanic to head-up the bond with a few blows of his hammer, completely filling the hole and making a perfectly tight and sure electrical contact. We can make prompt shipments in any quantity.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions, such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world.

This book, while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

Style No. 1.

Steady Steam. Coal Saved.

# No Electric Light or Power Plant can be Operated Intelligently or Economically without it.

**THE FACTS ARE:—**

**THAT the presence of an Edson Recording Gauge causes Careful Firing and Steady Steam, and increases the efficiency of any engine or boiler.**

**THAT careful firing preserves a boiler and saves coal.**

**THAT steady steam secures an economical point of cut-off and steam economy from proper expansion in the cylinder.**

**THAT this steam is saved twice during each revolution.**

**THAT more work will be turned out and its quality improved when the steam and power are uniform.**

**THAT coal can be saved by frequent firing in small lots instead of large amounts at long intervals.**

**THAT you can distinguish between an attentive man and a careless one by the record he makes.**

**THAT a fireman will be more proud of a good record than a poor one.**

**THAT he will be more careful when he finds you are careful and use an Edson Recording Gauge.**

**THAT when he makes a good record he works harder and saves coal, and should be paid accordingly.**

**THAT the steam boiler is a magazine of stored energy of enormous power, which those in charge, by reason of long immunity from accident, frequently underestimate, and so grow careless and neglectful. In this they are not corrected, because their delinquencies go unrecorded, as the common indicating gauge reveals no secrets when fires are "banked" and damper regulators do not work and human dependence fails.**

**THAT the inattention to the thing, which shows the persistent, long, fluctuate 10 or 20 pounds frequently at short intervals, unnecessarily strains and weakens a boiler, and those guilty of such mismanagement are often the first to pay with their own lives or property the penalty of their temerity.**

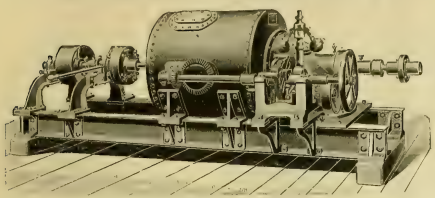
# Victor Turbine Water Wheel.



**Cylinder or Register Gate—Close Regulation and High Efficiency at Full and Partial Gate.**

The attention of ELECTRIC COMPANIES is called to the **CELEBRATED WATER WHEEL** as particularly adapted to their use, on account of its **remarkably steady motion, high speed and great efficiency and large capacity** for its **diameter,** being **double** the **power** of most wheels of the same diameter. It is used by a number of the leading electric companies with great satisfaction. In the economical use of water it is without an equal, producing the highest per cent of useful effect **guaranteed.**

*SEND FOR CATALOGUE AND PARTICULARS.*

The accompanying engraving represents a single 30 inch Victor Turbine on horizontal shaft to develop 36 H. P. under 38 feet head. Arranged with 12-inch Worrell Friction Coupling at one end to disconnect pulley.

We are now prepared to furnish Victor Turbines, either single or in pairs, on horizontal shafts, and where the situation admits of their use we recommend them.

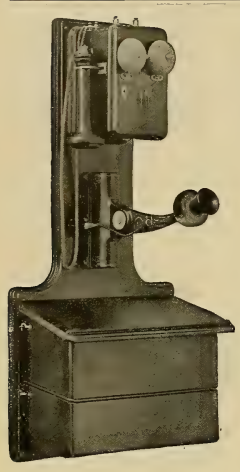
## ELECTRIC TRANSMISSION HAND-BOOK.

Lieut. F. B. Badt's latest addition to our famous hand-book series, of which 45,000 copies have been sold. The new book deals in the author's well-known practical style with all the problems of Electric Power Transmission.

**NOW READY.** **PRICE $1.00.**

**ELECTRICIAN PUBLISHING CO.,** 6 Lakeside Building, CHICAGO.



# Sold on Their Merits.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

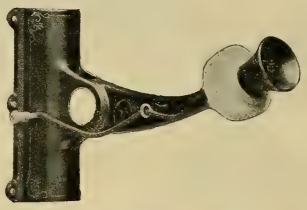
**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation;**

**Least Affected by Induction of any Instrument now on the Market;**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**



**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm, as shown in cut, to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts Write to**

# Connecticut Telephone and Electric Co.,

**Meriden, Conn., U. S. A.**

## The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

### CONTENTS.

Chapter I. Elementary Considerations. Chapter II. Early Motors and Experiments in Europe. Chapter III. Early Motors and Experiments in America. Chapter IV. The Electrical Transmission of Power. Chapter V. The Modern Electric Railway and Tramway in Europe. Chapter VI. The Modern Electric Railway and Street-car Line in American. Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways. Chapter VIII. The Industrial Application of Electric Motors in Europe. Chapter IX. The Industrial Application of Electric Motors in America. Chapter X. Electric Motors in Marine and Aerial Navigation. Chapter XI. Telpherage. Chapters XII, XIII. Latest American Motors and Motor Systems. Chapter XIV. Latest European Motors and Motor Systems. Chapter XV. Alternating Current Motors. Chapter XVI. Thermo-magnetic Motors. Appendix. The Development of the Electric Motor since 1888.

*Copies of this or any other electrical book published will be sent by mail,* POSTAGE PREPAID, *to any address in the world, on receipt of price.*

## Standard Telephone and Electric Co.

MADISON - - WISCONSIN,

MANUFACTURERS OF THE

### Standard Loud-Speaking, Long-Distance and Exchange Telephone.

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with neutrally pivoted armatures (the position same having now expired) and high coefficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc., etc.

Sole Licensees for sale of **Hilde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire metallic contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

### Standard Telephone Exchange Switchboards

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing several original features possessed by no other; require where power generator is used but three movements to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations........ $1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations........ $1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages........ $1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition........ $2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition........ $2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches........ $1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches........ $1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-book. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches. $1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables........ $1.00

Gives more *Practical* information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations........ $2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth........ $1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 203 pages. 12mo, cloth........ $1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone........ $0.50

**Bottone, S. R.**—The Dynamo. How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations........ $1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to........ $0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers........ $0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams.
Cloth........ $2.00
Paper........ 1.00

**Cox, Frank P.** Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated........ $2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged........ $1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways. Second edition, revised and enlarged. 183 illustrations........ $2.5

**Desmond, Chas.**—Electricity for Engineers. Part I. Constant Current. A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition........ $2 50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards........ $0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations........ $1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition........ $3.00

Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current Induction.

Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892........ $5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition........ $2 00

**Gordon.**—School Electricity. Sources, Currents, Measurements, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations........ $2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference. $1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised........ $1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations........ $1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations........ $3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions........ $1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 630 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated........ $1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy........ $0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs. Translated from the French. With additions by C. J. Wharton. With illustrations........ $2 50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations........ $5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivison and Distribution. A practical handbook. Third edition........ $3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated. $0.50
[Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated........ $1 00

**Kapp, Gisbert.** Dynamos, Alternators and Transformers. 138 illustrations........ $4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892........ $7 25

In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather........ $1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations........ $2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

IRON ARMORED
INSULATING CONDUITS.
Two Wires in a Single Tube, the Standard Method of Electric Wiring.
INTERIOR CONDUIT & INSULATION CO.,
General Offices and Works: 527 W. 34th St., New York.
Edwd. H. Johnson, Prest. E. W. Little, Vice-Prest. and Gen. Mgr. Chas. P. Geddes, Sec'y and Treas.

The Haller Tube Cleaner
Sent to responsible parties on approval.
Return it if not found satisfactory.
STRONGEST, BEST, SIMPLEST.
Body is cast steel. Cutting wheels are best tool steel.
SET SCREW enables you to regulate the jaws.
All tube cleaners heretofore manufactured have had a spring to maintain the distance between the jaws, and when used in a tube and brought into contact with a place having an unusually heavy deposit of scale, these springs at once contracted, permitting the cleaner to pass over without removing it.
WRITE FOR DESCRIPTIVE CIRCULAR.
Manufactured by

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickels, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of 43-in. Wheel—Ju y 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.16 | 119.17 | 141.58 | 305.27 | 79.76 |
| ¾ " | 16.49 | 122.46 | 127.18 | 193.19 | 82.58 |
| ½ " | 16.78 | 117.33 | 112.60 | 175.74 | 82.18 |
| ¼ " | 17.00 | 111.8 | 98.12 | 149.26 | 79.51 |
| ⅛ " | 16.88 | 118.67 | 89.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.32 | 128.0 | 134.18 | 199.56 | 80.50 |

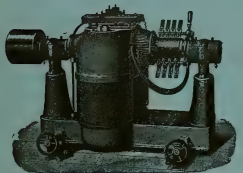
# Kester Dynamos



Represent the highest degree of perfection in Electrical Machinery. During the Holiday time, when the load is heaviest, our friend the Waxahachie Electric Light Company, of Texas, takes time to write us how pleased he is with the Dynamo, and the same mail brings a like letter from The Piedmont Pulp & Paper Company of Piedmont, W. Va. Speaking of paper mills reminds us that all the mills of the Louis Snider's Sons Company of Hamilton, Ohio, use Kester Dynamos. And the City Railway Company of Galveston, Texas, as well as the Electric Light Company of Sault Ste. Marie, Mich., express themselves as well pleased with the Kester Machines. From Buffalo and New York City westward to the thriving little city of Astoria, Oregon, you will find the Kester Machines. The Water-works of Atlanta, Ga., as well as our friends at San Cristobal, Los Andes, Venezuela (who write in Spanish), all express the same degree of satisfaction. And all this because the Kester has distinguishing features of superiority which convince every purchaser, no matter what his nationality or politics.

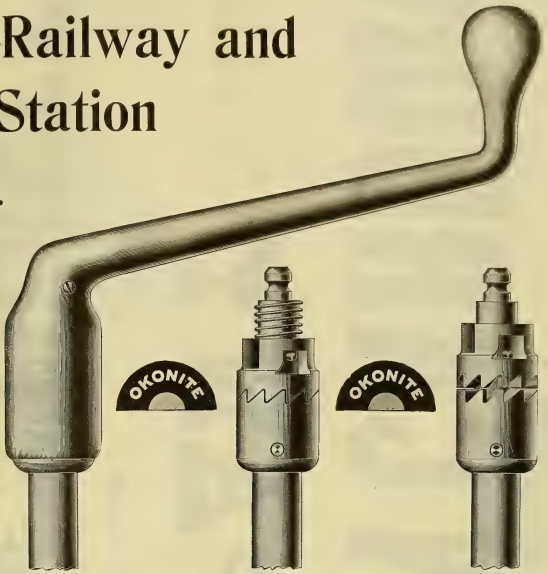
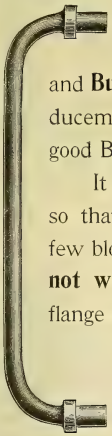
# Electric Railway and Central Station Supplies.



This cut illustrates the Kelsey **Noiseless** Ratchet Brake.

Backward turn is made **without** friction on the teeth and consequently there is no **wear** and **tear.** We carry these in stock.



There must be a great measure of **real merit** in the **Benedict** and **Burnham** solid one-piece **Rail Bonds,** else there would be no inducement for a Railway Company to pull out hundreds of other fairly good Bonds to replace with them.

It is the only solid Bond with a ***shoulder*** and can be headed up so that it fills the hole perfectly. A button head is formed with a few blows, drawing the shoulder up tight against the rail. **They will not work loose if properly set.** Bond lies close up under the rail flange and is thereby well protected.

WESTERN DISTRIBUTERS FOR

**Okonite Wires, Interior Conduit Supplies, Lundell Motors,**
**Billings & Spencer Drop-Forged Overhead Material and Commutator Segments.**

**Sales Offices in all Large Cities in the United States. For Canada address Canadian General Electric Company, Toronto.**

While we appreciate the fact that

# LONG LIFE

is not the only thing to be considered in an incandescent lamp, at the same time there is considerable satisfaction in the following statement which accompanied a burned out Packard lamp returned to the factory recently as a souvenir:

**"This Lamp has been in Constant Use for Two Years and Two Months."**

This means a life of over

# 19,000 HOURS.

☞ The Packard lamp is just as "long" on candle-power and efficiency as it is on life.

# "CLARK" WIRE.

"CLARK WIRE" TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

BRANCH OFFICE:
1649, 1650, 1651 MONADNOCK BLDG.,
CHICAGO, ILLINOIS.

In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

**ELECTRIC LIGHT POLES AND SWITCHES.**

Chicago, January 25, 1896.

Sealed proposals will be received by the West Chicago Park commissioners, at office in Union Park, until four o'clock p. m. of Tuesday, February 11th, 1896, to furnish 1,000, more or less, electric lamp poles and switches for supporting the lamps to be used for illuminating the parks and boulevards under the control of the West Chicago park commissioners.

The pole to be made in three sections. The lower section being entirely of cast iron, the upper section being cast iron with a galvanized iron pipe cast integral therewith, and the center, or intermediate section, being made of wood subjected to a special process, all in accordance with plans and specifications on file in office of the electrical engineer, Force Bain, 1057 Monadnock Block, Chicago, and a copy of which plans and specifications are also on file in office of the engineer of said park commissioners in Union Park.

Contractors may bid separately upon the lower and upper portion of the pole, or on both, giving price per pound and price per pole.

The lower section of the posts must be furnished within ninety days, and the upper section within four months from date of the awarding of contract. Bids to furnish 100 and upward of the posts will also be entertained.

Proposals must be made out upon blank forms to be obtained at the office of said engineer, and be addressed to "West Chicago Park Commissioners," and indorsed as directed in the specifications. Each proposal must be accompanied with currency to the amount of five per cent. of the amount of bid, or certified check for the same amount drawn on a responsible bank doing business in the city of Chicago and made payable to the order of the West Chicago park commissioners.

No proposal will be considered unless the party offering it shall furnish evidence satisfactory to the West Chicago park commissioners of his or their ability, and that he or they have the necessary facilities, together with sufficient pecuniary resources to fulfill the conditions of the contract should it be awarded.

The West Chicago park commissioners reserve the right to reject any or all bids.

# The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

**CONTENTS.**

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. **A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

# MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world.

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive work for the busy workers in the engine room, boiler works and machine shops that has ever been published.

A well known engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

**Bullitt Building, . . Philadelphia.**

1896 1896

# Happy New Year and the Western Electrician...

**$3.00 FOR 52 NUMBERS.**

You cannot begin the New Year more auspiciously than by subscribing for the WESTERN ELECTRICIAN, America's leading electrical journal.

No matter what your connection with electrical industries, it will *help* you enormously, because you will know everything of interest that is going on in the field, all the new inventions practical applications, labor-saving devices, and general news.

THE WESTERN ELECTRICIAN is simply invaluable on account of its *practical* descriptive articles, copiously illustrated, by the leading writers and workers of the day.

A general manager of one of the great manufacturing companies recently summed it up when he wrote:

"As subscribers, advertisers and *readers of your most excellent journal* we take pleasure in stating that we have nothing but the *highest praise* for it."

Send us $3.00 and we will enter your name for one year's subscription.

**3 MONTHS TRIAL TRIP 50c.**

## Directory of Principal Electrical and Mechanical Engineers.

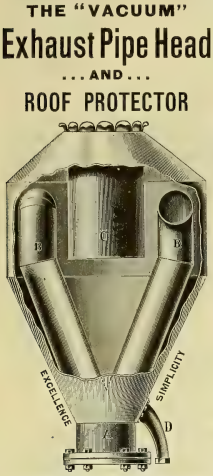
B. J. Arnold, Mem. A. I. E. E.
Consulting Electrical Engineer.
SPECIALTY:
Electric Railways and Power Stations.
1541 Marquette Bldg., Chicago.

William H. Bryan, M. Am. Soc. M. E.
Mechanical and Electrical Engineer.
Consultations, Reports, Estimates, Plans, Specifications, Superintendence, Tests, Purchasing.
Designs of Central Stations a Specialty.
Turner Building, St. Louis.

Forée Bain, Electrical and Mechanical Engineer.
Consulting, Designing, Supervising, Constructing, Testing.
Plans, Specifications and General Engineering.
Expert in Patent Causes.
Suite 1657, 1658 and 1659 Monadnock Building, CHICAGO.

W. H. Schott, E. E.,
Consulting and Contracting Eng'r.
Consulting, Specifications, Testing, Specialties. Electric Street Railways, Electric Lighting and Steam Plants installed Complete. Present properties looked over and improved.
Room 1628 Monadnock, CHICAGO.
Telephone Harrison 284.

THE "VACUUM"
Exhaust Pipe Head
...AND...
ROOF PROTECTOR



Is the Best in the World for Fast or Slow Speed Engines. Exhaust is Noiseless. Sent on Thirty Days' Trial. Write for Catalogue.

I. L. FAUCETT,
113 S. Fifth, - - - Quincy, Ill.
H. M. FIFE, St. Louis, Mo., Southern Agent.

Mechanical Engineers

who are interested in electricity should write for our catalogue of . . . . . .

ELECTRICAL BOOKS.

Electrician Publishing Company,
6 LAKESIDE BUILDING,
CHICAGO.

TAUGHT BY MAIL THOROUGH PRACTICAL
STEAM ENGINEERING
(Stationary, Locomotive or Marine); Mechanics; Mechanical Drawing; Electricity; Architecture; Architectural Drawing and Designing; Masonry; Carpentry and Joinery; Ornamental and Structural Iron Work; Railroad Engineering; Bridge Engineering; Municipal Engineering; Plumbing and Heating; Coal and Metal Mining; Prospecting, and the English Branches. Students make rapid progress in learning to Draw and Letter. The Steam Engineering course is intended to qualify engineers to secure Licenses. Send for free Circular, stating the subject you wish to study, to
The International Correspondence Schools, Scran'on, Pa.

GRAPHITE SPECIALTIES
FOR ELECTRICAL USES:
Graphite Rods of Various Lengths, from 1-5 Ohm to 100 Ohms Resistance to the inch. Graphite Boxes and Crucibles, Resisting Heats of 4,000 Degrees. Inquiries Gladly Answered.
JOS. DIXON CRUCIBLE CO., Jersey City, N. J.

If you want any Rope For Transmission of Power
WRITE TO US.
We have furnished Rope for some of the largest Drives in the country
H. CHANNON COMPANY,
24-26 Market St., CHICAGO.

The Haller Tube Cleaner
Sent to responsible parties on approval.
Return it if not found satisfactory.
STRONGEST, BEST, SIMPLEST.
Body is cast steel. Cutting wheels are best tool steel.
SET SCREW enables you to regulate the jaws.
All tube cleaners heretofore manufactured have had a spring to maintain the distance between the jaws, and when used in a tube and brought into contact with a place having an unusually heavy deposit of scale, these springs at once contracted, permitting the cleaner to pass over without removing it.
WRITE FOR DESCRIPTIVE CIRCULAR.
Manufactured by
THE McCLAIN MFG. CO.
First National Bank Building,
PITTSBURGH, - - - PA.

Price Reduced!
THE NEW EDITION OF
Prof. Silvanus P. Thompson's Book,
Dynamo Electric Machinery,
NOW $6.00.
New Edition, Revised and Greatly Enlarged, Price $6.00.
This is the long expected edition of Prof. Thompson's standard work. It contains nearly 1,000 pages, and is profusely illustrated.
Orders should be sent in at once.
Sent, postage prepaid, to any address on receipt of price.
ELECTRICIAN PUBLISHING CO.,
6 Lakeside Building, CHICAGO, ILL.

New Dynamo Tenders' Hand-Book.
By F. B. BADT.
226 Pages, 140 Illustrations. Flexible Cloth Binding. Size of Type Page 5 1-2x3 inches. Price $1.00.
This is, as the name indicates, a NEW BOOK, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 9,000 copies of the old Dynamo Tenders' Hand-Book sold, and over 5,000 of the new.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produce a greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.17 | 141.38 | 205.27 | 79.76 |
| ¾ " | 16.42 | 122.06 | 127.18 | 195.19 | 84.58 |
| ½ " | 16.78 | 117.32 | 112.60 | 173.74 | 82.18 |
| ⅜ " | 17.03 | 111.8 | 98.12 | 149.99 | 79.11 |
| ¼ " | 16.86 | 118.67 | 82.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.33 | 128.60 | 174.18 | 199.56 | 80.80 |
| ¾ " | 16.56 | 124.80 | 120.85 | 138.14 | 83.0 |

## COMMERCIAL ELECTRICAL SUPPLY COMPANY

821 Pine Street, St. Louis.

**For Electrical Goods.**

# The S. K. C. Two Phase Alternating Current System.

THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents** Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.

# STANLEY ELECTRIC MANUFACTURING CO.,

PITTSFIELD, MASS.

WESTERN OFFICE, 305 DEARBORN STREET, CHICAGO, ILL.

The Royal Electric Co., Montreal, Can., are exclusive licensees for the manufacture of the S. K. C. System in the Dominion of Canada.

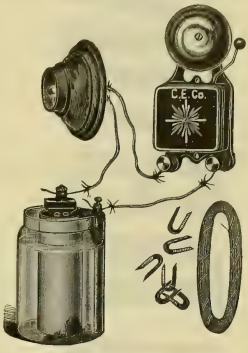
## Made on the □

# The Extra Best Bell (Extra B. B.)

Let us run down the list of good things that can be said of the **"Extra B. B."**

1. It is well made mechanically.
2. Pure platinum contacts. Honor bright!
3. Binding posts set in a square hole, **tight.**
4. Contact post fixed same way. Can't get nervous and point in the wrong direction.
5. When you adjust the bell to suit your battery it stays there.
6. Armature will not stick.
7. Gets full benefit of both pole pieces.
8. Clapper will not drop off.
9. Cover snaps on. No screw to lose.
10. One dollar will buy more of these bells than any other **equally as good.**



P. S.—This cut does not correctly illustrate the bell we are writing about. We will show a correct photograph a little later, **but the bell is all right.**

**BRANCHES:**
ST. LOUIS: Southern Electrical Supply Co.
KANSAS CITY: Gate City Electric Co.
NEW ORLEANS: 1010 Canal Street.
BUFFALO: 112 White Building.

**Central Electric Company,**

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO., of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**
**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**
**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1892.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{2}$% per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

The REPUTATION which the EXCELLENCE of our ELECTRICAL Apparatus has given us throughout the world, is the guarantee of the perfection of the G. E. WIRES AND CABLES upon which purchasers can rely.

G. E. DOUBLE RUBBER CORE WIRE with INSULATION of the best material, FREE FROM SHODDY, is unequaled for ordinary INCANDESCENT LIGHTING, STREET RAILWAY, PRIMARY ALTERNATING, ARC LIGHT AND POWER TRANSMISSION CIRCUITS. It is made with four insulations to withstand 500, 2,000, 4,000 and 8,000 volts respectively.

G. E. WIRES AND CABLES are in use in the greatest Lighting and Railway installations in this country and the ENTIRE OUTPUT OF THE NIAGARA STATION is carried over them.

**WANTED.**

**An Excellent Opportunity for a Young Man!**

The advertiser controls valuable electric heating patents and irons, soldering outfits, etc.) and wants a young man, electrically educated and with some capital, to join him in pushing the electrical heating business already organized and established and with good orders on hand. A salary would be paid and young man and advertiser (business man) can control this business. Address "**Heater,**" care WESTERN ELECTRICIAN.

## WANTED.

Electrical Engineer of practical experience and ability is open for engagement. Designing of generators and motors, draughting and testing. Thoroughly conversant with mechanical details and can give the best satisfaction in these lines.

"**Experience,**" care WESTERN ELECTRICIAN.

## WANTED.

Position by young man having had experience with electrical machinery and wiring; also understands the care of steam engines and boilers, and can give good references. Address "**B.**" care WESTERN ELECTRICIAN, 6 Lakeside Bldg., Chicago.

## WANTED.

A first-class, intelligent electrical superintendent capable of making plans, securing contracts, and superintending the general electrical construction work of the construction department of an Electrical Supply House. Must be capable, active and able to figure carefully and correctly. Eventually might become interested in one of the largest and most successful Electrical Supply Houses in the West. Address

"**ELECTRICAL CONSTRUCTION,**"
Care of WESTERN ELECTRICIAN,
CHICAGO, ILL.

## WHO BIDS?

A Water and Electric Light Plant in good little Wisconsin town wants a sober, married, industrious engineer, who knows how to tend engines, boilers and dynamos, and who can assist in wiring if necessary. If references are right and price right, steady job can be had. Midnight lighting. Address, **X. Y. Z.,** Care of WESTERN ELECTRICIAN.

## FOR SALE,

Cheap, drawings, specifications and all data for the construction of dynamos and motors of any capacity or voltage desired. Address

F. J. CROSS, E. E., Niagara Falls, N. Y.

## PROPOSALS FOR LIGHTING THE CITY OF KEOKUK, IOWA, WITH ELECTRICITY.

Sealed bids will be received by Sumner T. Bisbee, clerk of the council of the city of Keokuk, Iowa, until 12 o'clock noon of Friday, February 21, 1896, for lighting the city of Keokuk with 110, more or less, arc lights, in accordance with specifications now on file with, and copies of which can be had of, Sumner T. Bisbee, clerk of council of Keokuk, Iowa.

Said contract to be for the term of five years, from and after May 3, 1896.

Said bids to be opened and acted upon at a special meeting of the council to be held Friday, February 21, 1896, at 7:30 p. m.

The council reserves the right to reject any or all bids.

SUMNER T. BISBEE,
Clerk of Council.

January 25, 1896. Keokuk, Iowa.

## SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

## Connecticut Telephone... ...and Electric Co.,

**MERIDEN, CONN., U. S. A.**

## The Haller Tube Cleaner

**Sent to responsible parties on approval.**
**Return it if not found satisfactory.**

**STRONGEST, BEST, SIMPLEST.**

**Body is cast steel. Cutting wheels are best tool steel.**
**SET SCREW enables you to regulate the jaws.**

All tube cleaners heretofore manufactured have had a spring to maintain the distance between the jaws, and when used in a tube and brought into contact with a place having an unusually heavy deposit of scale, these springs at once contracted, permitting the cleaner to pass over without removing it.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

**PRICE, $2.00**

By mail, postpaid, to any part of the world.

This book, while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches ......... .....$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches ....... .......................$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition; three thousand copies. 97 pages, 22 illustrations, 27 original tables..... .............. ................$1.00

Gives more *Practical* information on the subject than any work published to date The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

The Electric Motor and Its Applications.
BY T. C. MARTIN AND JOSEPH WETZLER.
*THIRD EDITION.*
With an Appendix by Dr. Louis Bell, bringing the book down to date.
*Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.*

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

CONTENTS.

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in American.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation.—Chapter XI. Telpherage.—Chapters XII, XIII. Latest American Motors and Motor Systems.—Chapter XIV. Latest European Motors and Motor Systems.—Chapter XV. Alternating Current Motors.—Chapter XVI. Thermo-magnetic Motors.—Appendix. The Development of the Electric Motor since 1888.

*Copies of this or any other electrical book published will be sent by mail,* POSTAGE PREPAID, *to any address in the world, on receipt of price.*

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—June 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.37 | 141.58 | 393.27 | 79.76 |
| ¾ " | 16.42 | 122.00 | 127.18 | 395.19 | 82.58 |
| ½ " | 16.75 | 117.50 | 112.60 | 376.74 | 82.18 |
| ¼ " | 17.03 | 111.85 | 98.12 | 349.99 | 79.31 |
| ⅛ " | 16.88 | 118.67 | 82.07 | 318.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.33 | 128.00 | 134.18 | 399.56 | 80.50 |
| ¾ " | 16.56 | 134.80 | 130.83 | 388.14 | 83.09 |

Trade ROLL-DROP Mark.

COMMUTATOR BARS.

FOREST CITY ELECTRIC WORKS, CLEVELAND, OHIO.

Western Office: 1439 Monadnock Blk., CHICAGO.

HELMET BRONZE

Charles H. Besly & Co.

FINE TOOLS

SUPPLIES FOR MFRS. METAL WORKERS ETC.

Chicago, Ill. U.S.A.

Thousands of our Cells are in Service in U.S. and Abroad....

STORAGE BATTERIES FOR ALL PURPOSES

Solid Rolled Lead Plate. Immense Strength. Large Surface.

Electro-Chemical Formation of Active Material.

INSURING GREATEST DURABILITY COMBINED WITH EFFICIENCY.

—ALL SIZES FOR SALE BY—

Established 1889. Highest Award Granted at World's Columbian Exposition, Chicago, 1893.

American Battery Company, 42 West Quincy Street, CHICAGO, ILL.

Absolutely Non-Infringing. Protection Guaranteed to all Purchasers.

Sectional view of plate.

VULCANIZED FIBRE CO. ESTABLISHED 1878.

SOLE MANUFACTURERS OF HARD VULCANIZED FIBRE

In Sheets, Tubes, Rods, Sticks, and Special Shapes to order. Colors, Red, Black and Gray. Send for Catalogue and Prices.

FACTORY: WILMINGTON, DEL. The Standard Electrical Insulating Material of the World. OFFICE: 14 DEY ST., NEW YORK.

Black Diamond File Works.

Est. 1863. Inc. 1895.

We make any kind of File or Rasp known to the File Trade.

Prompt attention to special work.

Files made to order to suit any purpose.

Our regular goods are on sale in every leading Hardware Store in the United States and Canada.

G. & H. BARNETT COMPANY,

Philadelphia, Pa.

PORCELAIN MANUFACTORY.

Empire City Works. 114-126 GREENE ST. STATION C

GENUINE HARD PORCELAIN CUT-OUTS, SWITCH BASES, INSULATORS &C. BROOKLYN, N.Y.

MEDBERY SWITCHES

15 TO 600 AMPERES.

Our Pony Switch is the only absolutely reliable Switch made.

SELLING AGENTS:

MASON ELECTRIC EQUIPMENT CO., CHICAGO, ILL.

A. W. SOLOMON, Savannah, Ga. HOEFGEN, MOXHAM & CO., No. 89 William St., New York. JOSHUA HENDY MACH. WORKS, San Francisco, Cal.

Manufactured by THE FIBERITE CO., Mechanicville, N. Y.

Electric Lighting and Power Apparatus.

THE BRUSH ELECTRIC CO.,

The Brush Double Arc Lamp Patents sustained by repeated decisions of U. S. Courts.

Agencies in all large cities. The Russell Electric Company, Denver, Colo. Bignall & Hills, Yokohama, Japan.

Office and Works, Cor. Belden and Mason Sts., CLEVELAND, OHIO

# Western Electrician.

$3 per Annum. Copyrighted, 1896, by Electrician Publishing Company, Chicago. EVERY SATURDAY. Entered at Chicago Postoffice as mail matter of the second class. 10 cents per Copy.

Vol. XVIII. CHICAGO, FEBRUARY 15, 1896. No. 7

**SIMPLEX** INSULATED WIRES AND CABLES.

RUBBER COVERED, WEATHERPROOF, UNDERGROUND and SUBMARINE.

WESTERN SELLING AGENT. H. R. HIXSON, 1137 Monadnock Block, CHICAGO.

Simplex Electrical Company, 75-81 Cornhill, BOSTON, MASS.

ALFRED F. MOORE.

MANUFACTURER OF

INSULATED ELECTRIC WIRE, FLEXIBLE CORDS and CABLES.

206 and 208 North Third Street. - - PHILADELPHIA, PA.

**INSULATED WIRES AND CABLES**

Aerial, Underground and Submarine, For TELEPHONE, TELEGRAPH, LIGHT and POWER.

Lead encasing in all its Branches.

DAYS TERITE

KERITE TAPES.

W. R. BRIXEY, Mfr., J. E. HAM, Gen'l Agt., 203 Broadway, New York.

S. F. B. MORSE, Chicago, Ill.

CALIFORNIA ELECTRICAL WORKS, San Francisco, Cal.

NEW ORLEANS ELECTRIC CO., New Orleans, La.

WILLARD L. CANDEE, H. DURANT CREVERE, Business Managers. GEO. T. MANSON, Gen'l Supt. W. H. HODGINS, Secretary.

**THE OKONITE COMPANY, LIMITED,**

13 Park Row, New York.

OKONITE TRADE MARK.

INSULATED WIRES AND CABLES.

For Aerial, Submarine and Underground Use.

Candee Aerial Wires. Manson Protecting Tape. Okonite Waterproof Tape.

BRANCHES: Chicago, Boston, Philadelphia, Pittsburgh, Minneapolis, Cincinnati, Kansas City, Omaha, Louisville, St. Louis, San Francisco, London and No. America.

PARTRIDGE SELF LUBRICATING MOTOR BRUSH

OFFICE AND FACTORY, SANDUSKY O.

### BUSINESS SHOULD IMPROVE.

It now is in order to expect a marked improvement in business conditions as a result of the success of the popular loan. The people have demonstrated in a practical way that they wish to have the parity preserved, and any doubts that may have existed in regard to that are removed by the offer to furnish between five and six times as much gold as was called for by the government. So there is the best of reason for confidence in the stability of the money unit, spite of all that the free silver extremists may or can do. Not only that, but the abundance of offerings indicates the existence of so much surplus gold that its payment into the Treasury will not necessitate any of the contraction of credits which some feared would be the result. The business current can flow along smoothly without any interruption. There is money enough for all legitimate operations and sufficient wealth of movable property to render it safe to grant all the credits needed to a considerable expansion of manufacturing and commercial activity.

The investment of capital in business enterprises has been discouraged in the recent past by more or less of apprehension that money returned might not be as good in buying power as that lent out or invested in goods to be sold on credit. There was no little domestic hesitancy on this point, and fears of stringency due to withdrawals of foreign capital tended much to restrict the volume of home business apart from what our own citizens might think on the subject. Now it is probable that foreign capital will be offered more freely, its volume available here being increased instead of diminished, and this feeling should make the domestic money market easier. The man who has money to lend at interest not only will have no fear of losing half of it by enforced shrinkage of the currency unit, but will cease to dread the trouble arising from its unprofitable employment by the borrower. Similarly the greater feeling of security may be expected to make the captains of commerce and industry more willing to hire the use of capital because of the better prospect for making a profit out of it, thus directly benefiting the working classes by finding them more to do, tending to increase their remuneration and enabling them to increase the demand for other labor.

The first half of February usually is the flattest time of the year in the labor market. It normally marks the minimum of work to be done, the lowest prices in the markets for the cereals, the offering at reduced figures of unsold manufactured goods that had been taken in stock for the winter trade. It was the time of greatest depression in the wages of labor in this and other cities after the panics of 1893. Other conditions not forbidding, there always is room to look for improvement soon after this date in the year. The satisfactory settling of affairs in the money situation gives additional reason to expect this improvement for 1896. From this time on there should be a marked widening in the demand for labor and its products, marking the advent of better industrial and commercial conditions and greater comfort to the people as a whole.—*Chicago Tribune.*

A writer in the Pittsburg *Dispatch* suggests that the construction of battle-ships and great guns be stopped, and reliance placed in the electrical explosion of nitro-glycerine in great quantities. He says that 100 barrels of the substance, placed, at a cost of $20,000, in a tank on a small light vessel, and exploded at any given point on the water, would have deadly effect within a circle of four miles radius, the atmospheric pressure combined with the enormous resulting wave insuring the destruction of every floating thing.

# NOTICE.

The Siemens & Halske Electric Co. of America, among numerous patents, owns United States patent No. 417,668, Dec. 17, 1889, on what is usually termed

## "THE DIRECT-CURRENT BOOSTER."

Both in central lighting stations and railway stations, where a large amount of current has to be transmitted to points at considerable distances from the power house, it becomes absolutely necessary to adopt some means of cutting down the enormous amount of copper needed if this part of the system is to be practical from a financial standpoint.

American Electrical Engineers have not been slow in recognizing this fact, and they have availed themselves in many instances of the direct-current "Booster" system.

To take an actual case: In laying out a feeder system in a certain city it was found that several of the lines extend from 5 to 7 miles from the station, and have a very large summer excursion travel to the parks located at the ends. To handle this occasional load satisfactorily by the direct-feeder system at such distances would have required an enormous outlay of copper. A direct-current "Booster" solved the problem satisfactorily at a small cost. J. B. Scott, in a paper published in the "Street Railway Review" for January, shows, for instance, that to feed 675 amperes 7 miles about $65,000 worth of copper may be saved by employing a "Booster."

The Siemens & Halske Electric Co. of America absolutely control this fundamental "Booster" patent, and two wealthy electric illuminating companies in two of the principal cities of the United States, after thorough investigation, have already acknowledged the validity of this patent and made arrangements to operate "Boosters" under a license from the Siemens & Halske Electric Co. All users of this system are again warned, as they will be prosecuted unless they make amicable adjustment.

The Siemens & Halske Electric Co. are prepared to furnish the necessary apparatus and license customers under the patent mentioned above, and will be pleased to communicate with prospective customers concerning licenses under any of the numerous patents which it owns.

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO. of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**
**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**
**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1892.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{2}$% per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**

**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

## The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

**CONTENTS.**

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in American.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation. Chapter XI. Telpherage.—Chapters XII, XIII. MANUFACTURERS OF THE

## Standard Loud-Speaking, Long-Distance and Exchange Telephone.

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

## Standard Telephone Exchange Switchboards

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

## A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.

# MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

# AJAX

## ARC LAMPS.

The Ajax lamp is new and **up-to-date.** It burns steadily because the "kinks" have been omitted in its construction. This also means a simple and cheap lamp. Ask about it and learn what **"up-to-date" means.**

C. S. VAN NUIS, 136 Liberty Street NEW YORK.

# The S. K. C. Two Phase Alternating Current System.

THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work: in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—**Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.**

# STANLEY ELECTRIC MANUFACTURING CO.,

PITTSFIELD, MASS.

**WESTERN OFFICE, 305 DEARBORN STREET, CHICAGO, ILL.**

The Royal Electric Co., Montreal, Can., are exclusive licensees for the manufacture of the S. K. C. System in the Dominion of Canada.

CHICAGO, 305 Dearborn St., Wallace & Hine, Managers.

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO.** of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.
**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**
**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1895.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{100}$ per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

## THE HESS STORAGE BATTERY CO., 246 ARCH STREET, PHILADELPHIA, PA.

## THE G. E. WIRES AND CABLES

Are manufactured at OUR OWN works at Schenectady, N. Y.

The REPUTATION which the EXCELLENCE of our ELECTRICAL Apparatus has given us throughout the world, is the guarantee of the perfection of the G. E. WIRES AND CABLES upon which purchasers can rely.

G. E. DOUBLE RUBBER CORE WIRE with INSULATION of the best material, FREE FROM SHODDY, is unequaled for ordinary INCANDESCENT LIGHTING, STREET RAILWAY, PRIMARY ALTERNATING, ARC LIGHT AND POWER TRANSMISSION CIRCUITS. It is made with four insulations to withstand 500, 2,000, 4,000 and 8,000 volts respectively.

G. E. WIRES AND CABLES are in use in the greatest Lighting and Railway installations in this country and the ENTIRE OUTPUT OF THE NIAGARA STATION is carried over them.

G.E. WIRES

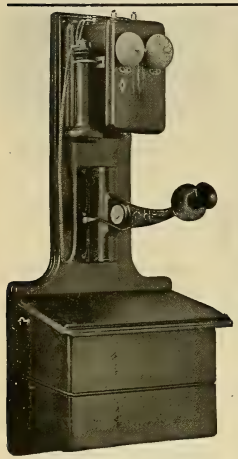
Send us your orders and they will be promptly filled.

## Electric Engineering & Supply Co.,

**SYRACUSE, N. Y.**



## SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Bickmas, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

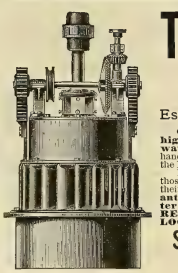
Works, Racine, Wis. CHICAGO, ILL., U. S. A.



# THE McCORMICK TURBINE,

On Vertical or Horizontal Shaft,

Especially Adapted for Electric Work.

**Gives more power as to diameter with a higher percentage of useful effect than any other water-wheel heretofore made.** All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with me, **as I am willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.**

**S. MORGAN SMITH, York, Pa.**

Estimates furnished for complete power plants and results guaranteed.

Manufacturers of the
Morrin "Climax" and "Compound" Safety Water Tube Boilers.
BUILT IN UNITS OF 50 TO 1,000 H. P.
ALSO BUILDERS OF
Smoke Stacks, Tanks, Etc., and All Classes of Iron Work.
Specifications, drawings and Prices furnished on application.
Send for Catalogue of Climax and Compound Boilers.

HEATING BY EXHAUST STEAM,
Without Back Pressure,
BY THE VACUUM SYSTEM.

. . . ADVANTAGES . . .

1st.—Can be attached to existing plants at little expense.

2nd.—Effects greatest efficiency from the heating surface by the removal of the water and air, preventing water hammer and stagnant circulation.

3rd.—Saves coal by removal of back pressure from engines; water of condensation, etc.

We are owners of the patent and have equipped the largest plants in the United States, over 500 now in use. Will visit your plant and tell you how much we can benefit you, if you so desire. Send for catalogue P.

Send 10 cents for a copy. Liberal discount if large quantities are ordered.

# ELECTRICIAN PUBLISHING CO.,

**6 LAKESIDE BUILDING, CHICAGO,**

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations........$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations........$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages........$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition........$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition........$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches........$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches........$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables........$1.00

Gives more *Practical* information on the subject than any work published to date The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations........$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth........$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth........$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone........$0.50

**Bottone, S. R.**—The Dynamo. How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations........$1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to........$0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers........$0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth........$2.00
Paper........1.00

**Cox, Frank P.**—Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated........$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged........$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways, Second edition, revised and enlarged. 183 illustrations........$2.50

**Desmond, Chas.**—Electricity for Engineers Part I. Constant Current. A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition........$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards........$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations........$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition........$3.00

Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.

Vol. II. The Utilization of Induced Currents, 8vo, cloth. London, 1892........$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition........$2.00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations........$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised..$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations........$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations........$3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions........$1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated........$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy........$0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs, Translated from the French. With additions by C. J. Wharton. With illustrations........$2 50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations........$5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivison and Distribution. A practical handbook. Third edition........$3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated.$0.50
[Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated........$1.00

**Kapp, Gisbert.**—Dynamos, Alternators and Transformers. 138 illustrations........$4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892........$7.25

In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather........$1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations........$2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

**Lockwood, T. D.**—Practical Information for Telephonists. 12mo, cloth. N. Y........$1.00

**Meadowcroft, W. H.**—The A. B. C. of Electricity. 36 Illustrations........$0.60

**Martin, T. C.**—Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 500 pp. 300 Illustrations, second edition........$4.00

**Martin, T. C. and Wetzler, J.**—The Electric Motor and its Applications. Third edition. With an Appendix on the Development of the Electric Motor since 1888. By Dr. L. Bell. 300 Illustrations........$3.00

**Maver, and Davis, M. M.**—The Quadruplex. With Chapters on the Dynamo-Electric Machine in Relation to the Quadruplex. The Practical Working of the Duplex Telegraph Repeaters and the Wheatstone Automatic Telegraph. 63 illustrations........$1.50

**McClure, J. B.**—Edison and his Inventions, with Full Explanations of the Telephone, Phonograph, Tasimeter, Electric Light and all his Principal Discoveries, etc..$1.00

**Niaudet, Alfred.**—Elementary Treatise on Electric Batteries, Translated from the French by L. M. Fishback. Illustrated........$2.50

**Noll, Augustus.**—How to Wire Buildings. A manual of the art of interior wiring. Illustrated........$1.50

**Pope, Franklin Leonard.**—Modern Practice of the Electric Telegraph. A technical Hand-book for Electricians, Managers and Operators. 185 illustrations. 14th edition, rewritten and enlarged........$1.50

**Prindle, H. B.**—A Popular Treatise on the Electric Railway of to-day. Fully illustrated........$0.25

**Russell, Stuart A.**—Electric Light Cables and Distribution of Electricity. 107 illustrations........$2.25

**Salomons, Sir David.**—Electric Light Installations. Vol. 1. The Management of Accumulators. A Practical Handbook. 7th edition, revised and enlarged. With illustrations. 12 mo, cl. London, 1893........$1.50

**Sloane, T. O'Conner.**—Electricity Simplified. The Practice and Theory of Electricity, including a Popular Review of the Theory of Electricity, with Analogies and Examples of its Practical Application in every-day life. Illustrated........$1.00

**Sloane, T. O'Connor.**—The Standard Electrical Dictionary. A Popular Dictionary of Words and Terms used in the practice of Electrical Engineering, 350 illustrations.$3.00

**Sloane, T. O'Connor.**—Electric Toy Making for Amateurs, including Batteries, Magnets, Motors, Miscellaneous Toys........$1.00

**Sloane, T. O'Connor.**—The Arithmetic of Electricity. A Manual of Electrical Calculations by Arithmetical Methods, including numerous rules, examples and tables in the field of practical electrical engineering and experimenting. Third edition, revised........$1.00

**Tesla, Nikola.**—Experiments with Alternate Currents of High Potential and High Frequency. A lecture delivered before the Institution of Electrical Engineers, London. With a portrait and biographical sketch of the Author Illustrated........$1 00

**Tesla, Nikola.**—Lectures on the Electro-Magnet. Illustrated........$1.00

**Thurston, Prof. R. H.**—Stationary Steam Engines, especially adapted to Electric Lighting Purposes. Treating of the development of Steam Engines, the Principles of Construction and Economy, with description of Moderate and High Speed Engines. With many folding plates........$1.50

**Thomson, Prof. Elihu.**—What is Electricity? Illustrated.$0.25

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. A Series of Lectures, with an introduction by Franklin L. Pope. 16mo. Numerous illustrations, fancy boards (Van Nostrand's Science Series, No. 66)........$0.50

**Thompson, Sylvanus P.**—Polyphase Electric Currents and Alternate-Current Motors. Mailed to any address in the world on receipt of........$3.50

**Thompson, Sylvanus P.**—Recent Progress in Dynamo-Electric Machines, being a Supplement to Dynamo-Electric Machinery. 16mo. (Van Nostrand's Science Series, No. 75)........$0.50

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. Fourth edition, revised and rewritten. Numerous illustrations and 29 plates. 1,000 pages........$6 00

**Trevert.**—How to Make Electric Batteries at Home. Illustrated........$0.25

**Urquhart.**—Electro-Plating. A Practical Hand-book on the Deposition of Copper, Silver, Nickel, Gold, Aluminum, Brass, Platinum, etc. Second edition; carefully revised, with additions........$2.00

**Walker, F.**—Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous illustrations. 16mo, boards. (Van Nostrand's Science Series, No. 98).$0.50

**Webb, H. L.**—A practical Guide to the Testing of Insulated Wires and Cables. Illustrated........$1.00

**Webb, Herbert Laws.**—Telephone Hand-book, Illustrated. 12mo, cloth. Chicago, 1895........$1.00

The only complete work on the Telephone. All possible information for any one interested in Telephones and how to make and operate them.

# Ship Carbons

Made in Vienna by

## SCHIFF, JORDAN & CO.

Sole Agents in the U. S. and Canada,

# THE STANDARD PAINT CO.

RALPH L. SHAINWALD, *President.* **"P. & B."** FRANK S. DeRONDE, *General Sales Agent.*

## 2 Liberty St., New York.

Don't bother with the cheap, worthless carbons with which the market is flooded. Use the best, "Ship." Let us estimate on your Carbons. Dealers and others interested should write us. Do it now.

**After April 15 P. & B. and Ship Carbon Headquarters will be 79 and 81 John St., New York.**

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO., of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**
**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**
**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,290, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1892.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

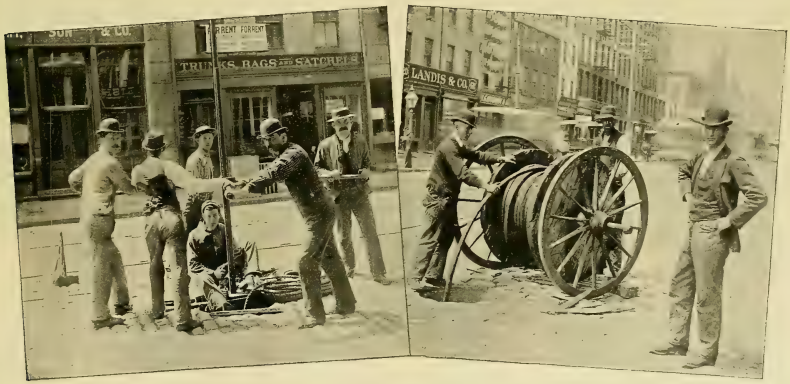
**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{10}$ per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

## THE HESS STORAGE BATTERY CO., 246 ARCH STREET, PHILADELPHIA, PA.

# The National Underground Cable Co.

**Times Building, New York. Rookery, Chicago. Betz Building, Philadelphia, Ames Building, Boston.**



This company is controlled by and is the associate of the National Conduit Manufacturing Company, and is manufacturing the well-known Norwich Paper Insulated Wires and Lead Sheathed Cables for all purposes; Electric Light, Street Railway, Telephone and Telegraph. All cables and wires guaranteed. High Potential Conductors a Specialty.

THE
# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

BRANCH OFFICE:

1649, 1650, 1651 MONADNOCK BLDG.,
CHICAGO, ILLINOIS.

In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting Batteries.

*Illustrated with Twenty-two Diagrams.*

By WILLIAM A. WITTBECKER.

**Price in Paper, 25 Cents.**
**Price in Cloth, 50 Cents.**

THE growing demand for simple electrical apparatus in dwelling houses, offices and workshops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.

The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described

**A Treatise on Electro-Magnetism.**
By D. E. Connor, C. E. This is a very interesting book which everybody should read. Cloth. 50 cents.

**How to Make & Use the Storage Battery.**
By P. B. Warwick. Illustrated with full working drawings, including directions for installing and maintaining Storage Battery Plants. Price, $1.50.

**How to Build Dynamo-Electric Machinery.**
A complete and practical work on this subject, 350 pages, numerous illustrations. By Edward Trevert. With working drawings. $2.50

**Questions & Answers about Electricity.**
A first book for students. Theory of electricity and magnetism. Edited by Edward T. Bubier, 2d. Cloth, 12mo. 50 cents

**Experimental Electricity.**
By Edward Trevert. Tells how to make batteries, bells, dynamos, motors, telephones, telegraphs, electric bells, etc. A very useful book, finely illustrated. Cloth. Price, $1.00

**How to Make and Use a Telephone.**
By Geo. H. Cary, A.M. A thorough and practical work on this subject. Cloth, illustrated. Price, $1.00

**Arithmetic of Magnetism & Electricity.**
Up to date. The latest and best book on the subject. Now ready. By John T. Morrow, M. E., and Thorburn Reid, M. E., A. M., Associate Members, American Institute of Electrical Engineers. $1.00

**Electricity for Students.**
By Edward Trevert. Fully illustrated. Bound in a neat cloth binding. Price, Postpaid, $1.00

**How to Build A Fifty Light Dynamo**
Or Four H. P. motor, By A. E. Watson. Cloth. Price, 50 cents.

**Armature and Field Magnet Winding,**
By Edward Trevert, giving both the theory and practical directions for winding dynamos and motors. Cloth. Price, $1.50.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.17 | 141.58 | 305.27 | 79.76 |
| ¾ " | 16.42 | 122.00 | 127.18 | 193.19 | 81.58 |

## Gordon Primary Battery

**EXCELS IN**

Long Life, Efficiency,
Economy, Adaptability.
It is Absolutely Non Freezing,
Labor Saving,
Free from Local Action,
Freedom from Gases and Odors.
Superior Generation of Energy.

These Batteries are in use by the most prominent Telephone, Fire Alarm and Railroad Companies of America.
Send for descriptive circular and price list. We guarantee all our Cells.

MANUFACTURED BY

**The Gordon-Burnham Battery Co.,**
**82 West Broadway, New York.**

---

**ELECTRIC LAMP SIGNS....**

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another.
We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

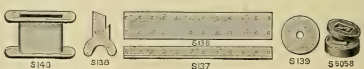
**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**
American Tract Society Building, NO. 150 NASSAU STREET, NEW YORK.

---

## VULCABESTON CONTROLLER PARTS.



All Controllers are Insulated with Vulcabeston.

**G. E. 800 and Westinghouse Commutator Rings, Brush Holder Bushings and Field Spools.**

**SEND FOR PRICE LIST.**

Moulded Mica Trolley Insulating Materials, Frogs, Crossings, Tree Insulators, Weatherproof Sockets, etc.

**H. W. JOHNS MFG. CO.,**

173-175 Adams Street

Chicago

CENTRAL STATION SUNDRIES.

ELECTRIC RAILWAY MATERIAL.

# Wholesale ...and Retail ELECTRICAL SUPPLIES

## .....EXCLUSIVELY.....

NOTE.—We do no construction work of any description, therefore do not come in conflict with our patrons in any manner. No doubt contractors and others who have found themselves bidding against their source of supplies will appreciate our unique position.

::: BRANCHES :::

Southern Electrical Supply Co., ST. LOUIS, MO.

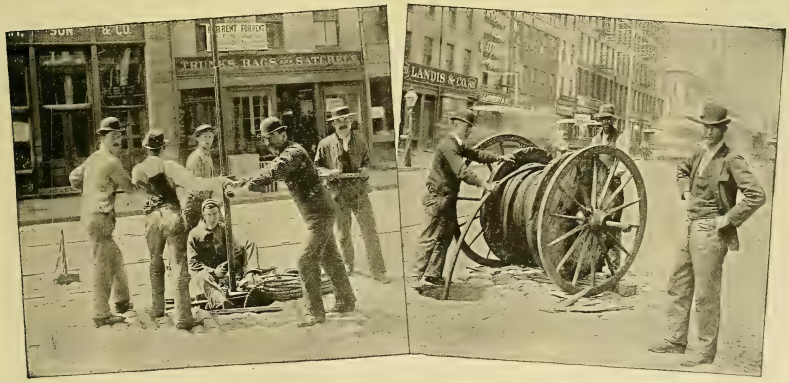
Gate City Electric Co., Kansas City, Mo.

New Orleans: 1010 Canal Street.

Buffalo: 112 White Building.

# The National Underground Cable Co.

Times Building, New York. Rookery, Chicago. Betz Building, Philadelphia, Ames Building, Boston.



This company is controlled by and is the associate of the National Conduit Manufacturing Company, and is manufacturing the well-known Norwich Paper Insulated Wires and Lead Sheathed Cables for all purposes; Electric Light, Street Railway, Telephone and Telegraph. All cables and wires guaranteed. High Potential Conductors a Specialty.

Write for further information to New York office.

THE MARQUETTE BUILDING.

# WE ARE GOING TO MOVE.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce our removal from 6 Lakeside Building to . . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices will not only be very handsome and thoroughly well equipped with all modern appointments and conveniences, but they will occupy nearly **twice the space of our old quarters.** . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities, even more perfect attention than in the past. . . . . .

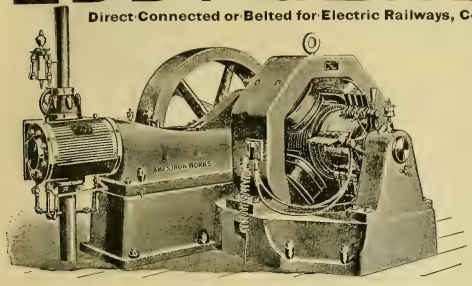
## Electrician Publishing Company,

SUITE 510 MARQUETTE BUILDING,

...CHICAGO...

# EDDY GENERATORS.

**Direct-Connected or Belted for Electric Railways, Central Stations, Isolated Lighting or Power Plants.**



**Eddy Motors—Slow, Medium or High Speed.**

**We build all necessary apparatus for the transmission of Electrical Power through factory or other buildings.**

## The Eddy Electric Mfg. Co.,

**WINDSOR, CONN.**

NEW YORK, H. B. Coho & Co., Mail and Express Building.
PHILADELPHIA, Walter C. McIntire & Co., 506 Commerce St.
BOSTON, G. M. Angier & Co., 64 Federal St.

ST. LOUIS, Western Electrical Supply Co.
KANSAS CITY, W. T. Osborn.
CINCINNATI, O., Nevada Bldg., John A. Stewart.
CHICAGO, 305 Dearborn St., Wallace & Hine, Managers.

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**

**THE HESS STORAGE BATTERY CO., of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**

**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**

**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1892.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{100}$ per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

## THE HESS STORAGE BATTERY CO., 246 ARCH STREET, PHILADELPHIA, PA.

**No. 1 Plate for 5 and 10 Amp. Hart Switches.**

# HART FLUSH SWITCHES.

New Face Plate.

## BETTER PROPORTIONS. BETTER FINISH. MORE DURABLE.

Made of solid plate brass $\frac{1}{8}$-inch thick, with beveled edges.

Better Design,
Better Material,

Self-Adjusting Handle,
No Breaking,

No Binding on Face Plates,
No Loose Face Plates.
Handles, Switches and Face Plates Interchangeable.

Single Plates for all sizes of Hart Switches.
Gang Plates for any number of Hart Switches.

**SEND FOR "CATALOGUE B."**

## THE G. E. WIRES AND CABLES

Are manufactured at OUR OWN works at Schenectady, N. Y.

The REPUTATION which the EXCELLENCE of our ELECTRICAL Apparatus has given us throughout the world, is the guarantee of the perfection of the G. E. WIRES AND CABLES upon which purchasers can rely.

G. E. DOUBLE RUBBER CORE WIRE with INSULATION of the best material, FREE FROM SHODDY, is unequaled for ordinary INCANDESCENT LIGHTING, STREET RAILWAY, PRIMARY ALTERNATING, ARC LIGHT AND POWER TRANSMISSION CIRCUITS. It is made with four insulations to withstand 500, 2,000, 4,000 and 8,000 volts respectively.

G. E. WIRES AND CABLES are in use in the greatest Lighting and Railway installations in this country and the ENTIRE OUTPUT OF THE NIAGARA STATION is carried over them.

G.E. WIRES

G.E. CABLES

HIGHEST CONDUCTIVITY. HIGHEST INSULATION.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

## SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

# The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

## CONTENTS.

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in America.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation.—Chapter XI. Telpherage.—Chapters XII, XIII. Latest American Motors and Motor Systems.—Chapter XIV. Latest European Motors and Motor Systems.—Chapter XV. Alternating Current Motors.—Chapter XVI. Thermo-magnetic Motors.—Appendix. The Development of the Electric Motor since 1888.

**WINTER TOURS TO CALIFORNIA**

In Private Pullman Palace Cars.

The Burlington Route (C. B. & Q. R. R.) announce three personally conducted tours to California. Leave Chicago January 9, Feb. 6, March 5. The route will be via San Antonio, Tex., El Paso, Los Angeles, San Diego, Santa Barbara, San Francisco, Del Monte and San Jose. Returning via Salt Lake and Rio Grande Scenic Route through Colorado. The price of a ticket includes all necessary expenses. Railroad and sleeping car fare, Hotel Bills, carriage rides, side trips, etc. The service will be strictly first-class in every respect. For pamphlet giving particulars, see any agent of the C. B. & Q. R. R., or write to T. A. Grady, Manager Tours Department, 211 Clark street, Chicago.

**HOME SEEKERS' EXCURSIONS.**

In order to give everyone an opportunity to see the Western Country and enable the home seekers to secure a home in time to commence work for the season of 1896, the Chicago, Milwaukee & St. Paul R'y has arranged to run a series of four home seekers' excursions to various points in the West, Northwest and Southwest, on the following dates: March 10, April 7 and 21 and May 5, at the low rate of two dollars more than ONE FARE for the round trip. Tickets will be good for return on any Tuesday or Friday within twenty-one days from date of sale. For rates, time of trains and further details apply to any coupon ticket agent in the East or South, or address F. A. Miller, Assistant General Passenger Agent, Chicago, Ill.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and supervised by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—June 9, '94.**

HEATING BY EXHAUST STEAM,

Without Back Pressure,

BY THE VACUUM SYSTEM.

... ADVANTAGES ...

1st.—Can be attached to existing plants at little expense.

2nd.—Effects greatest efficiency from the heating surface by the removal of the water and air, preventing water hammer and stagnant circulation.

3rd.—Saves coal by removal of back pressure from engines; water of condensation, etc.

We are owners of the patent and have equipped the largest plants in the United States, over 500 now in use. Will visit your plant and tell you how much we can benefit you, if you so desire. Send for catalogue P.

## THE ELECTRIC STORAGE BATTERY CO.,

Drexel Bldg., - - - - - Philadelphia, Pa.

# The S. K. C. Two Phase Alternating Current System.

THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.

REPRESENTATIVES:

# JUST A WORD.....

Don't Wait Till the Horse is Gone to Lock the Stable Doors.

You Don't Know When that First Storm is Coming. Are You Sure You are "Lightning Proof?"

## Garton Lightning Arresters

Will Protect You Where All Others Have Failed.

**FOREWARNED IS FOREARMED!**

SEND IN YOUR ORDER TO-DAY.

**THE GARTON LIGHTNING ARRESTERS**

Have Received the Highest Approval of Some of the Leading Electrical Men of the Country.

**"Garton Lightning Arrester" is a Synonym for "Durability, Reliability, Efficiency."**

NO High Ohmic Resistance to Break Down After a Few Discharges!
NO Pivots, Sliding Contacts or Hinges to Blister and Stick!
NO Fuses to Replace! NO Inductive Resistance to the Discharge!
NO Copper Balls to Melt.

**Made for Use in Station, on Poles and in cars. For any Voltage, any Amperage, either Direct or Alternating.**

Write to your Supply Dealer for Information and Prices, or to

GARTON-DANIELS ELECTRIC CO., KEOKUK, IOWA.

# SHIP CARBONS.

MADE IN VIENNA BY

## SCHIFF, JORDAN & CO.

**SOLE AGENTS IN THE U. S. AND CANADA:**

## THE STANDARD PAINT CO.

RALPH L. SHAINWALD, *President.* **"P. & B."** FRANK S. DeRONDE, *General Sales Agent.*

2 Liberty Street, New York.

Don't bother with the cheap, worthless carbons with which the market is flooded. Use the best, "Ship." Let us estimate on your Carbons. Dealers and others interested should write us. Do it now.

After April 15 P. & B. and Ship Carbon Headquarters will be 79 and 81 John St., New York.

WHAT'S THE TALK!

# X-RAYS.

# AJAX LAMPS.

WHY?

They Produce Results that Astonish Users.

Join the procession and learn their merits. None cheaper nor better than the

AJAX.

C. S. VAN NUIS, 136 Liberty St., New York.

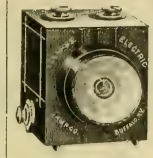
BROOKLYN, N.Y.

ANNOUNCEMENT...



ECLIPSE ELECTRIC LAMP CO.

Manufacturers of

Portable Electric Lamps for Bicycles, Carriages, Watchmen and General Use.

WEIGHT, 16 Ozs. PRICE, $5.00.

MINIATURE LAMPS

For All Purposes. In connection with our PORTABLE LAMP we are equipped with the most complete factory for the manufacture of the Highest Grade of Miniature Lamps Exclusively.

Our Series Lamps are Unexcelled. Watch for our new and original designs.

ECLIPSE ELECTRIC SAND

For closed circuit primary batteries of every description.

A Dry Powder to which only Water is added, when wanted for use. The most convenient and inexpensive form for LABORATORIES, MEDICAL and SURGICAL BATTERIES.

Gorgonite. The new compound for battery boxes, insulations, etc. Positively ACID-PROOF. Far superior and less expensive than hard rubber.

For further particulars address

Eclipse Electric Lamp Co.,

....BUFFALO, N. Y....

Jewell Pulley Covering.

(PATENTED FEB. 26, 1895.)

Cheapest and Best Covering on the Market.

PREVENTS SLIPPING OF BELTS.

Fully Guaranteed. Send for our Catalogue.

MANUFACTURED BY

JEWELL BELTING CO., - - Hartford, Conn.

THE

# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

BRANCH OFFICE:

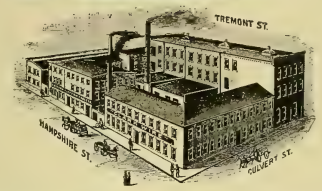
CHICAGO, ILLINOIS.

TRADE MARK.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## Electric Light Contractors and Investors.

CITY OF MADISON, INDIANA.

## NOTICE

Is hereby given that sealed proposals will be received by George B. Clark, City Clerk of said City, up to Wednesday, April 8, 1896, at 7 o'clock p. m., for the furnishing and constructing of a new Electric Light Plant. The successful contractor to receive from said city a contract for lighting the streets for a term of ten years with one hundred to one hundred and twenty-five arc lamps, 2,000 candle power, all night schedule, every night. Said city to grant to the successful contractor a franchise for commercial lighting of said city for a term of ten years.

The said contractor to build, construct, equip and operate approximately three miles of electric street railway and receive from said City of Madison a franchise therefor of thirty years.

All work to be done and contracts entered into according to the plans and specifications now on file in the City Clerk's office, or at the office of Messrs. Pierce & Richardson, No. 1405-1410 Manhattan building, Chicago, Ill., consulting engineers for the City of Madison.

Copies of plans and specifications may be had on application to either of the above parties.

**GEORGE B. CLARK,**
City Clerk.

## WANTED!

The address of every man who is desirous of improving his position or broadening his knowledge of Electricity, and is willing to devote a little time and energy to do so. Address,

**Dept. I, Electric Development Association,**

# AN EXCEPTIONAL OPPORTUNITY!!

## BRAND NEW, PERFECT AND COMPLETE STANDARD

# ARC LAMPS,

**For both Direct and Alternating Current Circuits, and**

# Standard Makes of Carbons,

All to be Sold at Auction, on Wednesday, March 25, 1896, at 10 a. m.

**SALE WILL BE WITHOUT RESERVE**

**TO CLOSE AN ESTATE.**

These goods consist of the balance of the stock forming a portion of the assets of an estate, and were the active stock of the **Electric Construction and Supply Company,** of 14 Cortlandt Street, New York, assigned by that company.

They consist of various types of the well-known standard "Ward" Arc Lamps, of which many thousand are to-day in use in this country and abroad. The Ward Arc Lamps established the business of arc lighting on incandescent circuits in this country.

The stock also embraces the Knight Arc Lamps, made and extensively sold by the **Electric Construction and Supply Company,** together with certain special Ward, Knight and Kinsman Arc Lamps for Railway Circuits, for photo-engraving, and twin and double Carbon Lamps, a complete Dynamo Plant, Switchboard appurtenances, Voltmeters, Ammeters, Switches, etc., New Weston Voltmeter, New Edison Sockets, Lacombe, Fidelity, National, Solar and Lancaster carbons.

The sale will take place **without reserve** on Wednesday, March 25, 1896, at 10 A. M., at Cushing's Warehouse, corner Hudson and Morris Streets, Jersey City, N. J. **Directions:** Take Pennsylvania Railroad Ferry, foot of Cortlandt Street, New York, and on arrival at Jersey City, go one block west and three blocks south to warehouse.

WILLIAM J. HAMMER, } Assignees.
JOHN F. RANDOLPH, }

These goods may be inspected at any time, prior to sale, by applying to Wm. J. Hammer, 1305 Havemeyer Building, 26 Cortlandt Street, New York. Goods sold at private sale, at very low figures, prior to sale on March 25, 1896.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by Jas. B. Rickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

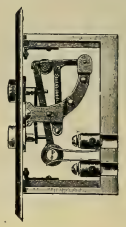
## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.



MORRISON SOUTHERN ELECTRIC CO.,
MANUFACTURERS,
**Hoen Building, BALTIMORE, MD.**

**IF** you are anxious to secure the latest electrical books, **YOU** should write to the ElectricianPublishing Co., Chicago. You **CAN'T** procure too many reliable, readable books to **READ.**

Single Pole, Double Pole, 3-Way, 4-Way, anything you may want.

## THE STEVENS FLUSH SWITCH.

These Switches are second to none. They are fire and damp proof. Mechanism is simplicity itself. Nothing to get out of order. Make and break so wide that no arc can form. Wired without removing casing. Buttons made of mother of pearl. Base made of vulcabeston with porcelain cases.

☞PARTICULAR ATTENTION IS CALLED TO OUR NEW DOUBLE POLE SWITCH.

**Write for price list and discount.**

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO., of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**
**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**
**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1895.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{1}{100}$ per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State. Send for descriptive matter.**

**THE HESS STORAGE BATTERY CO., 246 ARCH STREET, PHILADELPHIA, PA.**

Central Electric Co., 173 Adams St., Chicago.
Harry M. Shaw, 126 Liberty St., New York.

**SOLAR CARBON AND MANUFACTURING CO.,**

MANUFACTURERS OF

**Carbon Brushes, Battery Carbons,**

**Solid Electric Light Carbons,**

For any System, of any degree of hardness.

**Soft Cored Carbons (NOT HOLLOW),**

For Arc Lamps on Incandescent and Railway Circuits

**SOLAR CARBON AND MANUFACTURING CO.,**

95 FIFTH AVENUE, PITTSBURG, PA.

**WESTON Electrical Instrument Co.,**

114-120 William St., NEWARK, N. J., U. S. A.

**Weston Standard Portable Direct Reading**

**Voltmeters, Millivoltmeters, Voltammeters, Ammeters, Milliammeters, Ground Detectors and Circuit Testers, Ohmmeters, Portable Galvanometers.**

Our Portable Instruments are recognized as **The Standard** the world over. **The Semi-Portable Laboratory Standards** are still better.

Our **Station Voltmeters and Ammeters** are unsurpassed in point of extreme accuracy and lowest consumption of energy.

**ANDERSON STEEL TROLLEY POLES AND HARPS.**

**PIVOTAL BOSTON TROLLEYS**

Received only Award for Trolleys at Chicago

Manufactured by **ALBERT & J. M. ANDERSON,** 289-293 A St., Boston, Mass.

**STANDARD UNDERGROUND CABLE CO.,**

THE ROOKERY, CHICAGO. WESTINGHOUSE BUILDING, PITTSBURG. TIMES BUILDING, NEW YORK.

Cable Contracts Taken Including Installation.

**WIRES and CABLES,** Overhead and Underground.

**Best Boilers.**

Our Boiler Shop is equipped for making large boilers in two sheets as shown in the cut. No seams in fire, no laps to catch scale and mud; bottoms smooth and easily cleaned.

WRITE FOR PRICES.

**The Murray Iron Works Co.,**

BURLINGTON, IA.

IMPORTED **CARBONS** FOR ARC LIGHTS.

Soft Cored and Solid.

WRITE FOR PRICES.

55 S. Canal St.,

ED. WERTHEIM, ..Chicago.

**COLUMBIA**

COLUMBIA INCANDESCENT LAMP CO., 1910-1914 Olive Street, ST. LOUIS.

Grimshaw Wires and Cables, Incandescent Lamps, Sockets, Switches, Etc.

**J.W. MASON,** DEALER IN

**General Electrical Supplies,**

KANSAS CITY, MO.

**"CAHALL"**

VERTICAL WATER TUBE BOILER.

BEST IN THE WORLD.

MANUFACTURED BY

The Aultman & Taylor Machinery Co.

SEND FOR CATALOGUE.

H. E. Collins & Co., Sole Agents for the United States. Bank of Commerce Building, PITTSBURG. The Rookery, CHICAGO.

**BABCOCK & WILCOX BOILERS**

**GREEN'S ECONOMIZER**

SAVES 10% TO 20% IN FUEL.

For Steam Boilers.

SOLE MAKERS IN THE U. S. A.

THE Fuel Economizer Co.,

MAIN OFFICE AND WORKS: MATTEAWAN, N. Y.

**WESTON ENGINES.**

**High Pressure Boilers. Complete Power Plants.**

# JUST A WORD.....

Don't Wait Till the Horse is Gone to Lock the Stable Doors.

You Don't Know When that First Storm is Coming. Are You Sure You are "Lightning Proof?"

## Garton Lightning Arresters

Will Protect You Where All Others Have Failed.

**FOREWARNED IS FOREARMED!**

SEND IN YOUR ORDER TO-DAY.

THE GARTON LIGHTNING ARRESTERS

Have Received the Highest Approval of Some of the Leading Electrical Men of the Country.

"Garton Lightning Arrester" is a Synonym for "Durability, Reliability, Efficiency."

NO High Ohmic Resistance to Break Down After a Few Discharges!
NO Pivots, Sliding Contacts or Hinges to Blister and Stick!
NO Fuses to Replace! NO Inductive Resistance to the Discharge!
NO Copper Balls to Melt.

**Made for Use in Station, on Poles and in cars. For any Voltage, any Amperage, either Direct or Alternating.**

Write to your Supply Dealer for Information and Prices, or to

GARTON-DANIELS ELECTRIC CO., KEOKUK, IOWA.

# SHIP CARBONS.

MADE IN VIENNA BY

## SCHIFF, JORDAN & CO.

SOLE AGENTS IN THE U. S. AND CANADA:

## THE STANDARD PAINT CO.

RALPH L. SHAINWALD, *President.* **"P. & B."** FRANK S. DeRONDE, *General Sales Agent.*

## 2 Liberty Street, New York.

Don't bother with the cheap, worthless carbons with which the market is flooded. Use the best, "Ship." Let us estimate on your Carbons. Dealers and others interested should write us. Do it now.

After April 15 P. & B. and Ship Carbon Headquarters will be 79 and 81 John St., New York.

THIS

# Alternating Ceiling Fan Works.

**We Guarantee It.**

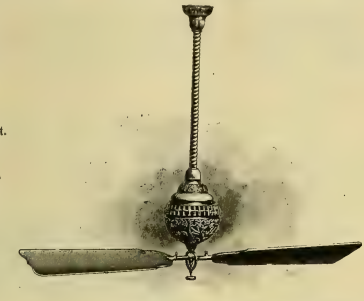
**No Commutator.**

**No Brushes.**

Uses Less Current than any Fan on the Market.

• • •

OUR DIRECT CURRENT FAN WORKS.



**Our Guarantee is Good.**

Only Fan having Blade Adjuster.

Air can be thrown UP or DOWN.

All Bearings SELF-OILING.

• • •

Ask for New Catalogue and Discounts, and you will send us an order.

The Handsomest Fan Ever Offered to the Trade.

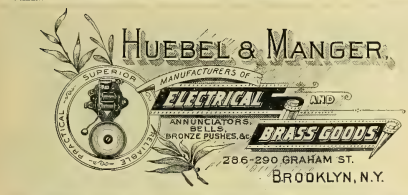
Fans finished in Bronze, Nickel and Polished Brass.
We manufacture a full line of Belt Fans and Water Motors.

**AGENTS WANTED IN LEADING CITIES.**

## TUERK WATER METER CO., - Fulton, N. Y.

**E. B. LATHAM, 136 Liberty St., New York,**

Agent for New York, Brooklyn, Jersey City and Philadelphia. . . . . .



# Jewell Pulley Covering.

**(PATENTED FEB. 26, 1895.)**

**Cheapest and Best Covering on the Market.**

PREVENTS SLIPPING OF BELTS.

Fully Guaranteed. Send for our Catalogue.

MANUFACTURED BY

## JEWELL BELTING CO., - - Hartford, Conn.

---

## ALPHA ELECTRIC LAMP SIGNS....

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another. We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**

American Tract Society Building, NO. 150 NASSAU STREET, NEW YORK.

---

## Gordon Primary Battery

EXCELS IN

Long Life, Efficiency,
Economy, Adaptability.
It is Absolutely Non Freezing,
Labor Saving,
Free from Local Action,
Freedom from Gases and Odors.
Superior Generation of Energy.

These Batteries are in use by the most prominent Telephone, Fire Alarm and Railroad Companies of America. Send for descriptive circular and price list. We guarantee all our Cells.

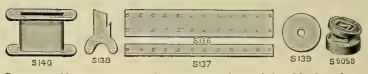
MANUFACTURED BY

**The Gordon-Burnham Battery Co.,**

**82 West Broadway, New York.**

---

## VULCABESTON CONTROLLER PARTS.



## All Controllers are Insulated with Vulcabeston.

**G. E. 800 and Westinghouse Commutator Rings, Brush Holder Bushings and Field Spools.**

**SEND FOR PRICE LIST.**

Moulded Mica Trolley Insulating Materials, Frogs, Crossings, Tree Insulators, Weatherproof Sockets, etc.

**H. W. JOHNS MFG. CO.,**

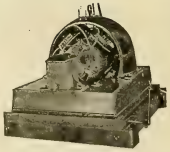
## CARD

Generators for Power Transmission or Isolated Lighting.

CARD Generators are all Multipolar and Slow Speed.

**AGENTS WANTED IN UNOCCUPIED TERRITORY.**



75 K W GENERATOR.

## CARD

Multipolar Slow Speed Stationary Motors.

Reversible Motors and Controllers for Rolling Mills, Bridges and Traveling Cranes.

**THE CARD ELECTRIC COMPANY,**

**Office and Works, Mansfield, Ohio.**

---

## MICA, INDIA AND AMBER.

In the sheet and cut to any size or pattern. Mica Washers, Stamped Mica Segments and solid sheet Mica Segments gauged to thickness, for all the standard street railway motors.

**EUGENE MUNSELL & CO.,** Importers Direct from the Mines, 218 Water Street, New York.

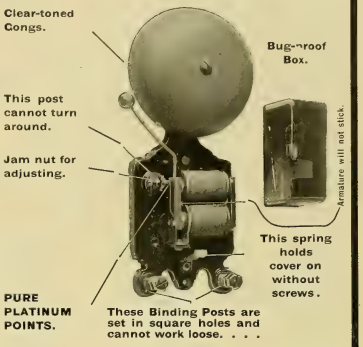
AGENCIES: CHICAGO: W. H. Sills. CINCINNATI: Sinclair Randall. ST. LOUIS: A. S. Partridge. CLEVELAND: The Cuyahoga Supply Co. SAN FRANCISCO: J. W. Brooks & Co.

## Made on the □

# The Extra Best Bell (Extra B. B.)

Let us run down the list of good things that can be said of the **"Extra B. B."**

1. It is well made mechanically.
2. Pure platinum contacts. Honor bright!
3. Binding posts set in a square hole, **tight.**
4. Contact post fixed same way. Can't get nervous and point in the wrong direction.
5. When you adjust the bell to suit your battery it stays there.
6. Armature will not stick.
7. Gets full benefit of both pole pieces.
8. Clapper will not drop off.
9. Cover snaps on. No screw to lose.
10. One dollar will buy more of these bells than any other **equally as good.**

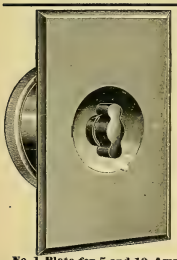


BRANCHES:
ST. LOUIS: Southern Electrical Supply Co.
KANSAS CITY: Gate City Electric Co.
NEW ORLEANS: 1010 Canal Street.
BUFFALO: 112 White Building.

## Central Electric Company,

CENTRAL STATION AND ELECTRIC RAILWAY SUPPLIES,

CHICAGO.



No. 1 Plate for 5 and 10 Amp. Hart Switches.

# HART FLUSH SWITCHES.

New Face Plate.

## BETTER PROPORTIONS. BETTER FINISH. MORE DURABLE.

Made of solid plate brass $\frac{1}{8}$-inch thick, with beveled edges.

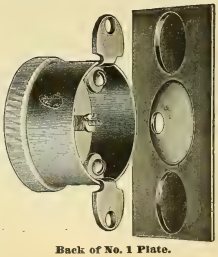
Better Design,
Better Material,

Self-Adjusting Handle,
No Breaking,

No Binding on Face Plates,
No Loose Face Plates.
Handles, Switches and Face Plates Interchangeable.

Single Plates for all sizes of Hart Switches.
Gang Plates for any number of Hart Switches.

**SEND FOR "CATALOGUE B."**



Back of No. 1 Plate.

## THE HART & HEGEMAN MFG. CO., HARTFORD, CONN.

# THE HESS DOUBLE ELECTRODE STORAGE BATTERY

**Is practically indestructible.**
**Its estimated life is unlimited.**
**Disintegration is entirely out of the question.**
**Buckling is absolutely prevented, not by resistant force but by a scientific new process.**
**THE HESS STORAGE BATTERY CO., of Philadelphia, who own and control the Hess patents, offer their system at cost of manufacture, estimated to be about one-third the price asked by manufacturers.**

**We organize State Companies to manufacture and install electric lighting plants, with gas engine, dynamo and storage battery.**

**Territorial rights granted. Patents in all countries.**

**The first successful Non-infringing Storage Battery ever produced in the United States. Note the contrast from the Supreme Court decision:**

"The distinguishing feature of the invention of Charles F. Brush in secondary batteries as described in the specification of Letters Patent of the U. S., No. 337,299, dated March 2, 1886, and issued to him for improvements in secondary batteries for the current storing of electrical energy, is in general terms the mechanical application of a layer of lead oxide to each one of two lead plates before the plates are placed in the battery fluid. These coatings at once being active material and ready for the charging current when immersed in the battery fluid." (Quoted from the syllabus of the case of the Electrical Accumulator Co. vs. Brush Electric Co., decided in the U. S. Circuit Court of Appeals for the Second Circuit, October 4, 1892.)

**In our battery the active material is fed to the plates after the plates are immersed in the battery fluid.**

**An authentic, reliable, unbiased test and report was made by Messrs. Houston & Kennelly, E. E., of Philadelphia, 97$\frac{135}{1000}$ per cent. ampere efficiency, 81 per cent. watt efficiency.**

**We prosecute and defend all patent law-suits.**
**We want representative parties to manufacture and install our batteries in every State.**
**Send for descriptive matter.**

CINCINNATI, O., Nevada Bldg., John A. Stewart.
CHICAGO, 305 Dearborn St., Wallace & Hine, Managers.

# BI-METALLIC WIRE.

**(Manufactured by John A. Roebling's Sons Co.)**

**Copper and Steel. Copper for Conductivity, Steel for Strength. The two combined for the "bi-metallic" effect. A Superior Conductor.**

**Telephone, Telegraph, Trolley, Electric Light and Power.**

**PRICES AND GENERAL INFORMATION UPON APPLICATION TO**

## Bi-Metallic Electric Transmission Co.,

**1204 Havemeyer Building, 26 Cortlandt St., New York, N. Y.**

# The S. K. C. Two Phase Alternating Current System.

**THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.**

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—**Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.**

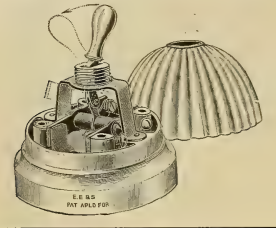
## STANLEY ELECTRIC MANUFACTURING CO.,

PITTSFIELD, MASS.

**WESTERN OFFICE, 305 DEARBORN STREET, CHICAGO, ILL.**

**The Royal Electric Co., Montreal, Can., are exclusive licensees for the manufacture of the S. K. C. System in the Dominion of Canada.**

# E. E. & S. CANOPY SWITCH.



This Switch is in all respects **A KNIFE SWITCH** placed **UNDER** a **COVER.** The break is quick and positive, entirely out of the control of the hand. Contacts and blades are made of pure copper. Easily wired and well proportioned.

Send us your orders and they will be promptly filled.

**WANTED.**

**An Excellent Opportunity for a Young Man!**

The advertiser controls valuable electric heating patents; sad irons, soldering outfits, etc.; and wants a young man, electrically educated and with some capital, to join him in pushing the electrical heating business already organized and established and with good orders on hand. A salary would be paid and young man and advertiser (business man) can control this business. Address "Heater," care WESTERN ELECTRICIAN.

## SALESMAN WANTED.

One who is now selling the electric trade in the West and Southwest, and would be willing to take up an article used by all electric roads and manufacturers, on commission. Address,

X. Y. Z., care WESTERN ELECTRICIAN.

## Situation Wanted

By a man who has the formula for making the best china for electrical purposes in the market, glazed or unglazed; also understands making all kinds of window and wall tubes of all lengths and sizes, curved tubes, etc., and all kinds of press work. Address, "A. E. X.," care

WESTERN ELECTRICIAN, Chicago.

## Position Wanted

By young man experienced in setting up dynamos and motors. Expert armature winder and repair hand. Good at figures, rewinding for any voltage. Position with construction company preferred, or will take charge of station. Best of references. Address, "RELIABLE," Care WESTERN ELECTRICIAN.

## $5,000.00,

Will purchase one-third interest in a large and successful Electrical Supply and Construction Company located in the West; 20 per cent. per annum profits guaranteed upon investment. If you are a bookkeeper or an experienced electrician, position also at not less than $100 per month. Address

**Electrical Construction,**

Care of WESTERN ELECTRICIAN,

CHICAGO, ILL.

## WANTED!

The address of every man who is desirous of improving his position or broadening his knowledge of Electricity, and is willing to devote a little time and energy to do so.

Address,

**Dept. I, Electric Development Association, CHICAGO.**

**Bargains in Machinery for Street Railways.**

One 600 h. p. Corliss engine, one 300 h. p. Corliss engine; one 500 h. p. Westinghouse compound engine; one 250 h. p. Ball automatic engine; two 125 h. p. Ball automatic engines; two 80 h. p. Ball automatic engines; two 125 h. p. generators, 500 volts; four 60 h. p. generators, 500 volts; large stock of automatic engines and dynamos of every description. Also a battery of compound boilers, 700 h. p., 160 h. p. in a pair. FRANK TOOMEY, N. Y., 141 N. Third Street, Philadelphia.

## FOR SALE.

## Electric Light Contractors and Investors.

CITY OF MADISON, INDIANA.

## NOTICE

Is hereby given that sealed proposals will be received by George B. Clark, City Clerk of said City, up to Wednesday, April 8, 1896, at 7 o'clock p. m., for the furnishing and constructing of a new Electric Light Plant. The successful contractor to receive from said city a contract for lighting the streets for a term of ten years with one hundred to one hundred and twenty-five arc lamps, 2,000 candle power, all night schedule, every night. Said city to grant to the successful contractor a franchise for commercial lighting of said city for a term of ten years.

The said contractor to build, construct, equip and operate approximately three miles of electric street railway and receive from said City of Madison a franchise therefor of thirty years.

All work to be done and contracts entered into according to the plans and specifications now on file in the City Clerk's office, or at the office of Messrs. Pierce & Richardson, No. 1409-10 Manhattan building, Chicago, Ill., consulting engineers for the City of Madison.

Copies of plans and specifications may be had on application to either of the above parties.

**GEORGE B. CLARK,**
City Clerk.

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.** . . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past. . . . . .

# SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**
**Impossibility of Packing under any Conditions;**
**Sensitiveness and Clearness of Articulation.**
**Least Affected by Induction of any Instrument now on the market.**
**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

# AN EXCEPTIONAL OPPORTUNITY!!

## BRAND NEW, PERFECT AND COMPLETE STANDARD

# ARC LAMPS,

**For both Direct and Alternating Current Circuits, and**

# Standard Makes of Carbons,

**All to be Sold at Auction, on Wednesday, March 25, 1896, at 10 a. m.**

**SALE WILL BE WITHOUT RESERVE**

**TO CLOSE AN ESTATE.**

These goods consist of the balance of the stock forming a portion of the assets of an estate, and were the active stock of the **Electric Construction and Supply Company,** of 14 Cortlandt Street, New York, assigned by that company.

They consist of various types of the well-known standard "Ward" Arc Lamps, of which many thousand are to-day in use in this country and abroad. The Ward Arc Lamps established the business of arc lighting on incandescent circuits in this country.

The stock also embraces the Knight Arc Lamps, made and extensively sold by the **Electric Construction and Supply Company,** together with certain special Ward, Knight and Kinsman Arc Lamps for Railway Circuits, for photo-engraving, and twin and double Carbon Lamps, a complete Dynamo Plant, Switchboard appurtenances, Voltmeters, Ammeters, Switches, etc., New Weston Voltmeter, New Edison Sockets, Lacombe, Fidelity, National, Solar and Lancaster carbons.

The sale will take place **without reserve** on Wednesday, March 25, 1896, at 10 A. M., at Cushing's Warehouse, corner Hudson and Morris Streets, Jersey City, N. J. **Directions:** Take Pennsylvania Railroad Ferry, foot of Cortlandt Street, New York, and on arrival at Jersey City, go one block west and three blocks south to warehouse.

WILLIAM J. HAMMER, } Assignees.
JOHN F. RANDOLPH, }

These goods may be inspected at any time, prior to sale, by applying to Wm. J. Hammer, 1305 Havemeyer Building, 26 Cortlandt Street, New York.
Goods sold at private sale, at very low figures, prior to sale on March 25, 1896.

---

## THE G. E. WIRES AND CABLES

**Are manufactured at OUR OWN works at Schenectady, N. Y.**

The REPUTATION which the EXCELLENCE of our ELECTRICAL Apparatus has given us throughout the world, is the guarantee of the perfection of the G. E. WIRES AND CABLES upon which purchasers can rely.

G. E. DOUBLE RUBBER CORE WIRE with INSULATION of the best material, FREE FROM SHODDY, is unequaled for ordinary INCANDESCENT LIGHTING, STREET RAILWAY, PRIMARY ALTERNATING, ARC LIGHT AND POWER TRANSMISSION CIRCUITS. It is made with four insulations to withstand 500, 2,000, 4,000 and 8,000 volts respectively.

G. E. WIRES AND CABLES are in use in the greatest Lighting and Railway installations in this country and the ENTIRE OUTPUT OF THE NIAGARA STATION is carried over them.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

$3 per Annum. Copyright, 1896, by Electrician Publishing Company, Chicago. EVERY SATURDAY. Entered at Chicago Postoffice as mail matter of the second class. 10 cents per Copy.

Vol. XVIII. CHICAGO, MARCH 28, 1896. No. 13

**SIMPLEX** INSULATED WIRES AND CABLES.

RUBBER COVERED, WEATHERPROOF, UNDERGROUND and SUBMARINE.

WESTERN SELLING AGENT. H. R. HIXSON, 1137 Monadnock Block, CHICAGO.

Simplex Electrical Company, 75-81 Cornhill, BOSTON, MASS.

ALFRED F. MOORE,

MANUFACTURER OF

INSULATED ELECTRIC WIRE,

FLEXIBLE CORDS and CABLES.

900 and 902 North Third Street. - - PHILADELPHIA, PA.

**INSULATED WIRES AND CABLES**

Aerial, Underground and Submarine,

For TELEPHONE, TELEGRAPH, LIGHT and POWER.

Lead encasing in all its Branches.

KERITE TAPES.

W. R. BRIXEY, Mfr., J. E. HAM, Gen'l Agt. 203 Broadway, New York
S. F. B. Morse, Chicago, Ill.
CALIFORNIA ELECTRICAL WORKS. San Francisco, Cal.
NEW ORLEANS ELECTRIC CO., New Orleans, La.
KENNEDY & DUPEROW, Washington, D. C.

WILLARD L. CANDEE, H. DURANT CHEEVER, Business Managers, GEO. T. MANSON, Gen'l Supt. W. H. HODGINS, Secretary.

**THE OKONITE COMPANY,** LIMITED,

13 Park Row, New York.

INSULATED WIRES and CABLES,

For Aerial, Submarine and Underground Use.

Candee Aerial Wires.
Manson Protecting Tape.
Okonite Waterproof Tape.

TRADE MARK.

BRANCHES: Chicago, Boston, Philadelphia, Pittsburgh, Minneapolis, Cincinnati, Kansas City, Omaha, Louisville, St. Louis, San Francisco, London and So. America.

PARTRIDGE SELF LUBRICATING MOTOR BRUSH

OFFICE AND FACTORY, SANDUSKY O.

AGENTS:

C. J. Mayer, Betz Bldg., Philadelphia, Pa.
Smith & Wallace, Hamilton St., Boston, Mass.
Ed. P. Sharp, 44 Niagara St., Buffalo, N. Y.
Arthur S. Partridge, Bank of Commerce Bldg., St. Louis, Mo.

Harry M. Shaw, 126 Liberty St., New York.

**SOLAR CARBON AND MANUFACTURING CO.,**

MANUFACTURERS OF

Carbon Brushes, Battery Carbons,

Solid Electric Light Carbons,

For any System, of any degree of hardness,

Soft Cored Carbons (NOT HOLLOW),

For Arc Lamps on Incandescent and Railway Circuits

SOLAR CARBON AND MANUFACTURING CO., 95 FIFTH AVENUE, PITTSBURG, PA.

**WESTON** Electrical Instrument Co.,

114-126 William St., NEWARK, N. J., U. S. A.

The Weston Arc Light Ammeter

Is cheap, but nevertheless reliable

and very accurate.

The scale is so proportioned that a change of one ampere can be seen from a considerable distance. The instrument is absolutely "dead beat." Three different ranges are being made:

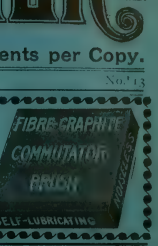
No. 1. 5.8 6.8 7.8 amperes in $\frac{1}{10}$ ampere div.
No. 2. 8.6 9.6 10.6 " " $\frac{1}{5}$ " "
No. 3. 9.5 10.5 11.5 " " $\frac{1}{10}$ " "

**F-G** MEANS

No Wear on Commutator.
No Sparking Under Varying Load.

Holmes Fibre-Graphite Mfg. Co.,

Station Z, Philadelphia.



Aetna Railway Insulators, Anderson Line Material,

Manufactured solely by ALBERT & J. M. ANDERSON, 289 to 293 A Street, Boston, Mass.

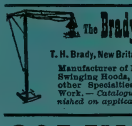
Correspondence Solicited.

FREDERICK N. MINOTT, Gen'l Mgr.

BRANCHES:
New York Office, 87 Broadway, H. L. Burdick, Mgr.
San Francisco 377-379 Market St.
Chicago, Metropolitan Electric Co., 186-188 Fifth Ave.

NATIONAL INDIA RUBBER CO.'S Wires and Cables.

Factory and Offices: BRISTOL, - R. I.



The Brady Mast Arms.

T. H. Brady, New Britain, Conn., U. S. A.,

Manufacturer of Mast Arms, Pole and Swinging Hoods, Mouse Brackets and other Specialties for Construction Work.—*Catalogues and Prices furnished on application.*

OVER 5 VOLTS AND OVER 5 AMPERES ON SHORT CIRCUIT,

from 6 x 8 inch cell.

27 ampere hours from one charge. Ordinary Leclanche zincs last 3 charges.

BOYNTON MULTIVOLT BATTERY CO., 169 Greenwich St., - - NEW YORK.

**COLUMBIA**

COLUMBIA INCANDESCENT LAMP CO., 1910-1914 Olive Street, ST. LOUIS.

"CAHALL"

VERTICAL WATER TUBE BOILER.

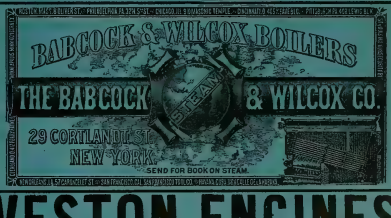
BEST IN THE WORLD.

MANUFACTURED BY

The Aultman & Taylor Machinery Co.

SEND FOR CATALOGUE.

H. E. Collins & Co., Sole Agents for the United States. Bank of Commerce Building, PITTSBURGH. The Rookery, CHICAGO.



**WESTON ENGINES.**

High Pressure Boilers. Complete Power Plants.

Estimates and Drawings Submitted.

WESTON ENGINE CO., PAINTED POST, N. Y.

REPRESENTATIVES.

# JUST A WORD.....

Don't Wait Till the Horse is Gone to Lock the Stable Doors.

You Don't Know When that First Storm is Coming. Are You Sure You are "Lightning Proof?"

## Garton Lightning Arresters

Will Protect You Where All Others Have Failed.

**FOREWARNED IS FOREARMED!**

SEND IN YOUR ORDER TO-DAY.

**THE GARTON LIGHTNING ARRESTERS**

Have Received the Highest Approval of Some of the Leading Electrical Men of the Country.

**"Garton Lightning Arrester" is a Synonym for "Durability, Reliability, Efficiency."**

NO High Ohmic Resistance to Break Down After a Few Discharges!
NO Pivots, Sliding Contacts or Hinges to Blister and Stick!
NO Fuses to Replace! NO Inductive Resistance to the Discharge!
NO Copper Balls to Melt.

**Made for Use in Station, on Poles and in cars. For any Voltage, any Amperage, either Direct or Alternating.**

Write to your Supply Dealer for Information and Prices, or to

GARTON-DANIELS ELECTRIC CO., KEOKUK, IOWA.

# SHIP CARBONS.

MADE IN VIENNA BY

## SCHIFF, JORDAN & CO.

**SOLE AGENTS IN THE U. S. AND CANADA:**

# THE STANDARD PAINT CO.

RALPH L. SHAINWALD, *President.* **"P. & B."** FRANK S. DeRONDE, *General Sales Agent.*

## 2 Liberty Street, New York.

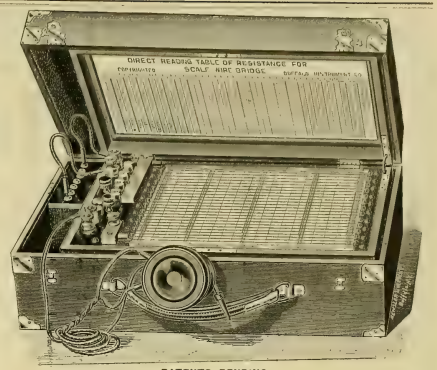
Don't bother with the cheap, worthless carbons with which the market is flooded. Use the best, "Ship." Let us estimate on your Carbons. Dealers and others interested should write us. Do it now.

After April 15 P. & B. and Ship Carbon Headquarters will be 79 and 81 John St., New York.

The glowing accounts of the utility of the X-rays received almost daily from abroad and the interesting and valuable experiments made with them nearer home, with which our medical and other scientific literature abounds, has incited physicists everywhere to experiment with this new and nameless electrical agent.

The laboratory force of Messrs. Baker & Co. at Newark, N. J., in which platinum is worked, has been enlarged in order that the increased demand for fluorescing platinum salts may be promptly met. Messrs. Baker & Co. say that since the Roentgen furore they have sold more of the salts of platinum which fluoresce under the impact of the new rays, namely, the barium platino-cyanide, than ever before in the history of the business.

Roentgen has truly opened a path which those interested in many branches of science are eagerly following, and as the means for making his shadow pictures with X-rays are brought within the reach of experimenters, more and more interesting developments may be expected.



PATENTS PENDING.

**Range .00001 ohm to 99 megohms.**

# A Standard Portable Bridge. Just What Electricians Want.

This make of bridge has been in use for the past eighteen months, with some of the leading plants of this and foreign countries, and has proved to be eminently satisfactory in all cases. We solicit your patronage with the belief that we are offering you the best portable outfit yet placed on the market. Our prices are within the reach of all purchasers. We are prepared to ship these instruments to responsible parties on approval.

**WRITE FOR CIRCULARS.**

**BUFFALO INSTRUMENT COMPANY,**
Office, Room 4 Builders' Exchange, BUFFALO, N. Y.

## Are you alive to your own interest?

If so, better use our Arc Cut-Outs, Carbon Holders, Machine Brushes, Segments, Etc. Write us for prices on anything you are in need of, as we manufacture are lighting supplies in general.

**The Phila. Electrical & Mfg. Co.,**

THE

# "CLARK" WIRE.

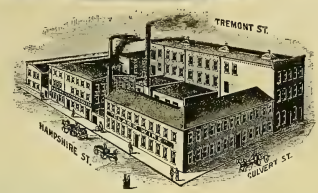
TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

BRANCH OFFICE:

1649, 1650, 1651 MONADNOCK BLDG.,
CHICAGO, ILLINOIS.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## Electric Light Contractors and Investors.

CITY OF MADISON, INDIANA.

## NOTICE

Is hereby given that sealed proposals will be received by George B. Clark City Clerk of said City, up to Wednesday, April 8, 1896, at 7 o'clock p. m., for the furnishing and constructing of a new Electric Light Plant. The successful contractor to receive from said city a contract for lighting the streets for a term of ten years with one hundred to one hundred and twenty-five arc lamps, 2,000 candle power, all night schedule, every night. Said city to grant to the successful contractor a franchise for commercial lighting of said city for a term of ten years.

The said contractor to build, construct, equip and operate approximately three miles of electric street railway and receive from said City of Madison a franchise therefor of thirty years.

All work to be done and contracts entered into according to the plans and specifications now on file in the City Clerk's office, or at the office of Messrs. Pierce & Richardson, No. 1409-10 Manhattan building, Chicago, Ill., consulting engineers for the City of Madison.

Copies of plans and specifications may be had on application to either of the above parties.

**GEORGE B. CLARK,**

**City Clerk.**

**Bargains in Machinery for Street Railways.**

One 600 h. p. Corliss engine, one 300 h. p. Corliss engine; one 300 h. p. Westinghouse compound engine; one 250 h. p. Ball automatic engine; two 125 h. p. Ball automatic engines; two 80 h. p. TO THOSE INTERESTED IN ELECTRIC LIGHTING.

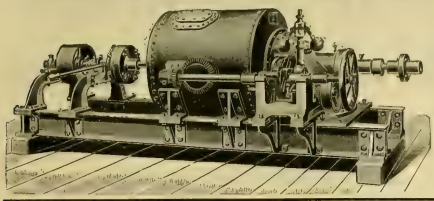
If you haven't read Buckley's "ELECTRIC LIGHTING PLANTS: THEIR COST AND OPERATION," you should order a copy at once. It is the only work of its kind in print and will prove an inseparable companion. It is just the book thousands of men have been waiting for; it will be what you want. 275 pages. Illustrated. Cloth, $2.00. Paper cover, $1.00. Postage free

**ELECTRICIAN PUBLISHING COMPANY,**

Suite 510 Marquette Bldg., Chicago.

# Victor Turbine Water Wheel.



**Cylinder or Register Gate—Close Regulation and High Efficiency at Full and Partial Gate.**

The attention of ELECTRIC COMPANIES is called to this **CELEBRATED WATER WHEEL** as particularly adapted to their use, on account of its **remarkably steady motion, high speed and great efficiency and large capacity** for its **diameter,** being **double** the **power** of most wheels of the same diameter. It is used by a number of the leading electric companies with great satisfaction. In the economical use of water it is without an equal, producing the highest per cent of useful effect **guaranteed.**

*SEND FOR CATALOGUE AND PARTICULARS.*

The accompanying engraving represents a single 10-inch Victor Turbine on horizontal shaft to develop 36 H. P. under 38 feet head. Arranged with 12-inch Worrell Friction Coupling at one end to disconnect pulley.

We are now prepared to furnish Victor Turbines, either single or in pairs, on horizontal shafts, and where the situation admits of their use we recommend them.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

12 mo. Cloth. 272 pages. 53 Chapters.

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. Bickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

## THE STEVENS FLUSH SWITCH.

These Switches are second to none. They are fire and damp proof. Mechanism is simplicity itself. Nothing to get out of order. Make and break so wide that no arc can form. Wired without removing casing. Buttons made of mother of pearl. Base made of vulcabeston with porcelain cases.

☞ PARTICULAR ATTENTION IS CALLED TO OUR NEW DOUBLE POLE SWITCH.

**Write for price list and discount.**

**THE ELECTRIC PROTECTION COMPANY,**

**MANUFACTURERS,**

**1026 Filbert Street, PHILADELPHIA.**

**NEW YORK AGENT, A. L. Fenton, Room 31, 126 Liberty St.**

New Double Pole.

## The Painter-Morrison Push Button Flush Switch.

**PATENTED DECEMBER 22, 1891.**

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed.

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.**

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed.

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past.

# American Electric Heating CORPORATION,

*Sears Building,* = = *BOSTON, MASS.*

We are making **Laundry Irons, Tailors' Gooses, Small Stoves**—just the thing for a thousand uses—**Curling Iron Heaters,** as well as a full line of **Cooking Devices, Up-to-Date Street Car and Special Electric Air Heaters.**

**Electric Vulcanizer for Bicycle Tires.**

**Write for further particulars.**

**American Electric Heating Corporation.**

# IMPORTANT NOTICE.

We are glad to announce that Mr. Frank H. Ball, the well-known steam engine designer, has assumed the management of our business, and will at once add to our present line of steam and electrical machinery a full line of his celebrated engines specially designed for direct connected electrical work, and adapted to dynamos of our own manufacture, thus making complete and symmetrical units.

**AMERICAN ENGINE CO.,**

# The S. K. C. Two Phase Alternating Current System.

**THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.**

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—**Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.**

## WANTED.

**An Excellent Opportunity for a Young Man!**

The adverser controls valuable electric heating patents-sad irons, soldering outfits, etc.-and wants a young man, electrically educated and with some capital, to join him in pushing the electrical heating business already organized and establ shed and with good orders on hand. A salary would be paid and young man and adverliser (business man) can equit this business. Address **"Heater,"** care WESTERN ELECTRICIAN.

## WANTED.

Situation as superintendent of an electric light plant, or combined electric light and water works plant. Have had considerable experience in both. Have held present position over 4 years and only resign for change on account of my wife's health. Am strictly temperate and can furnish best of references as to character and ability. Address "Water Works," care Western Electrician, 510 Marquette Bldg., Chicago.

## BUSINESS OPPORTUNITY.

Advertiser wishes to connect himself with established good electrical business, manufacturing, merchandising or contracting. Would furnish some capital. Give particulars. Address **"D,"** Care WESTERN ELECTRICIAN. 510 Marquette Bldg.

## POSITION WANTED.

All around man for Street Railway or Electric Light. Good Engineer and Machinist and first-class Electrician; any system. Familiar with making tests, repairs and construction work. Address **"H,"** care WESTERN ELECTRICIAN.

## POSITION WANTED.

As Superintendent of Light or Power Plant, by an ambitious man having a stock of "horse sense" gained by nine years' practical experience in erecting and running plants. Familiar with the prominent electric systems; up in high-grade engineering and economy in the production and use of steam. Accustomed to the handling of men; ability to make drawings and estimates. Only object in leaving present position (traveling) is to be located permanently. Would consider a nominal salary. No objection to location. Al references Address

**P. O. Box 171, Philadelphia, Pa.**

## WANTED—PARTNER.

The proprietor of an electrical manufacturing business, producing an established and well endorsed line of apparatus accessory to the alternating system, desires the association of gentleman of good reputation and habits, as partner. Must be able to invest a few thousand dollars and his services, both of which are desired for the purpose of pushing our product actively in the market and extending the business. Must be a man of enterprise and push, and preferably with some experience in selling electrical apparatus, and not averse to occasional traveling. Factory excellently equipped and located in large city within 100 miles of Chicago. Profits large and present expenses very low. As a legitimate business investment, this will prove to the proper party a most desirable opportunity. Address "PROPRIETOR," care WESTERN ELECTRICIAN, 510 Marquette Bldg., Chicago.

**...PROPOSALS TO...**

## Electric Light Contractors and Investors.

CITY OF MADISON, INDIANA.

## NOTICE

Is hereby given that sealed proposals will be received by George B. Clark, City Clerk of said City, up to Wednesday, April 8, 1896, at 7 o'clock p. m., for the furnishing and constructing of a new Electric Light Plant. The successful contractor to receive from said city a contract for lighting the streets for a term of ten years with one hundred to one hundred and twenty-five arc lamps, 2,000 candle power, all night schedule, every night. Said city to grant to the successful contractor a franchise for commercial lighting of said city for a term of ten years.

The said contractor to build, construct, equip and operate approximately three miles of electric street railway and receive from said City of Madison a franchise therefor of thirty years.

All work to be done and contracts entered into according to the plans and specifications now on file in the City Clerk's office, and at the office of Messrs. Lockes & Richardson, No. 1409-10 Monadnock building, Chicago, Ill., consulting engineers for the City of Madison. Inspection of plans and specifications and proposals upon application to either of the above parties.

GEORGE B. CLARK,
City Clerk.

## Standard Loud-Speaking, Long-Distance and Exchange Telephone.

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

**Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.**

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

## Standard Telephone Exchange Switchboards

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

**Correspondence Solicited.** Address

# SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| Gate | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.16 | 119.17 | 141.58 | 203.27 | 79.76 |
| ¾ " | 16.45 | 122.60 | 127.12 | 189.19 | 82.58 |
| ½ " | 16.78 | 117.33 | 112.60 | 175.74 | 82.18 |
| ¼ " | 17.03 | 111.84 | 98.12 | 149.99 | 79.31 |
| ⅛ " | 16.88 | 118.67 | 82.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| Gate | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |

A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

12 mo. Cloth. 272 pages. 53 Chapters.

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world.

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shop that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

ELECTRICIAN PUBLISHING COMPANY, - - - Suite 510 Marquette Building, Chicago, Ill.

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.** . . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past. . . . . .

## THE BALL & WOOD COMPANY,

Builders of Improved Automatic Cut-Off Engines.

# JUST A WORD.....

Don't Wait Till the Horse is Gone to Lock the Stable Doors.

You Don't Know When that First Storm is Coming. Are You Sure You are "Lightning Proof?"

## Garton Lightning Arresters

Will Protect You Where All Others Have Failed.

**FOREWARNED IS FOREARMED!**

SEND IN YOUR ORDER TO-DAY.

THE GARTON LIGHTNING ARRESTERS

Have Received the Highest Approval of Some of the Leading Electrical Men of the Country.

"Garton Lightning Arrester" is a Synonym for "Durability, Reliability, Efficiency."

NO High Ohmic Resistance to Break Down After a Few Discharges!
NO Pivots, Sliding Contacts or Hinges to Blister and Stick!
NO Fuses to Replace! NO Inductive Resistance to the Discharge!
NO Copper Balls to Melt.

**Made for Use in Station, on Poles and in cars. For any Voltage, any Amperage, either Direct or Alternating.**

Write to your Supply Dealer for Information and Prices, or to

GARTON-DANIELS ELECTRIC CO., KEOKUK, IOWA.

# SHIP CARBONS.

MADE IN VIENNA BY

## SCHIFF, JORDAN & CO.

**SOLE AGENTS IN THE U. S. AND CANADA:**

# THE STANDARD PAINT CO.

RALPH L. SHAINWALD, *President.* **"P. & B."** FRANK S. DeRONDE, *General Sales Agent.*

## 2 Liberty Street, New York.

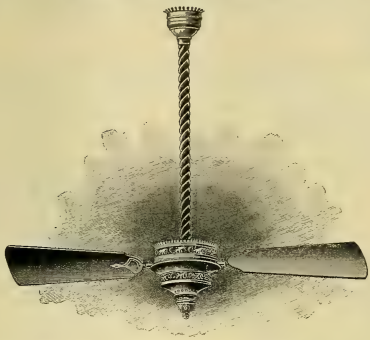
Don't bother with the cheap, worthless carbons with which the market is flooded. Use the best, "Ship." Let us estimate on your Carbons. Dealers and others interested should write us. Do it now.

After April 15 P. & B. and Ship Carbon Headquarters will be 79 and 81 John St., New York.

SEASON 1896.

# THE NEW DIEHL ELECTRIC FANS.

HIGHLY FINISHED IN
Japan,
Nickel,
Polished Brass
...AND...
Venetian Designs.



INCREASED EFFICIENCY.
IMPROVED MECHANICAL CONSTRUCTION.

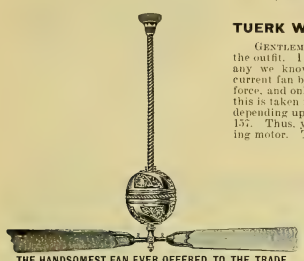
AGENTS WANTED IN LEADING CITIES.



THE HANDSOMEST FAN EVER OFFERED TO THE TRADE.

**TUERK WATER METER CO., Fulton, N. Y.**

SCHENECTADY, N. Y., March 25, 1896.

GENTLEMEN:—We have made a test of your ceiling fan, using our motor, and must say we are very much pleased with the outfit. I think you have struck the right combination for an alternating fan, and one which is much cheaper than any we know of. It might be interesting to you to know that you cannot judge of the energy taken by an alternating current fan by multiplying the voltage and ampere readings, because there is a lag of the current behind the electromotive force, and only an indicating wattmeter should be used for measuring the energy. We think the motor is efficient when this is taken into consideration. Our tests, for instance, show that the apparent watts vary from about 243 to 260 watts, depending upon the angle at which the fans are set. The actual watts read by an indicating wattmeter vary from 130 to 157. Thus, you will see there is considerable difference between the apparent watts and the actual watts of the alternating motor. The ratio between these two is known as the power factor, and in this case varies from .52 to .57.

Yours truly,
GENERAL ELECTRIC CO.
Per H. C. Wirt, Engineer Supply Dep't.

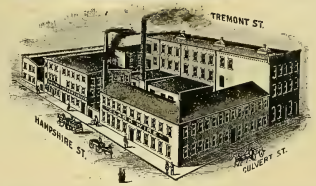
THE
# "CLARK" WIRE.

TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

Eastern Electric Cable Co.,
61 and 63 Hampshire St., Boston, Mass.

## WANTED.

**An Excellent Opportunity for a Young Man!**

The advertiser controls valuable electric heating patents(sad irons, soldering outfits, etc.)and wants a young man, electrically educated and with some apital, to join him in pushing the electrical heating business already organized and estabi shed and with good orders on hand. A salary would be paid and young man and advertiser (business man) can enter i this business. Address **"Heater,"** care WESTERN ELECTRICIAN.

## WANTED.

Situation as superintendent of an electric light plant, or combined electric light and water works plant. Have had considerable experience in both. Have held present position over 4 years and only desire to change on account of my wife's health. Am strictly temperate and can furnish best of references as to character and ability. Address **"Water Works,"** care **Western Electrician,** 510 Marquette Bldg., Chicago.

## BUSINESS OPPORTUNITY.

Advertiser wishes to connect himself with established good electrical business, manufacturing, merchandising or contracting. Would furnish some capital. Give particulars. Address **"D,"** Care WESTERN ELECTRICIAN, 510 Marquette Bldg.

## POSITION WANTED.

By a practical electrician of 14 years' experience, to take charge of winding, assembling or repairing dynamos, motors, arc lamps, or street railway work. Familiar with all leading systems. Married man. Can furnish best of references. Address **S. T. H.,** care WESTERN ELECTRICIAN.

## WANTED.

Three traveling salesmen: must understand meter and transformer work. State experience, salary expected, furnish reference. Must be reliable, industrious, sober and hustlers. Address, **"D 2,"** care WESTERN ELECTRICIAN.

## WANTED.

Salesmen who are traveling through the U ited States and Canada, to sell a side line; something that is sold in every electrical supply house and used in every factory. Sample can be carried in the pocket. Address

**SCOTT BROS. ELECTRIC CO.,**
**55 West Fort Street, Detroit, Mich.**

## WANTED—PARTNER.

The proprietor of an electrical manufacturing business, producing an established and well endorsed line of apparatus accessory to the alternating system, desires the association of gentleman of good reputation and habits, as partner. Must be able to invest a few thousand dollars and his services, both of which are desired for the purpose of pushing our product actively in the market and extending the business. Must be a man of enterprise and push, and preferably with some experience in selling electrical apparatus, and not averse to occasional traveling. Factory excellently equipped and located in large city within 300 miles of Chicago. Profits large and fixed expenses very low. As a legitimate business investment, this will prove, to the proper person, a most desirable opportunity. Address "PROPRIETOR," care WESTERN ELECTRICIAN, 510 Marquette Bldg., Chicago.

## FOR SALE,

### A Modern Electric Light and Power Plant,

Consisting of six 100 H. P. McCormack Cylinder Gate Water Wheels, set in six stone flumes, all in gilt-edged shape, with best of shafting, foundations, brick building, etc., all new. Two Russell Automatic Engines of 450 H. P. capacity, for use in case of emergencies. One 60 H. P. power generator, three alternating dynamos of 3,500 light capacity and seven arc dynamos of 300 light capacity. A five-year city street lighting contract, 100 lights, also excellent commercial patronage. Excellent water power lease for thirty years at $10 per H. P. per year.

A snap for the right man; owners going away. Will bear closest investigation.

Location is a prosperous manufacturing Indiana town of 15,000 people.

Concise and Practical Explanations for Plumbers, Tinners and Hardware Dealers on How to Wire Buildings for Bells, Alarms, Annunciators and for Gas Lighting from Batteries.
*Illustrated with Twenty-two Diagrams.*
By WILLIAM A. WITTBECKER.
Price in Paper, 25 Cents.
Price in Cloth, 50 Cents.

THE growing demand for simple electrical apparatus in dwelling houses, offices and work shops and the need of plain instructions whereby any person without a previous knowledge of electricity may be enabled to undertake their successful installation, has prompted the publication of this little book. It is not intended for the amateur who seeks for nothing but experimental work, neither is it expected to enlighten the expert electrician; but to the person who is seeking for information that will assist him in increasing his daily earnings this little volume is addressed.
The information given is above all else practical, and with a close observance of the directions laid down anyone without the slightest knowledge of electricity should be able to do the work described.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power of their diameter, and produced greater efficiency from whole to half water than any other to as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Wate hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

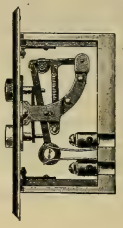
## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.



MORRISON SOUTHERN ELECTRIC CO.,
MANUFACTURERS,
Hoen Building, BALTIMORE, MD.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed.

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.**

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed.

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past.

# Garton Lightning Arresters

W. C. Station Arrester.

## ARE THE STANDARD

For use on any circuit, of any voltage, either direct or alternating current.

Street Railway Superintendents use them!
Central Station Managers require them!
Consulting Engineers specify them!
Manufacturers have adopted them!
Every user recommends them!
Supply men sell them!

## "THEY LAST FOREVER."

Are Unequalled for Durability, Reliability, Efficiency.

During the past four seasons that they have been on the market, they have steadily increased in favor. Below are a few reasons why:

No High Ohmic Resistance to break down after a few discharges!
No Charred Streaks, but ample Carrying Capacity!
No Pivots or Hinges to blister or stick! No Fuses to replace! No Light Copper Balls to melt!
No Inductive Resistance in the discharge path! No Attention Required, are always ready!

St. Ry. Station Arrester.

# HARDTMUTH CARBONS,

**Cored and Solid for Direct Lighting.**

## ...LARGE IMPORTATION JUST ARRIVED...

General Western Agents:

## Chicago Edison Company,

**..DEALERS IN ELECTRIC LIGHTING SUPPLIES..**

**Edison Building, 139 Adams Street, CHICAGO, ILL.**

## *JUST NOW*

Is the time to decide on the Fan Motor you intend to handle this season. Our direct current motor is equal to the best, if its intrinsic merit is considered.

## Annunciators, Medical Farradic Batteries.

MAGNETO, HAND AND POWER

**...GENERATORS...**

**INDUCTION AND SPARK COILS, ETC., ETC.**

WRITE FOR CATALOGUE

## Menominee Electrical and Mechanical Co.,

**MENOMINEE, MICH.**

## Gordon Primary Battery

EXCELS IN

Long Life, Efficiency,
Economy, Adaptability.
It is Absolutely Non Freezing,
Labor Saving,
Free from Local Action,
Freedom from Gases and Odors.
Superior Generation of Energy.

These Batteries are in use by the most prominent Telephone, Fire Alarm and Railroad Companies of America.
Send for descriptive circular and price list.
We guarantee all our Cells.

MANUFACTURED BY

**The Gordon-Burnham Battery Co.,**

**82 West Broadway, New York.**

**ELECTRIC LAMP SIGNS....**

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another. We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**

American Tract Society Building, NO. 150 NASSAU STREET, NEW YORK.

## VULCABESTON CONTROLLER PARTS.

## All Controllers are Insulated with Vulcabeston.

**G. E. 800 and Westinghouse Commutator Rings, Brush Holder Bushings and Field Spools.**

SEND FOR PRICE LIST.

Moulded Mica Trolley Insulating Materials, Frogs, Crossings, Tree Insulators, Weatherproof Sockets, etc.

**H. W. JOHNS MFG. CO.,**

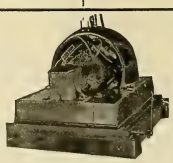
240-242 Randolph St., Chicago, Ill.

Gen. Elec. Co. NEW YORK. PHILADELPHIA. BOSTON. Westinghouse.

## CARD

Generators for Power Transmission or Isolated Lighting.
CARD Generators are all Multipolar and Slow Speed.

AGENTS WANTED IN UNOCCUPIED TERRITORY.



75 K. W. GENERATOR.

## CARD

Multipolar Slow Speed Stationary Motors.
Reversible Motors and Controllers for Rolling Mills, Bridges and Traveling Cranes.

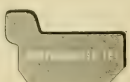
**THE CARD ELECTRIC COMPANY,**

Office and Works, Mansfield, Ohio.

MICA MICA MICA

## Mica, INDIA AND AMBER.

In the sheet and cut to any size or pattern. Mica Washers, Stamped Mica Segments and solid sheet Mica Segments gauged to thickness, for all the standard street railway motors.



**EUGENE MUNSELL & CO.,** Importers Direct from the Mines, 218 Water Street, New York.

**Have You Heard About**

## New Orient Lamps?

**WELL, LISTEN!**

They are made throughout of the very best materials obtainable.

They are made from **start** to **finish** by **skilled** workmen and are mechanically perfect.

They are carefully and thoroughly tested by means of instruments made **especially** for the purpose, and **ONLY PERFECT** Lamps are allowed to leave the factory.

They are **uniform in efficiency, voltage** and **candle-power** and are fully guaranteed.

They are of **HIGH EFFICIENCY** and you will **save money** by **using them.**

They are **not** the **lowest priced** lamps on the market, but **they ARE** the **CHEAPEST** lamps obtainable, if the **ratio of light given off** to **the current consumed** is taken into consideration.

We want you to know about these things, and if you can find it to your advantage to deal with us, we would be pleased to hear from you.

## The Orient Electric Co.,

## THE ELECTRIC STORAGE BATTERY CO.,

Drexel Bldg., - - - - - Philadelphia, Pa.

# The S. K. C. Two Phase Alternating Current System.

THE FIRST AND ONLY COMPLETE AND PERFECTED SYSTEM BY WHICH LIGHT AND POWER CAN BE SUPPLIED FROM THE SAME GENERATOR AND CIRCUITS. POWER TRANSMISSION AND DISTRIBUTION MADE PRACTICAL AND COMMERCIALLY SUCCESSFUL.

## POINTS OF SUPERIORITY.

Our system is much more simple and consequently more durable than any other, either direct or alternating.

Our generator is much more efficient than any other alternator, requires less attention and absolutely no supplies except lubricant for bearings.

It is practically self-regulating without the loss of energy involved by compounding or compensating. Other multiphase machines require a balance of load.

We have entirely eliminated from our generators the usual sources of trouble, expense and interruption of service: i. e., the revolving armature, commutator, collector rings, brushes, etc.

They can be built for any voltage from 110 for isolated lighting to the high voltages required for power transmission work; in latter case doing away with the expense and loss of step-up transformers; the usual central station machine can be connected at will for either 1,000 or 2,000 volts.

The motors excel in simplicity of construction; in starting torque and simplicity of starting device; in efficiency in the manner in which they take current in proportion to their load, and in uniformity of speed under different conditions of load.

Our transformers insure satisfactory service and the greatest economy. We are prepared to fill all orders promptly, and carry a full stock of transformers in Chicago.

**Patents**—Our apparatus is novel; different from anything heretofore made, and covered by patents that fully protect us and our customers. We are not infringing patents belonging to others, and shall avail ourselves of the patents under which we operate to protect ourselves from piracy by other manufacturers.

## WANTED.

**An Excellent Opportunity for a Young Man!**

The advertiser controls valuable electric heating patents and irons, soldering outfits, etc., and wants a young man, electrically educated and with some capital, to join him in pushing the electrical heating business already organized and established and with good orders on hand. A salary would be paid and young man and advertiser (business man) can control this business. Address "Heater," care WESTERN ELECTRICIAN.

## WANTED.

Situation as superintendent of an electric light plant, or combined electric light and water works plant. Have had considerable experience in both. Have held present position over 4 years and only desire to change on account of my wife's health. Am strictly temperate and can furnish best of references as to character and ability. Address "Water Works," care Western Electrician, 510 Marquette Bldg., Chicago.

## WANTED.

Position as practical stationary engineer, in electric light plant preferred. Can give best of references. Address

E. R. McGaughey,
Exchange Hotel, WACO, TEXAS.

## POSITION WANTED.

By a practical electrician of 14 years' experience, to take charge of winding, assembling or repairing dynamos, motors, arc lamps, or short railway work. Familiar with all leading systems. Married man. Can furnish best of references. Address S. T. H., care WESTERN ELECTRICIAN.

## WANTED.

Three traveling salesmen: must understand meter and transformer work. State experience, salary expected, furnish reference. Must be reliable, industrious, sober and hustlers. Address, "D 2," care WESTERN ELECTRICIAN.

## WANTED.

One 30 light and 40 light armature core for Standard Electric Co.'s arc dynamo. State condition and lowest cash price.

CHICAGO ARMATURE CO.,
107 So. Canal St., CHICAGO.

## WANTED—PARTNER.

The proprietor of an electrical manufacturing business, producing an established and well endorsed line of apparatus accessory to the alternating system, desires the association of gentleman of good reputation and habits, as partner. Must be able to invest a few thousand dollars and his services, both of which are desired for the purpose of pushing our product actively in the market and extending the business. Must be a man of enterprise and push, and preferably with some experience in selling electrical apparatus, and not averse to occasional traveling. Factory excellently equipped and located in large city within 300 miles of Chicago. Profits large and fixed expenses very low. As a legitimate business investment, this will prove, to the proper person, a most desirable opportunity. Address "PROPRIETOR," care WESTERN ELECTRICIAN, 510 Marquette Bldg., Chicago.

## A CARD.

I wish to announce that the Wirt Dynamo Brush patented Sept. 21, 1890, and the use of the name **Wirt** in connection with Dynamo Brushes, is the exclusive property of the undersigned. As there seems to be a disposition on the part of some electrical manufacturers to place a slight value on patent claims, and as the practice of courts and the conduct of our patent office, to some extent has justified this sentiment, it is well to remember that a common law copy-right constitutes a kind of property, the ownership of which the courts have not been slow nor lax in defending.

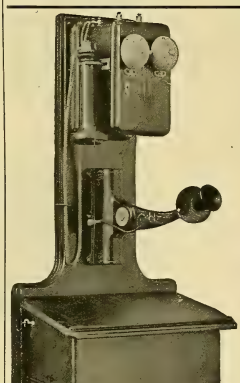
# SOLD ON... THEIR MERITS.



In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters, hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

| Test of a 45-in. Wheel—July 9, '94. | | | | | | |
|---|---|---|---|---|---|---|
| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |

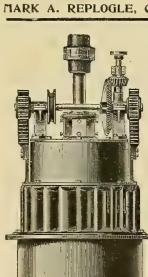
# WATER POWER.

## GOVERNED FOR ELECTRICAL WORK.

The limit of government of water-power is often determined by the design and construction of plant. Consult us if possible before completing your plans.

With REPLOGLE'S COMPOUND REGULATORS we are prepared to undertake and guarantee the government of water-power for all purposes, including Electric Railway, Power and Lighting Plants. We make and sell all of Replogle's Electrical and Mechanical Governors and other devices for the government of water-power. Expert advice furnished on application. If results of your present system are not satisfactory, write us. Address all inquiries to

THE REPLOGLE GOVERNOR WORKS,
MARK A. REPLOGLE, Chief Engineer. AKRON, OHIO.



# THE McCORMICK TURBINE,

On Vertical or Horizontal Shaft,
Especially Adapted for Electric Work.

Gives more power as to diameter with a higher percentage of useful effect than any other water-wheel heretofore made. All sizes, right and left hand, are built from patterns perfected under systematic tests in the Holyoke Testing Flume.

Parties having power plants which are unsatisfactory, and those contemplating the improvement of powers, will find it to their interest to confer with me, as I am willing to guarantee results where others have failed, no matter what make of turbine has been in use. STATE REQUIREMENTS AND SEND FOR CATALOGUE.

S. MORGAN SMITH, York, Pa.

Estimates furnished for complete power plants and results guaranteed.

Consulting Engineers specify them!
Manufacturers have adopted them!
Every user recommends them!
Supply men sell them!

St. Ry. Station Arrester.

## "THEY LAST FOREVER."

Are Unequalled for Durability, Reliability, Efficiency.

During the past four seasons that they have been on the market, they have steadily increased in favor. Below are a few reasons why:

No High Ohmic Resistance to break down after a few discharges!
No Charred Streaks, but ample Carrying Capacity!
No Pivots or Hinges to blister or stick! No Fuses to replace! No Light Copper Balls to melt!
No Inductive Resistance in the discharge path! No Attention Required, are always ready!

Write for Prices, or any Information, to your Supply Dealer, or to

# HARDTMUTH CARBONS,

**Cored and Solid for Direct Lighting.**

## ...LARGE IMPORTATION JUST ARRIVED...

General Western Agents:

## Chicago Edison Company,

**..DEALERS IN ELECTRIC LIGHTING SUPPLIES..**

**Edison Building, 139 Adams Street, CHICAGO, ILL.**

## Electric Light Supplies.

## Electric Railway Supplies.

## House Goods Supplies.

Write for Catalogues and Prices.

## WESTERN ELECTRIC CO.

**CHICAGO. NEW YORK.**

## ALPHA ELECTRIC LAMP SIGNS....

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another. We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**

American Tract Society Building, NO. 150 NASSAU STREET, NEW YORK.

## "J.P." STYLES of TROLLEY HANGERS.

Strong and Light,
Highest Grade Workmanship and Material.

**Moulded Mica Insulation.** **Vulcabeston Controller Parts, etc.**

*SEND FOR REVISED PRICE LIST.*

## H. W. JOHNS MFG. CO.,

**240-242 Randolph Street, CHICAGO.**

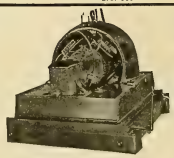
NEW YORK. PHILADELPHIA. BOSTON.

No. 900 No. 905.

## CARD

Generators for Power Transmission or Isolated Lighting.
CARD Generators are all Multipolar and Slow Speed.

AGENTS WANTED IN UNOCCUPIED TERRITORY.



75 K. W. GENERATOR.

## CARD

Multipolar Slow Speed Stationary Motors.
Reversible Motors and Controllers for Rolling Mills, Bridges and Traveling Cranes.

**THE CARD ELECTRIC COMPANY,**
Office and Works, Mansfield, Ohio.

# BUCKEYE

## INCANDESCENT LAMPS

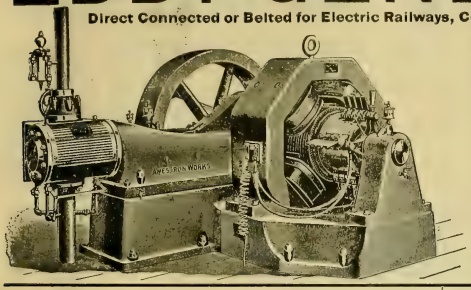
QUALITY UNEQUALED.

FACTORY PRODUCTION TRIPLED.

Monadnock Building, Chicago. **THE BUCKEYE ELECTRIC CO., Cleveland, O.**

# EDDY GENERATORS.

**Direct Connected or Belted for Electric Railways, Central Stations, Isolated Lighting or Power Plants.**



## Eddy Motors—Slow, Medium or High Speed.

**We build all necessary apparatus for the transmission of Electrical Power through factory or other buildings.**

## The Eddy Electric Mfg. Co.,

**WINDSOR, CONN.**

NEW YORK, H. B. Coho & Co., Mail and Express Building.
PHILADELPHIA, Walter C. McIntire & Co., 506 Commerce St.
BOSTON, G. M. Angier & Co., 64 Federal St.
ELMIRA, S. N. Blake.
ST. LOUIS, Western Electrical Supply Co.
KANSAS CITY, W. T. Osborn.
CINCINNATI, O., Nevada Bldg., John A. Stewart.
CHICAGO, 305 Dearborn St., Wallace & Hine, Managers.

QUICK BREAK.

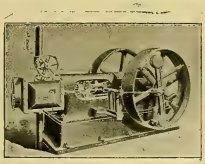
**SEND US THAT ORDER** you were going to place for supplies. Our Cut-Outs are just what you are looking for. We also make a Specialty of all Arc Lighting Supplies.

## The Phila. Electrical & Mfg. Co.,

**2010 Jones St., PHILADELPHIA, PA.**

SALES AGENTS:
Metropolitan Electric Co., 186-188 5th Ave., Chicago, Ill.
Western Electrical Supply Co., 10 and 12 N. 9th St., St. Louis, Mo.

(134)



## Pointer No. 4.

Our engine will run a dynamo from one pulley and furnish power from the other. No flickering lamps, either. Will other engines do it? We don't think.

CATALOGUES FREE.
"A" ENGINES, "B" DYNAMOS.

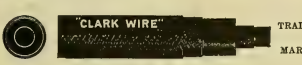
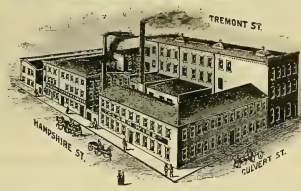
THE
# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.





In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

# PROPOSALS.

Sealed proposals will be received by the West Chicago Park Commissioners, at their office in Union Park, until 4 o'clock p. m. of Tuesday, May 12th, 1896, for furnishing and installing the following apparatus and machinery comprising the Arc Light Plant to be located in Garfield Park:

Sec. "A"—500 H. P. Water Tube boilers in two units.

Sec. "B"—Automatic Stoker and Furnace for same.

Sec. "C"—Coal and Ash Conveyors and Storage Bins.

Sec. "D"—Condensers and Pumps.

Sec. "E"—Open Heaters and Steam Separators.

Sec. "F"—650 H. P. Cross Compound Corliss Steam Engine.

Sec. "G"—Jack-Shaft, Clutch-Pulleys and Rope-Drive.

Sec. "H"—7 125 Light Arc Dynamos or 6 150 Light Arc Dynamos.

Sec. "I"—750 Series, Double-service, 2,000 C. P. Arc Lamps.

Sec. "J"—300,000 feet Underground Cable, 30,000 feet Rubber Covered Wire.

Sec. "K"—Marble Switchboard.

Sec. "L"—Masonry for Foundations, etc.

Sec. "M"—Two-ton Pulley Block and Crane.

In accordance with plans and specifications on file in the office of Mr. Foree Bain, electrical and mechanical engineer, Monadnock Block, Chicago, Ill., a copy of said plans and specifications being also on file in the office of the Engineer of said Park Commissioners in Union Park.

Bidders may figure on the work under each section, or as many sections of the specifications as herein named as they may desire. Contracts will be awarded under each section separately.

The time specified for completing the work under the several sections varies from 90 to 120 days from the notice to proceed, and the contractor will be required to furnish a bond from a surety company doing business in the City of Chicago and acceptable to the West Chicago Park Commissioners, in the sum equal to one-half the value of the contract price, guaranteeing the faithful performance of the contract in accordance with the specifications and within the time specified. He will also be required to furnish a similar bond to the satisfaction of the Commissioners, guaranteeing them against any damage done to any Park property or any damage that may result from accident to any person or thing through the operation of this contractor in the performance of his contract, and also guaranteeing the Commissioners against any liability, damage or loss through any patent suits for royalties or any litigation that may arise from the use of any device, machinery or apparatus that may be furnished by the said contractor.

The proposals must be made out upon blank forms contained in each section of the specifications, which must be filled out by the contractor, thus completing his proposal. Any portion that can not be guaranteed by the contractor must be plainly erased before being submitted as a guaranteed proposal.

Proposals must be sealed and addressed to the West Chicago Park Commissioners, and endorsed on the envelope in the wording heading each specification, for instance: Proposals to furnish boilers must be endorsed "Boilers, Section A;" to furnish boilers and engines must be endorsed "Boilers and Engines, Sections A and F."

The proposals must be accompanied with 5 per cent. of the amount of the bid, which must be in currency or a certified check, drawn on a responsible bank doing business in the City of Chicago and made payable to the West Chicago Park Commissioners.

No proposals will be considered unless the terms of the specification in regard to submitting proposals have been strictly complied with, and the parties tendering it shall furnish evidence satisfactory to the commissioners of his or their ability, and that he has the necessary facilities, together with sufficient pecuniary resources, to fulfill the conditions of the contract should it be awarded.

The West Chicago Park Commissioners reserve the right to reject any and all bids.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

**ELECTRICIAN PUBLISHING COMPANY, - - - Suite 510 Marquette Building, Chicago, Ill.**

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.** . . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past. . . . . .

# PONY TELEPHONE RECEIVERS.

CUT FULL SIZE.

THIS telephone receiver weighs only 6 ounces. The spool is wound with silk wire to the standard resistance of 75 ohms. The binding posts will not get loose. The shell of the receiver is of cast-steel and is strongly magnetized. The adjustment is rigid and will not become changed even by the greatest carelessness.

**It is a perfect working telephone receiver, and one that costs ten times as much will not work better.**

With suitable signal apparatus, this telephone receiver makes a complete telephone outfit, as it can be used as a transmitter and receiver combined.

**The price,** as well as the instrument, is small. We always make low prices on our specialties, in order to make them up in quantities. **55 cts.**

Postage, if sent by mail, 8 cents extra.

We make a number of different styles of telephone outfits, suitable for every length of line.

Write us for anything needed in the electrical line, as we keep a large assortment for all requirements.

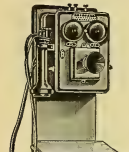
## Standard Telephone and Electric Co.

MADISON - - WISCONSIN,

MANUFACTURERS OF THE



**Standard Loud-Speaking, Long-Distance and Exchange Telephone.**

**Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.**

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

**Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.**

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

**Standard Telephone Exchange Switchboards**

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Nickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The circuits of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.

# ELECTRICIAN PUBLISHING CO.,

SUITE 510 MARQUETTE BUILDING, CHICAGO.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations........$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations........$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages........$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition........$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition........$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a New Book, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches........$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches........$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-book. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables........$1.00
Gives more *Practical* information on the subject than any work published to date The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations........$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo. cloth........$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth........$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone........$0.50

**Bottone, S. R.**—The Dynamo. How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations........$1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to ........$0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers........$0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth........$2.00
Paper........1.00

**Cox, Frank P.**—Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated........$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged........$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways. Second edition, revised and enlarged. 183 illustrations........$2.50

**Desmond, Chas.**—Electricity for Engineers Part I. Constant Current A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition........$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards........$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations........$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition........$3.00
Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.
Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892........$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition........$2.00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations........$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised..$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations........$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations........$3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions........$1.25

**Hopkins, Geo. M.** — Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated........$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy........$0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs, Translated from the French. With additions by C. J. Wharton. With illustrations........$2.50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations ........$5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivision and Distribution. A practical handbook. Third edition........$3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated.$0.50
[Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated........$1.00

**Kapp, Gisbert.**—Dynamos, Alternators and Transformers. 138 illustrations........$4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892... $7.25
In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather ........$1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations........$2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

**Lockwood, T. D.**—Practical Information for Telephonists. 12mo, cloth. N. Y........$1.00

**Meadowcroft, W. H.**—The A. B. C. of Electricity. 36 illustrations........$0.50

**Martin, T. C.**—Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 500 pp. 300 Illustrations, second edition........$4.00

**Martin, T. C. and Wetzler, J.**—The Electric Motor and its Applications. Third edition. With an Appendix on the Development of the Electric Motor since 1888. By Dr L. Bell. 300 Illustrations........$3.00

**Maver, and Davis, M. M.**—The Quadruplex. With Chapters on the Dynamo-Electric Machine in Relation to the Quadruplex. The Practical Working of the Duplex Telegraph Repeaters and the Wheatstone Automatic Telegraph. 63 illustrations........$1.50

**McClure, J. B.**—Edison and his Inventions, with Full Explanations of the Telephone, Phonograph, Tasimeter. Electric Light and all his Principal Discoveries, etc..$1.00

**Niaudet, Alfred.**—Elementary Treatise on Electric Batteries. Translated from the French by L. M. Fishback. Illustrated........$2.50

**Noll, Augustus.**—How to Wire Buildings. A manual of the art of interior wiring. Illustrated........$1.50

**Pope, Franklin Leonard.**—Modern Practice of the Electric Telegraph. A technical Hand-book for Electricians, Managers and Operators. 185 illustrations. 14th edition, rewritten and enlarged........$1.50

**Prindle, H. B**—A Popular Treatise on the Electric Railway of to-day. Fully illustrated........$0.25

**Russell, Stuart A.**—Electric Light Cables and Distribution of Electricity. 107 illustrations........$2.25

**Salomons, Sir David.**—Electric Light Installations. Vol. 1. The Management of Accumulators. A Practical Handbook. 7th edition, revised and enlarged. With illustrations. 12 mo, cl. London, 1893........$1.50

**Sloane, T. O'Conner.**—Electricity Simplified. The Practice and Theory of Electricity, including a Popular Review of the Theory of Electricity, with Analogies and Examples of its Practical Application in every-day life. Illustrated........$1.00

**Sloane, T. O'Connor.**—The Standard Electrical Dictionary. A Popular Dictionary of Words and Terms used in the practice of Electrical Engineering, 350 illustrations.$3.00

**Sloane, T. O'Connor.**—Electric Toy Making for Amateurs, including Batteries, Magnets, Motors, Miscellaneous Toys ........$1.00

**Sloane, T. O'Connor.**—The Arithmetic of Electricity. A Manual of Electrical Calculations by Arithmetical Methods, including numerous rules, examples and tables in the field of practical electrical engineering and experimenting. Third edition, revised........$1.00

**Tesla, Nikola.**—Experiments with Alternate Currents of High Potential and High Frequency. A lecture delivered before the Institution of Electrical Engineers, London. With a portrait and biographical sketch of the Author Illustrated........$1.00

**Tesla, Nikola.**—Lectures on the Electro-Magnet. Illustrated, ........$1.00

**Thurston, Prof. R. H.**—Stationary Steam Engines. especially adapted to Electric Lighting Purposes. Treating of the development of Steam Engines, the Principles of Construction and Economy, with description of Moderate and High Speed Engines. With many folding plates........$1.50

**Thomson, Prof. Elihu.**—What is Electricity? Illustrated.$0.25

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. A Series of Lectures, with an introduction by Franklin L. Pope. 16mo. Numerous illustrations, fancy boards (Van Nostrand's Science Series, No. 66)........$0.50

**Thompson, Sylvanus P.**—Polyphase Electric Currents and Alternate-Current Motors. Mailed to any address in the world on receipt of........$3.50

**Thompson, Sylvanus P.**—Recent Progress in Dynamo-Electric Machines, being a Supplement to Dynamo-Electric Machinery. 16mo. (Van Nostrand's Science Series, No. 75)........$0.50

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. Fourth edition, revised and rewritten. Numerous illustrations and 29 plates. 1,000 pages........$6.00

**Trevert.**—How to Make Electric Batteries at Home. Illustrated........$0.25

**Urquhart.**—Electro-Plating. A Practical Hand-book on the Deposition of Copper, Silver, Nickel, Gold, Aluminum, Brass, Platinum, etc. Second edition; carefully revised, with additions........$2.00

**Walker, F.**—Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous illustrations. 16mo, boards. (Van Nostrand's Science Series, No. 98).$0.50

**Webb, H. L.**—A practical Guide to the Testing of Insulated Wires and Cables. Illustrated........$1.00

**Webb, Herbert Laws.**—Telephone Hand-book, Illustrated. 12mo, cloth. Chicago, 1895........$1.00
The only complete work on the Telephone. All possible information for any one interested in Telephones and how to make and operate them.

**92 Congress St., East DETROIT, MICH.**

## THE BEST

Is always the cheapest.

**OUR MOTTO IS:**
**"HOW GOOD—NOT HOW CHEAP."**

## New Orient Lamps

**ARE SUPERIOR IN QUALITY.**

**WE make them—YOU need them.**
**YOU have the money—WE need it.**
**LET'S TRADE.**

**THE ORIENT ELECTRIC CO., Youngstown, Ohio.**

Chicago Office: 1628 Monadnock. Thad. S. Lane, Mgr.

# CUTOUTS.

Just a little Porcelain,
Just a little Brass,
Make a first-class Cutout,
Which is sure to pass.

The above is the first effort of our new poet, to whom we pay big money made by selling cutouts at less than cost.

**SEND FOR CATALOGUE**

## Anchor Electric Company,

*71 FEDERAL ST., BOSTON, MASS.*

NEW YORK OFFICE.
26 Cortlandt St., Room 1105.

CHICAGO OFFICE.
1654-5-6 Monadnock Block.

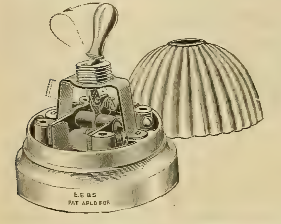
# FOR SALE CHEAP.

A small holding of PREFERRED STOCK of the "Electrical Engineer" of New York.

**For full information and particulars address**

**"Stockholder," care Western Electrician, Suite 510 Marquette Bldg., Chicago.**

# E. E. & S. CANOPY SWITCH.



This Switch is in all respects **A KNIFE SWITCH** placed **UNDER** a **COVER.** The break is quick and positive, entirely out of the control of the hand. Contacts and blades are made of pure copper. Easily wired and well proportioned.

Send us your orders and they will be promptly filled.

No. 5 Motor, wound for 110 volts, with either 10 or 12-inch fan - - 10.00
No. 5 Outfit, consisting of one No. 5 Motor with fan, two No. 6 Motor batteries with one charge of solution which will run motor 160 hours, price, complete outfit - - - - - - - - - - - - - - 18.00
Wire fan guard, extra - - - - - - - - - - - - - - - - 1.00

**The Motor** is a guaranteed first-class, nicely finished and efficient. We furnish either four or six blade fans, as desired.

**The No. 6 Battery** is something new and will produce a current of electricity equal to a dynamo current for motive power at a less cost than charged by established light and power companies or any other primary battery on the market. It is easily maintained, solution costs about 30 cents per cell to recharge. It is furnished in a concentrated form, requiring nothing but the addition of six times its bulk of water. **See circular for full information.**

Battery complete, hard rubber cell 7x7x9 in hes, 1,000 ampere hour capacity, price $6.50.

**Send address for descriptive circulars or two 2-cent stamps for catalogue.**

**SIEMENS' Band Arc Lamps for Direct and Alternating Current, Electric Mining Locomotives, Steam Locomotives, etc., etc.**

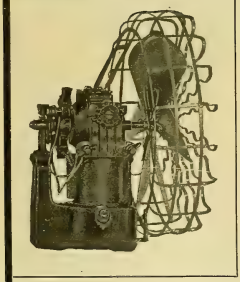
Complete Electric Railway Equipments under Siemens' Patents:

**SIEMENS' UNDERRUNNING TROLLEYS.**

(For Description compare article in the WESTERN ELECTRICIAN, Feb. 22, 1896, page 88.)

The Siemens Contact Bar is safer than the ordinary trolley, and the overhead construction is less costly. Dr. Ernst Werner von Siemens was the pioneer in Electric Traction. He built his first Electric Railway in 1879. Write for Catalogues and further information to

## SIEMENS & HALSKE ELECTRIC CO. OF AMERICA, 98 Jackson St., Chicago.



*LOTS OF OTHER FAN OUTFITS*

# BUT ! ! !

The C-W FAN OUTFITS have 6 BLADE, 12 and 16-INCH FANS instead of the usual 10 and 15-inch 4 Blade.

They will therefore do **BIG WORK** if you want it.

The Fan guard is ornamental and substantial and close enough mesh to prevent a Fan blade from flying out should it, by chance, be broken while in operation.

The complete Fan Outfit may not address itself to your eye as pleasantly, as to design and shape, as some others, it having been considered unwise to sacrifice stability to enhance its appearance.

If you want a Fan Outfit for this season and will want it again next season, and several following seasons, you want the **C-W.** Let our Selling Agents talk to or write you.

## WANTED.

A first-class electrician and superintendent. One who understands the management of men and has had practical experience in both. Must have a reputation and best of references. State particulars with price. None but the best need apply. Address "Carroll," care WESTERN ELECTRICIAN, Suite 510 Marquette Bldg., Chicago.

## WANTED.

Situation as superintendent of an electric light plant, or combined electric light and water works plant. Have had considerable experience in both. Have held present position over 4 years and only desire to change on account of my wife's health. Am strictly temperate and can furnish best of references as to character and ability. Address "Water Works," care Western Electrician, 510 Marquette Bldg., Chicago.

## WANTED.

Position by young man having had large practical experience with electric lighting and power machinery, and understands arc light repairing; also experienced in the care of steam plants. Can give good references.

Address "J. V. E.,"
Care WESTERN ELECTRICIAN.

## CORRESPONDENCE

Is solicited with companies needing the services of a superintendent or manager. Well known references will be named showing an experienced and reliable man. Have successfully operated some of the best plants and will name them as reference. Past record will show that I am thoroughly familiar with repair details and am first-class electrical and mechanical engineer. "Satisfaction," care WESTERN ELECTRICIAN, Suite 510 Marquette Bldg., Chicago.

PEOPLE'S TELEPHONE CO.,
KNOXVILLE, TENN.

## PROPOSALS.

Sealed proposals will be received by the West Chicago Park Commissioners, at their office in Union Park, until 4 o'clock p. m. of Tuesday, May 12th, 1896, for furnishing and installing the following apparatus and machinery comprising the Arc Light Plant to be located in Garfield Park:

Sec. "A"—500 H. P. Water Tube boilers in two units.

Sec. "B"—Automatic Stoker and Furnace for same.

Sec. "C"—Coal and Ash Conveyors and Storage Bins.

Sec. "D"—Condensers and Pumps.

Sec. "E"—Open Heaters and Steam Separators.

Sec. "F"—650 H. P. Cross Compound Corliss Steam Engine.

Sec. "G"—Jack-Shaft, Clutch-Pulleys and Rope-Drive.

Sec. "H"—7 125 Light Arc Dynamos or 6 150 Light Arc Dynamos.

Sec. "I"—750 Series, Double-service, 2,000 C. P. Arc Lamps.

Sec. "J"—300,000 feet Underground Cable, 30,000 feet Rubber Covered Wire.

Sec. "K"—Marble Switchboard.

Sec. "L"—Masonry for Foundations, etc.

Sec. "M"—Two-ton Pulley Block and Crane.

In accordance with plans and specifications on file in the office of Mr. Foree Bain, electrical and mechanical engineer, Monadnock Block, Chicago, Ill., a copy of said plans and specifications being also on file in the office of the Engineer of said Park Commissioners in Union Park.

Bidders may figure on the work under each section, or as many sections of the specifications as herein named as they may desire. Contracts will be awarded under each section separately.

The time specified for completion of the work under the several sections varies from 90 to 120 days, from the notice to proceed, and the contractor will be required to furnish a bond from a surety company doing business in the City of Chicago and acceptable to the West Chicago Park Commissioners, in the sum equal to one-half the value of the contract price, guaranteeing the faithful performance of the contract in accordance with the specifications and within the time specified. He will also be required to furnish a similar bond to the satisfaction of the Commissioners, guaranteeing them against any damage done to any Park property or any damage that may result from accident to any person or thing through the operation of this contractor in the performance of his contract, and also guaranteeing the Commissioners against any liability, damage or loss through any patent suits for royalties or any litigation that may arise from the use of any device, machinery or apparatus that may be furnished by the said contractor.

The proposals must be made out upon blank forms contained in each section of the specifications, which must be filled out by the contractor, thus completing his proposal. Any portion that can not be guaranteed by the contractor must be plainly erased before being submitted as a guaranteed proposal.

Proposals must be sealed and addressed to the West Chicago Park Commissioners, and endorsed on the envelope in the wording heading each specification, for instance: Proposals to furnish boilers must be endorsed "Boilers, Section A;" to furnish boilers and engines must be endorsed "Boilers and Engines, Sections A and F."

The proposals must be accompanied with 5 per cent. of the amount of the bid, which must be in currency or a certified check, drawn on a responsible bank doing business in the City of Chicago and made payable to the West Chicago Park Commissioners.

No proposals will be considered unless the terms of the specification in regard to submitting proposals have been strictly complied with, and the parties tendering it shall furnish evidence satisfactory to the commissioners of his or their ability, and that he has the necessary facilities, together with sufficient pecuniary resources, to fulfill the conditions of the contract should it be awarded.

The West Chicago Park Commissioners reserve the right to reject any and all bids.

HARVEY T. WEEKS, Pres.
Attest: GEO. F. TALTY, Secy.

**Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.**

Sole Licensees for sale of **Hilde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

**Standard Telephone Exchange Switchboards**

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

**Correspondence Solicited.** Address

# SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**
**Impossibility of Packing under any Conditions;**
**Sensitiveness and Clearness of Articulation.**
**Least Affected by Induction of any Instrument now on the market.**
**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

# The Hawley Down Draft Furnace,

## SMOKELESS AND ECONOMICAL.

We would like to interest you sufficiently to try our furnace on one of your boilers, subject to the following:

WE GUARANTEE:

1st. To consume 95 per cent. of the smoke burning any grade of bituminous coal.

2d. To burn from 20 to 45 pounds of coal per hour per square foot of grate surface with good economy (according to draft.)

3d. Will evaporate 10 per cent. more water per pound of coal than can be done by **any other method.**

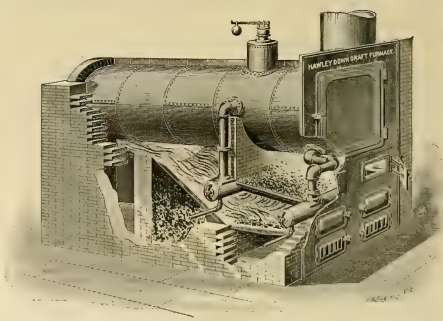
4th. To increase the capacity of the boilers from 35 to 75 per cent. over the rating.

5th. Will furnish a uniform temperature of more than 2,500 deg. Fahrenheit under all parts of the boiler.

6th. Will show a saving of from 10 to 40 per cent. in cost of fuel, according to condition of plant and kind of fuel used.

7th. No repairs.

**Should our furnaces fail to do as guaranteed, we will remove them and replace the former setting at our expense.**



**We will upon application forward to you our illustrated catalogue containing some very valuable hints on the care of boilers.**

## THE BALL & WOOD COMPANY,

Builders of Improved Automatic Cut-Off Engines.

REPRESENTATIVES:

FOR TEN YEARS THE STANDARD

P&B

# INSULATING COMPOUNDS

USED BY THE LARGEST ELECTRICAL MANUFACTURERS IN THE WORLD.

Insulating TAPE

Water, Acid and Alkali Proof.

P&B

Insulating Paper

Strong, Durable and Effective.

## ARMATURE AND FIELD COIL VARNISH

**Made of the Highest Ingredients. The Best in the Market.**

Sole Agents for U. S. and Canada for the Celebrated "Ship" Carbons.

## THE STANDARD PAINT CO.,

**SOLE MANUFACTURERS,**

81-83 JOHN STREET, NEW YORK.

P&B

Metropolitan Electric Company,
**GENERAL WESTERN AGENTS,**
186-188 Fifth Avenue, Chicago.

# SHIELD BRAND

**Moisture-Proof Feeder Cables.**

**Next in quality to Rubber Covered Wire.**

**Not Affected . . . . .**

**By**

**Climatic Changes.**

**MAGNET WIRES**

(All sizes and shapes).

**Weather-Proof Line, Annunciator, Office and Damp-Proof Office Wires.**

• • •

**House Goods Supplies of all descriptions.**

Our trade mark (registered) is placed on the tag attached to each coil or reel. None genuine without it.

. . . . . **IN THE** . . . . .

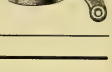
# HERCULES TROLLEY WIRE

**We have succeeded in producing, with the aid of the most improved mechanical devices and care in manufacture, a quality of wire that will be found particularly serviceable on account of its high conductivity and great strength.**

# The Ansonia Electrical Co., Ansonia, Conn.

"Upon my life it will do wondrous well."—*Shakespeare.*

## MEDBERY OVERHEAD RAILWAY MATERIAL.



We claim a great deal for the "Medbery," but the single fact that all we claim is carried out to the letter is what makes it the "standard" for superior and economical equipment.

**MASON ELECTRIC EQUIPMENT CO., Selling Agents, 307 Dearborn St., Chicago, Ill.**

Hoefgen, Moxham & Co., 80 William St., N.Y. Joshua Hendy Mach. Wks., San Francisco, Cal. Manufactured by The Fiberite Co., Mechanicville, N. Y.

## A New Era in Electric Arc Lighting.

# The "Pioneer" Enclosed Lamp

(FOR INCANDESCENT CIRCUITS.)

PIONEERS IN ENCLOSED ARC LIGHTING — THE PIONEER — TRADE MARK

Burns from 100 to 150 HOURS without change of carbons.
Saves $15 to $20 annually, per lamp, in carbons and trimming.
Consumes only 4 to 5 amperes of current.
Distributes perfectly, saves in insurance.
Economical, noiseless, shadowless, steady.
Color of daylight, clean, simple, safe, inexpensive.

# A Good Thing 4-U-2-C.

OUR EXHIBIT IN SEC. C, SPACE 161, AT THE NATIONAL ELECTRICAL EXPOSITION, NEW YORK.

# PARTRICK & CARTER CO., PHILADELPHIA,

Manufacturers of Electrical House Goods.

# SEVEN THOUSAND

Manhattan Arcs in service. One hundred Edison Central Stations. One pair of half-inch carbons will burn one hundred and fifty hours; will burn singly on incandescent circuits, avoiding the necessity of burning two lamps in series. A perfect diffusion of light is obtained by the use of double enclosed globes. Lamp is fire-proof and absolutely noiseless. Lamps to burn in series on circuits from two hundred to five hundred and fifty volts. Length twenty-four and thirty-seven inches.

MANHATTAN

Enclosed Arc Lamps.

Put in a new carbon and trim it once every one hundred and fifty hours. Figure what that will save you.

• • •

**We have on hand five hundred Incandescent Arc Lamps of all makes, which we have displaced by "Manhattans," which we offer complete at $3.00 each.**

• • •

# Have You Read . . .

**THE LATEST AND MOST PRACTICAL BOOK ON TELEPHONY? IT IS—**

# THE TELEPHONE HAND-BOOK,

**BY HERBERT LAWS WEBB,**

*Member of the American Institute of Electrical Engineers, and of the Institution of Electrical Engineers, London.*
*Author of "A Practical Guide to the Testing of Insulated Wires and Cables."*
*Joint Author of "Electricity in Daily Life."*

**146 PAGES. 138 ILLUSTRATIONS. CLOTH. HAND-BOOK SIZE. PRICE, POSTAGE FREE, $1.00.**

## CONTENTS:

The Invention of the Telephone. Sound Waves. Articulate Speech. Electric Telephony. The Bell Telephone. The Microphone. Current Induction. Electromagnetic Induction. The Induction Coil; its use in the Telephone Transmitter. The Complete Telephone Circuit. Magnet Telephones. The Bell Telephone Receiver. Other Forms of Magnetic Telephones. The Gower, Ader and D'Arsonval Receivers. Mercadier's Bi-telephone, The Siemens, Kotyra, Neumayer and Bottcher Receivers. Carbon Transmitters. The Blake Transmitter. The Long-distance Transmitter. The Solid-back Transmitter. The Berliner Transmitter. The Cuttriss Transmitter. Various European Transmitters. The Efficiency of Carbon Transmitters. Batteries for Telephone Work. Open Circuit Batteries. Closed Circuit Batteries. The Practical Management of Batteries. Magneto Bells. Automatic Switches. Telephone Line Construction. Metallic Circuits. Underground Wires. Lightning Arresters. Inside Wiring. Installation of Telephone Instruments. Inspection and Maintenance. The Condenser; its use in Telephony. Electromagnetic Retardation. Exchange Working. Small Exchanges. Party Lines. The Bridging Bell. Long Distance Telephony. Duplex Telephony. Simultaneous Telegraphy and Telephony. Appendix.

# AMERICAN-BALL ENGINES.

Mr. Frank H. Ball, the well-known steam engine designer, has assumed the management of our business and will add to our present line of steam and electrical machinery a full line of his celebrated engines, specially designed for direct-connected electrical work and adapted to dynamos of our manufacture, thus making complete and symmetrical units.

## AMERICAN ENGINE CO.,

**Bound Brook, N. J.**

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, particularly in its subscription and book departments, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.** . . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past. . . . . .

# A COPPER MINE.

*The Best Investment in the Electrical Business.*

## PROSPECTUS.

**Fact No. 1.**—A great weekly covering the **entire field,** not confined to narrow limits as are those periodicals which make a specialty of some one branch of the trade. * * *

**Fact No. 2.**—One kept up to a **high standard** of excellence through good times and through bad times; the most **liberally illustrated** electrical journal in the world, and the **handsomest typographically.** * * *

**Fact No. 3.**—West of the Alleghanies the paper **eagerly awaited** and thoroughly **read** each week by the electrical public from **1 to 3 days ahead** of its contemporaries in all this territory. **All the news** of the week **already given,** read and digested before other papers arrive. * * *

**Fact No. 4.**—Absolutely **independent;** not engaged in tearing down or building up any one concern; conducted for the trade as a whole, and its mission "*the greatest possible advancement of the electrical science and industry*" in the vast area **monopolized** by its circulation. * * *

**Fact No. 5.**—The **electrical paper** of the **Great West.** No other has ever been able to obtain a foothold in this immense buying section. Many have tried, but one and all have **found the field** already **completely filled** and occupied. * * *

**Fact No. 6.**—A unique position, standing positively **pre-eminent** in the great purchasing sections of the United States. **No other** electrical journal can make a similar claim for **any section** of the country. In the East are several electrical weeklies struggling for supremacy. In the **West** there is **but one** great electrical weekly, and it **covers** the field. * * *

**Fact No. 7.**—West of the Alleghanies a **larger circulation** than **all** of the other electrical journals combined. All the figures so far produced **substantiate** the claim that in this territory its **circulation** is **10 TIMES** that of any other electrical journal.

**Fact No. 8.**—Should you go into **IT** and one other paper, you **can afford** to spend for **western** advertising **10 dollars in IT** where you spend 1 dollar in the other paper.

**Fact No. 9.**—Should you go into all the electrical papers, you **can afford** to spend for **western** advertising as much in **IT** as you spend in **all** the others put together.

**Fact No. 10.**—For **Western** advertising you **cannot really afford** to consider any electrical paper but **IT.** You positively **cannot cover** the field in a thorough manner through any other medium. This is **now plain** to shrewd advertisers.

**Fact No. 11.**—**IT** has a **larger** relative **circulation** in the **East** than has any other electrical paper in the **West.**

Fact No. 12. **EXTRA IMPORTANT.**—If you have but **ONE ADVERTISEMENT** to place, you should **place it** in this **GREAT WEEKLY,** the paper which can give you the **BEST, BIGGEST** and **MOST COMPREHENSIVE CIRCULATION** throughout the length and breadth of the land.

SUCH IS THE.....

WESTERN ELECTRICIAN.

NEVER OVERLOOK IT.

### ....AND BELTED....

CHICAGO OFFICE: 1526 Monadnock. WORKS: Erie, Pa.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations........................$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations..............$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages............................$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition.........................................$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition...............................................$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches ......... .....$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding. 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches ....... ........... ........$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-book. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables.................. ...............$1.00

Gives more *Practical* information on the subject than any work published to date The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations ..................................................$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth.......................$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth........ ........$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone.... ..$0.50

**Bottone, S. R.**—The Dynamo. How Made and How Used A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations...... ........................$1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to ........................................ ....$0 50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers.... ....... ................. ........ $0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth.......... ... .............................. $2.00
Paper .... ......................... . ....... . ... 1.00

**Cox, Frank P.** Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers Illustrated . ................... .....................$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged . ....... ...... .............. ........$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways, Second edition revised and enlarged. 183 illustrations .........$2.50

**Desmond, Chas.**—Electricity for Engineers Part I. Constant Current A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition.................... ........$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards.....................................$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations. .......$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition...............................$3.00

Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.

Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892......................... ...........$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition.....$2 00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations.......$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised ..$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations.... ........$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations .... ... $3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions.....$1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated...........................$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy......... ................ $0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs, Translated from the French. With additions by C. J. Wharton. With illustrations .. ................................$2 50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations ................................ ..............$5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivison and Distribution. A practical handbook. Third edition...........................$3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated.$0.50 [Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated...... .......................$1.00

**Kapp, Gisbert.**—Dynamos, Alternators and Transformers. 138 illustrations....... .. . ........................$4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892.....$7.25

In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather ..................................................$1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations................$2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

**Lockwood, T. D.** Practical Information for Telephonists. 12mo, cloth. N. Y.....................................$1.00

**Meadowcroft, W. H.**—The A. B. C. of Electricity. 36 Illustrations..........................................$0.50

**Martin, T. C.**—Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 500 pp. 300 Illustrations, second edition ............................$4.00

# IMPORTANT NOTICE.

We are glad to announce that Mr. Frank H. Ball, the well-known steam engine designer, has assumed the management of our business, and will at once add to our present line of steam and electrical machinery a full line of his celebrated engines specially designed for direct connected electrical work, and adapted to dynamos of our own manufacture, thus making complete and symmetrical units.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

TO THOSE INTERESTED IN ELECTRIC LIGHTING.

If you haven't read Buckley's "ELECTRIC LIGHTING PLANTS: THEIR COST AND OPERATION," you should order a copy at once. It is the only work of its kind in print and will prove an inseparable companion. It is just the book thousands of men have been waiting for; it will be what you want. 275 pages. Illustrated. Cloth, $2.00. Paper cover, $1.00. Postage free.

**ELECTRICIAN PUBLISHING COMPANY,**
Suite 510 Marquette Bldg., Chicago.

## The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

### CONTENTS.

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in American.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation.—Chapter XI. Telpherage.—Chapters XII, XIII. Latest American Motors and Motor Systems.—Chapter XIV. Latest European Motors and Motor Systems.—Chapter XV. Alternating Current Motors.—Chapter XVI. Thermo-magnetic Motors.—Appendix. The Development of the Electric Motor since 1888.

## There Are Many Switches

In the market, but there are none to compare with the New England.

## AT THE CONVENTION

You will not find a special exhibit of them, but you will find them in use everywhere, and in stock with all the leading dealers in New York City. They are made for service and economy, and are equaled by none.

This switch was first made nearly

**EIGHT YEARS AGO,**

and while others have been trying to make something "just as good"

## THE NEW ENGLAND SWITCH

has stood right up to the mark and done its work day after day in the face of the most bitter opposition in many cases.

Does not this recommend them to you as being the

**BEST SWITCH KNOWN TO-DAY?**

If not, you should pay us a visit at our factory and be convinced for yourself, by the amount of work we are daily turning out in our enlarged sphere as The O. S. Platt Mfg. Co. (incorporated Feb. 18, 1896). We have very greatly increased our facilities, as the market demands a larger production, so that now we are prepared to furnish our customers with the three essential attributes to success embodied in the make-up and delivery of goods, namely:

**QUALITY--QUANTITY--QUICKNESS.**

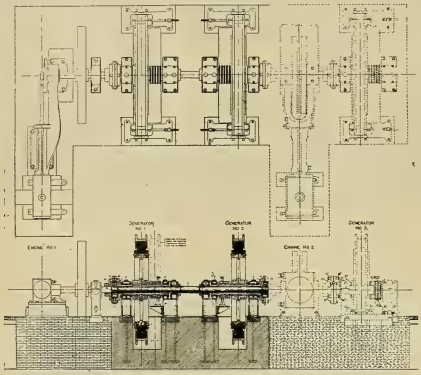
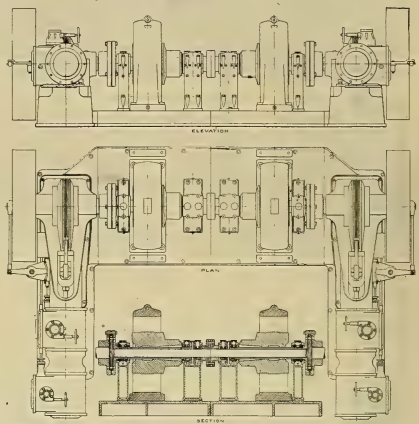
# "Arnold System."

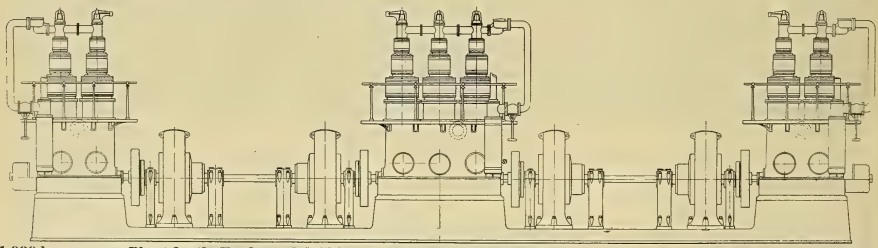
## Less First Cost, Less Real Estate Required, Lower Operating Expenses, Greater Reliability.



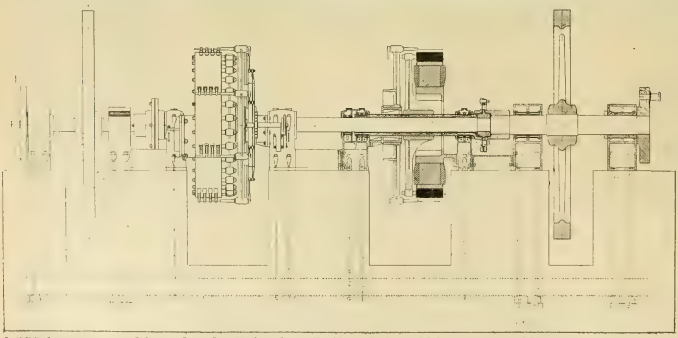
**500 horse power Plant of Ft. Dodge Light & Power Co., Ft. Dodge, Ia. In successful operation since July 1, 1895. Nordberg Corliss Engines, General Electric Monocyclic Generators, 120 revolutions per minute.**



**300 horse power Plant for Chicago Board of Trade. Ames Engines, Westinghouse Generators, 275 revolutions. Now under construction.**



**1,000 horse power Plant for the Englewood & Chicago Electric Railway Co. Willans Engines, Walker Generators, speed 380 revolutions. Now under construction.**



**1,000 horse power Plant for the Suburban Railroad Co., Chicago. Providence Green Engines, Siemens & Halske Generators, 100 revolutions. Now under construction.**

This company owns U. S. patents issued to B. J. Arnold for "Improvements in Electric Power Station Construction," one claim of which reads as follows: "The combination of a series of dynamo electric machines, with a main driving shaft and rotating parts for each dynamo electric machine supported on a hollow sleeve surrounding the main shaft and journaled in independent bearings, with clutch mechanisms (positive, friction or magnetic), whereby such rotating part or sleeve may be positively connected to the shaft at will."

We are prepared to build electric power stations complete, using any make of engines, generators or boilers desired by the purchaser, and give greater reliability in operation for less first cost than is possible with independent direct-coupled units.

# WE WANT MORE GOOD AGENCIES.

## THREE LETTERS TO THE ELECTRICAL PUBLIC:

# P. E. C.

FIRST.

**To Our Dear Friends, the Manufacturers:**

*Gentlemen:* We are Western Electrical Supply hustlers, having only time enough to handle the best articles made for the purpose intended.

Experience has taught us that central-station men are past the age of experimenting.

Have you got a good article? Do you want it properly placed before interested parties? We guarantee **push, ability, capital, personal solicitation, square dealing and success.**

Electricity yours,
**People's Electric Co.**

P. S.—No time for cheap stuff.

• • • •

SECOND.

**To Our Very Dear Friends, Our Past, Present and Future Customers:**

*Gentlemen:*—We know you are a busy people, over-worked, and therefore, to make a long story short, beg to say that we handle only what our personal experience with you has taught us to be of greatest practical value. You, the scholars of the past, are the teachers of to-day.

Our stock is made up of those articles best adapted to your wants. We guarantee **correct interpretation of your orders, prompt attention, personal attention, quick dispatch, clean goods properly packed, invoices correctly made.**

Your Electrical Servants,
**People's Electric Co.**

THIRD.

**To Our Business Friends:**

THE PEOPLE'S ELECTRIC CO. was organized and incorporated under the State Laws of Wisconsin for the purpose of dealing in all kinds of electrical supplies. We are qualified by experience in the shipping room, the counting room, on the road, in the central station, in the university and in practical installation.

Our aim is to improve the electrical business in all its various branches and do our part in placing it in the foremost rank of commercial enterprises. Our success has been beyond our expectations, due to the confidence of our **business friends.**

Very respectfully yours, **People's Electric Co.**

OUR TERRITORY.

WE HAVE TRAVELED IT FOR YEARS.

# TRANSFORMERS.

## NOT THE CHEAPEST TO BUY, BUT THE CHEAPEST TO OPERATE.

800 Light Type "H" Transformer.

OUR CLAIMS for efficiency and regulation have been SUBSTANTIATED by tests made all over the country, and we have received many letters from college professors congratulating us on the REMARKABLE RESULTS of tests made by them on our transformers.

We were the first to recommend the purchase of transformers on definite specifications, and to send to purchasers diagrams and full information showing proper methods for transformer testing.

We have courted and ENCOURAGED COMPARATIVE TESTS, knowing that our competitors alone had cause to fear them. It is said that

## ....IMITATION IS THE SINCEREST FLATTERY....

Compare the recent advertisements and circulars of several competitors with our advertisements of two years ago. NOTE THEIR CLAIMS. We have forced them to make these. We are now forcing them to prove them, which we know full well they will fail to do. We challenge any manufacturer to equal our efficiency and strength of insulation.

Our PHENOMENAL SUCCESS has rendered our present factory entirely inadequate to supply the demand for our apparatus. We are now building A NEW FACTORY FOUR TIMES THE SIZE of our present one. When this is completed we HOPE to be able to fill all orders more promptly.

Transformers of Any Size.

Transformers of Any Voltage to 25,000 Volts.

Transformers of the Highest Possible Efficiency.

Remember, Efficiency affects your Coal Pile. The cheapest Transformer is sure to prove the most expensive in the end. . . . . ,

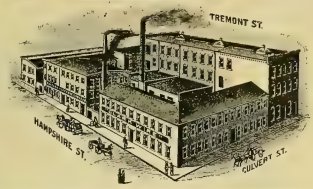
THE

# "CLARK" WIRE.

TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## WANTED.

A first-class electrician and superintendent. One who understands the management of men and has had practical experience in both. Must have a reputation and best of references. State particulars with price. None but the best need apply. Address "Carroll," care WESTERN ELECTRICIAN, Suite 510 Marquette Bldg., Chicago.

## WANTED.

Situation as superintendent of an electric light plant, or combined electric light and water works plant. Have had considerable experience in both. Have held present position over 4 years and only desire to change on account of my wife's health. Am strictly temperate and can furnish best of references as to character and ability. Address "Water Works," care Western Electrician, 510 Marquette Bldg., Chicago.

## WANTED.

Position by young man having had large practical experience with electric lighting and power machinery, and understands arc light repairing; also experienced in the care of steam plants. Can give good references.

Address "J. V. E.,"
Care Western Electrician.

## CORRESPONDENCE

Is solicited with companies needing the services of a superintendent or manager. Well known references will be named showing an experienced and reliable man. Have successfully operated some of the best plants and will name them as reference. Last record will show that I am thoroughly familiar with repair details and am first-class electrical and mechanical engineer. "Satisfaction," care Western Electrician, Suite 510 Marquette Bldg., Chicago.

## POSITION WANTED.

By electrician of technical education and long practical experience in all kinds of testing, calculations, designing and manufacture of instruments, lamps and machinery. Can, if desired, furnish complete equipment of first-class instruments for a laboratory or testing department for all kinds of electrical and photometric tests. Might accept engagement for only part of my time. Address "Franklan," care of Western Electrician, Suite 510 Marquette Bldg., Chicago.

## For Sale.

4000 rubber storage battery jars; 28 storage battery cut-outs; 50 ammeters; 5 focusing arc lamps; 1400 incandescent lamps, 48 to 60 volts; two 100 light incandescent dynamos; five 20 arc light dynamos; five 15 arc light dynamos; one 225 volt 50 ampere dynamo; one 250 volt 100 ampere dynamo. New wire of various sizes. Any of above will be sold low or will exchange for old material. WALSH'S SONS & CO., Newark, N. J.

Address, "BUYER,"
Care Western Electrician, Suite 510 Marquette Bldg., Chicago, Ill.

## To Electrical and Steam Contractors.

Sealed proposals will be received by the State Board of Control of the State of Wisconsin up to 12 o'clock noon of Tuesday, May 26, 1896, for the material and labor necessary for the construction of an electric lighting, steam engine and boiler plant with all necessary appurtenances as per complete plans and specifications on file in the office of the State Board of Control, Madison, Wis., also on file in the office of Charles G. Armstrong, Consulting Electrical Engineer, 1306-1307 Great Northern Bldg., Chicago, Ill.

Bids must be accompanied by a certified check in the sum of 2 per cent. of the amount of the bid, payable to the order of Hans B. Warner, President; to be forfeited to the State of Wisconsin in case the bidder or bidders chosen fail to enter into a contract with the Board, and furnish a satisfactory bond for the proper construction of the same, within ten days after the acceptance of their proposal.

Bids must be sealed and addressed to the undersigned, must be plainly marked on the envelope "Proposals for Engine and Boiler Plant" or "Proposals for Electric Lighting Plant" (as the case may be) for the State Prison, Waupun, Wis.

The State Board of Control reserve the right to accept any bid or combination of bids or to reject any or all bids which the Board may deem to the advantage of the State.

By order of the State Board of Control.

HANS B. WARNER, President.
Madison, Wis., April 29, 1896.

# PONY TELEPHONE RECEIVERS.

CUT FULL SIZE.

THIS telephone receiver weighs only 6 ounces. The spool is wound with silk wire to the standard resistance of 75 ohms. The binding posts will not get loose. The shell of the receiver is of cast-steel and is strongly magnetized. The adjustment is rigid and will not become changed even by the greatest carelessness.

**It is a perfect working telephone receiver, and one that costs ten times as much will not work better.**

With suitable signal apparatus, this telephone receiver makes a complete telephone outfit, as it can be used as a transmitter and receiver combined.

**The price,** as well as the instrument is small. We always make low prices on our specialties, in order to make them up in quantities. **55 cts.**

Postage, if sent by mail, 8 cents extra.

We make a number of different styles of telephone outfits, suitable for every length of line.

Write us for anything needed in the electrical line, as we keep a large assortment for all requirements.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED

BY W. H. WAKEMAN.

12 mo. Cloth. 272 pages. 53 Chapters.

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book which, especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author possesses practical steam engineer himself, well knows the wants of the workingmen over, and has put into this work such knowledge and information as is intended to their use, making it altogether the most complete and comprehensive for the busy workers in the engine room, boiler works and machine shops ever published.

Accompanying letter which has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

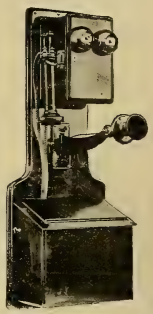
**The Latest UP-TO-DATE Exchange Telephone.**

This telephone is the ideal instrument for Exchanges. It is superior in efficiency, quality and workmanship to any Long-Distance 'Phone on the market. It is adapted to the most exacting service, and is guaranteed to give satisfaction. Notwithstanding the high grade of this instrument, it is sold at a price within reach of all, and generally lower than other companies are asking for their antiquated, out-of-date styles of ten years ago.

☞Any Exchange can have a pair of these Magnificent Instruments on Ten Days' Trial. . . . .



Standard Long-Distance Telephone.

STYLE No. 9.

In connection with our telephone business, we have taken a store in the Liberty Building, corner of Liberty and Greenwich Streets' where, besides the best Telephone on earth, our customers will find a full line of Electrical Supplies. We will furnish anything you want in the Electrical line. State your wants and get our prices before ordering elsewhere. We are well and favorably known in the telephone field, and we propose to be as well and as favorably known in the general supply line.

**Telephones Complete or in Parts.** **Write for Catalogue and Trade Discounts.**

**PRICE, $1.50 PER CELL.**

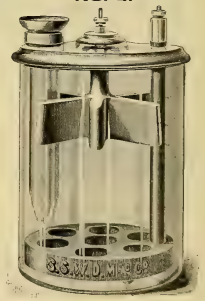
## FOR ALL OPEN CIRCUIT WORK.

**The Highest Voltage, Strongest and Longest Lasting Battery in the World.**

**Awarded Medal and Diploma at Columbian World's Fair, after Competitive Tests.**

**FOR** { Heavy Electric Bell Work, Annunciators, Open Circuit Electric Signals, Electric Clocks, Watchman's Clocks, Long-Distance and Continuously-Used Telephones, Etc., Etc.

NO. 4.



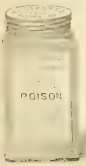
Jar 6 in. × 8 in.

E. M. F., 1.9 to 2 Volts. Current on short circuit, 3 to 5 Amperes.

**PRICE, $1.50 PER CELL.**

## ...PARTZ SULPHO-CHROMIC SALT...

**For Use in Partz Acid Gravity Batteries, and for Making ELECTROPOION FLUID. Economy, Safety, Efficiency.**



Sulpho-Chromic Salt, when dissolved in water, makes a standard electropoion fluid without the necessity of handling liquid acids, having practically the same amount of stored energy as an equal quantity of fluid made in the ordinary ways, giving with a zinc carbon element an E. M. F. of 1.9 to 2 volts, and an ampere-hour capacity of about the same.

We specially call the attention of battery-users to this substance as affording the best, cleanest and most convenient method of making electropoion fluid for medical batteries, Grenet Cells, Bunsen batteries, for lecture-tables, experimental work, etc., and motor batteries.

Sulpho-Chromic Salt is put up in air-tight jars with screw lid, each jar containing two pounds. As the salt is hygroscopic, it must be guarded against moisture. **Price, per Jar, 2 lbs., $0.75.**

The attention of Architects, Contractors, Builders, Dealers in Electrical Supplies, Telephone Companies, etc., is called to this Battery.

SEND FOR CATALOGUE. Many of the large Hotels throughout the country are now replacing unsatisfactory batteries with the PARTZ ACID GRAVITY BATTERY. We make also Electrical Outfits for Dentists. Send for prices and descriptions.

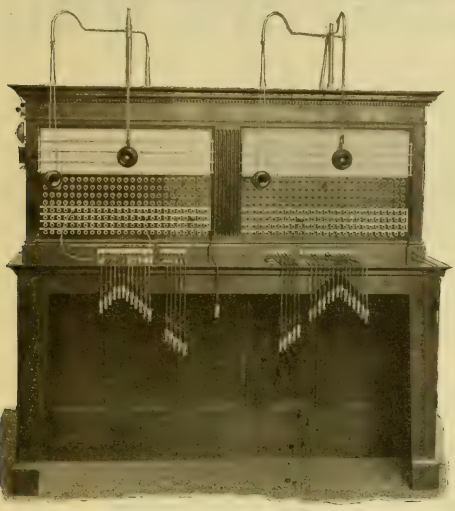
# "THE PHOENIX"



200 Drop "Phoenix" Switchboard.

## Telephones and Switchboards.

THOROUGHLY HIGH CLASS APPARATUS.

Exhaustive practical tests in a large number of modern exchanges have proven that we have

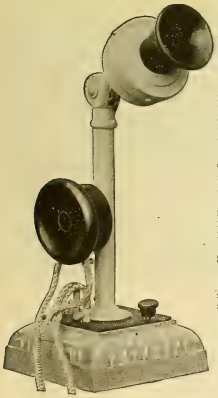
## The Best System.

Our Switchboards are superior to others because they are neater in design, better in construction, more economical in operation, absolutely non-infringing. . . . . .

☞It will pay all intending purchasers to look into the merits of the "Phoenix" Telephones and Switchboards before placing their orders with other manufacturers. . .

## PHOENIX TELEPHONE & MFG. CO., 40-42 W. QUINCY STREET, ...CHICAGO, ILL...

# SOLD ON THEIR MERITS.



## DESK OUTFIT.....

We have devised the Desk Set, shown in the accompanying illustration, to fill the demand for a reliable, neat and efficient instrument which can be applied to the various systems of wiring now on the market.

This set is fitted with Switch, Double Compound Magnet Receiver, and the same style Transmitter as used on our Long Distance Arm.

The metal work is highly polished and nickeled, and altogether presents a very neat and attractive appearance, an ornament to any Desk.

The Base contains the Induction Coil Switching Device, Signal Key and in the No. 26 Relay and Buzzer.

We can furnish this set wired for special systems of wiring. Prices upon application.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**
**Impossibility of Packing under any Conditions;**
**Sensitiveness and Clearness of Articulation;**
**Least Affected by Induction of any Instrument now on the market;**
**Indestructibility—Will last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**These are only two of the many styles of instruments which we manufacture. If you are interested send for catalogue. Our Instruments are in use by the U. S. Government.**

## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.

# The Ohio Storage Battery Company,

Sole Manufacturers, under Exclusive License of the Ford-Washburn Storelectro Co.'s Storage Batteries: The most durable Batteries ever produced. For Street Railways, Lighting Plants, Electric Launches, Electric Carriages, Doctors and Dentists; and for any other work where Storage Batteries can be used.

SPECIALTIES: Isolated Plants for house lighting, and cells for surgical, telegraph, telephone and phonographic uses. Small cells made to order. Send for catalogue giving capacities, weights, etc.

MAIN FEATURES OF THE CELL: The ability to stand an incessant charge and discharge without any injury, which is an advantage that cannot be exaggerated; the capability of enduring a repeated discharge on a dead short circuit without injury to the cells; the special form of cell which frees it from the weaknesses that have made other types a failure.

EASTERN OFFICE: 203 Broadway, New York City, J. A. MACHADO, Agt. The Ohio Storage Battery Co., 52 WADE BUILDING, CLEVELAND, OHIO, U. S. A.

# Sprague Electric Elevator Company,

**Postal Telegraph Building, New York City,**

**BUILDERS OF**

## Electric Passenger and Freight Elevators.

**The Multiple Sheave Screw Machine** Duplicates Hydraulic Service with less than half the water evaporation and coal expenditure.

It has any required speed and capacity. Each machine is an independent unit. Like parts are interchangeable. It has a superior down start. It occupies less space. It is absolutely safe.

**The Worm Gear Drum Machine** is for all classes of intermediate service. It is the most perfect machine of its type built.

**The Automatic House Elevator** is absolutely safe. It requires no operator.

Among typical buildings adopting Sprague Machines are:

Postal Telegraph Building, New York City; Parrott Building, San Francisco; Board of Trade, Chicago; Guaranty Building, Buffalo; Syndicate Building, New York City; Union Trust Building, Detroit; Gerken Building, New York City; Custom House, New York City; Merchants' National Bank, Baltimore; Hotel Walton, Philadelphia; J. T. ## The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

### CONTENTS.

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in American.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation.—Chapter XI. Telpherage.—Chapters XII, XIII. Latest American Motors and Motor Systems.—Chapter XIV. Latest European Motors and Motor Systems.—Chapter XV. Alternating Current Motors.—Chapter XVI. Thermo-magnetic Motors.—Appendix. The Development of the Electric Motor since 1888.

*Copies of this or any other electrical book published will be sent by mail,* POSTAGE PREPAID, *to any address in the world, on receipt of price.*

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evi ienced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer

The originals of these certificates and tests of other sized wheels can be seen at our office.

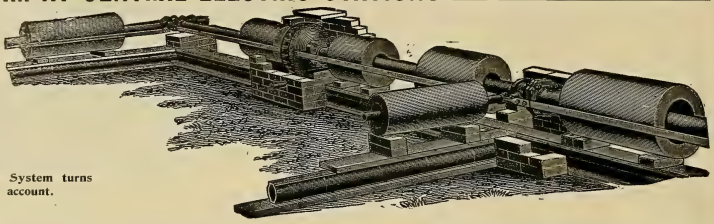
# EXHAUST STEAM AT CENTRAL ELECTRIC STATIONS FOR HEATING CITIES AND VILLAGES.

**Clouds of Exhaust Steam** being blown into the air at Central Stations means thousands of dollars wasted. If you heat your feed water you economize $\frac{1}{5}$ of the steam passing the engine. You waste $\frac{4}{5}$ unless you utilize this for district heating. If you could convert this $\frac{4}{5}$ into additional power you would accomplish wonders. **The HOLLY Steam System turns this waste product to practical account.**

...ADDRESS...



## American District Steam Company, - Lockport, N. Y.

**LEWIS' PATENT DOUBLE STEEL SLIDE BAR VISE**

## NOTICE.

TO THOSE INTERESTED IN ELECTRIC LIGHTING.

If you haven't read Buckley's "ELECTRIC LIGHTING PLANTS; THEIR COST AND OPERATION," you should order a copy at once. It is the only work of its kind in print and will prove an inseparable companion. It is just the book thousands of men have been waiting for; it will be what you want. 275 pages. Illustrated. Cloth, $2.00. Paper cover, $1.00. Postage free.

**ELECTRICIAN PUBLISHING COMPANY,**

Suite 510 Marquette Bldg., Chicago.

### HOME SEEKERS' EXCURSIONS.

In order to give everyone an opportunity to see the Western Country and enable the home seekers to secure a home in time to commence work for the season of 1896, the Chicago, Milwaukee & St. Paul R'y has arranged to run a series of four home seekers' excursions to various points in the West, Northwest and Southwest on the following dates: March 10, April 7 and 21 and May 5, at the low rate of two dollars more than ONE FARE for the round trip. Tickets will be good for return on any Tuesday or Friday within twenty-one days from date of sale. For rates, time of trains and further details apply to any coupon ticket agent in the East or South, or address F. A. Miller, Assistant General Passenger Agent, Chicago, Ill.

### WINTER TOURS TO CALIFORNIA

In Private Pullman Palace Cars.

The Burlington Route (C. B. & Q. R. R.) announce three personally conducted tours to California. Leave Chicago January 9, Feb. 6, March 5. The route will be via San Antonio, Tex., El Paso, Los Angeles, San Diego, Santa Barbara, San Francis o, Del Monte and San Jose Returning via Salt Lake and Rio Grande Scenic Route through Colorado. The price of a ticket includes all necessary expenses, Railroad and sleeping car fare, Hotel Bills, carriage rides, side trips, etc. The service will be strictly first-class in every respect. For pamphlet giving particulars, see any agent of the C. B. & Q. R. R., or write to T. A. Grady, Manager Tours Department, 211 Clark street, Chicago.

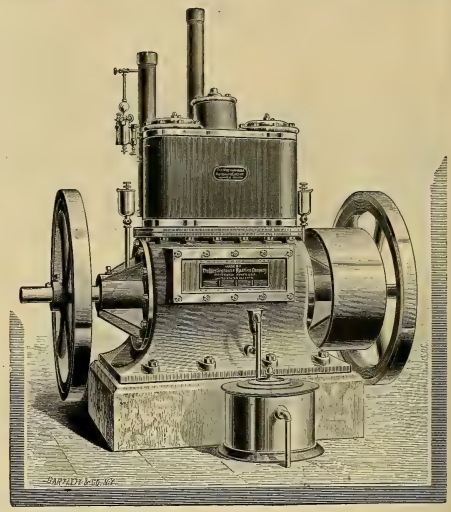
# MORE ABOUT

# Westinghouse Engines.

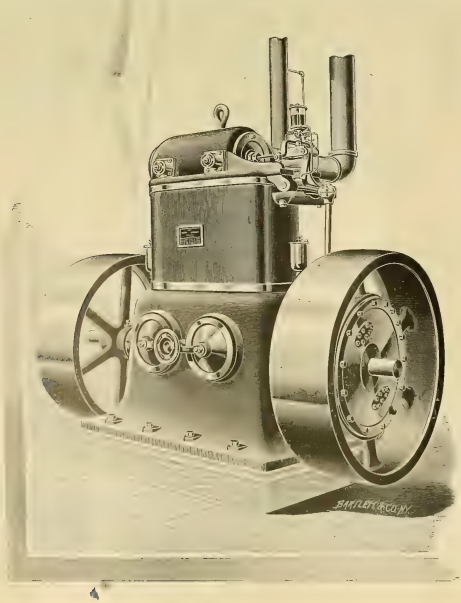


## EXPORT TRADE.

In our business experience we have shipped upwards of 500 engines to foreign countries. This fact means more to domestic buyers than is at first apparent. Handicapped by freights and heavy import duties, we ship to France and Germany, where labor and materials are cheap and machinery of the highest grade is turned out. THIS MEANS QUALITY.

We ship to Spain, Cuba and South America, where fuel is the most expensive. THIS MEANS ECONOMY.

These engines are located from four to twelve thousand miles from our shops, where a breakdown would be an untold inconvenience. THIS MEANS RELIABILITY.



These qualities will be found just as desirable in the United States as at the Antipodes.

In connection with our Export trade, it is interesting to note that the chief office of our agent for the Argentine Republic is in Great Britain, the home of low-priced manufactures. This emphasizes our point that the Westinghouse Engine sells, not on price, but on merit.

We invite the most critical inspection of our product, and methods of manufacture. Our shops are open at all times to engineers and others interested in steam power.

**E. M. F., 1.9 to 2 Volts. Current on short circuit, 3 to 5 Amperes.**
**PRICE, $1.50 PER CELL.**

## ...PARTZ SULPHO-CHROMIC SALT...

**For Use in Partz Acid Gravity Batteries, and for Making ELECTROPOION FLUID. Economy, Safety, Efficiency.**

Sulpho-Chromic Salt, when dissolved in water, makes a standard electropoion fluid without the necessity of handling liquid acids, having practically the same amount of stored energy as an equal quantity of fluid made in the ordinary ways, giving with a zinc carbon element an E. M. F. of 1.9 to 2 volts, and an ampere-hour capacity of about the same.

We specially call the attention of battery-users to this substance as affording the best, cleanest and most convenient method of making electropoion fluid for medical batteries, Grenet Cells, Bunsen batteries, for lecture-tables, experimental work, etc., and motor batteries.

Sulpho-Chromic Salt is put up in air-tight jars with screw lid, each jar containing two pounds. As the salt is hygroscopic, it must be guarded against moisture. **Price, per Jar, 2 lbs., $0.75.**

The attention of Architects, Contractors, Builders, Dealers in Electrical Supplies, Telephone Companies, etc., is called to this Battery.

**SEND FOR CATALOGUE.** Many of the large Hotels throughout the country are now replacing unsatisfactory batteries with the PARTZ ACID GRAVITY BATTERY. **We make also Electrical Outfits for Dentists. Send for prices and descriptions.**

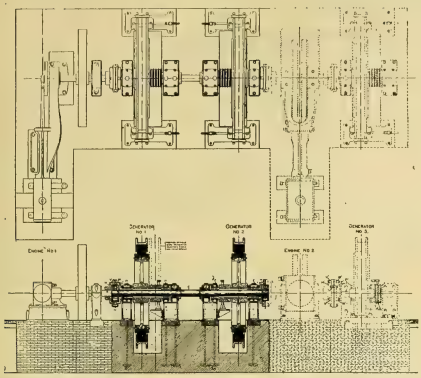
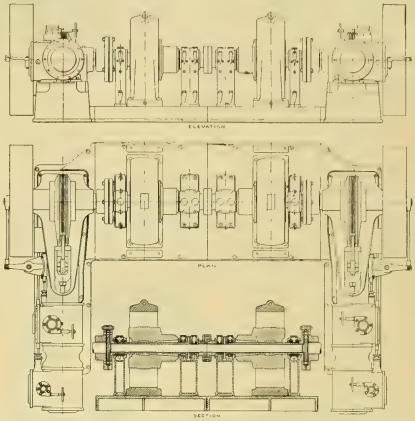
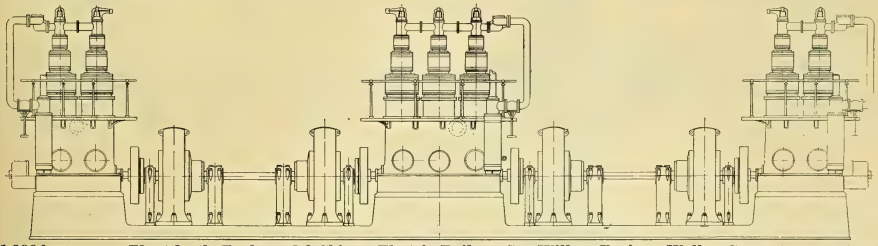
## Less First Cost, Less Real Estate Required, Lower Operating Expenses, Greater Reliability.



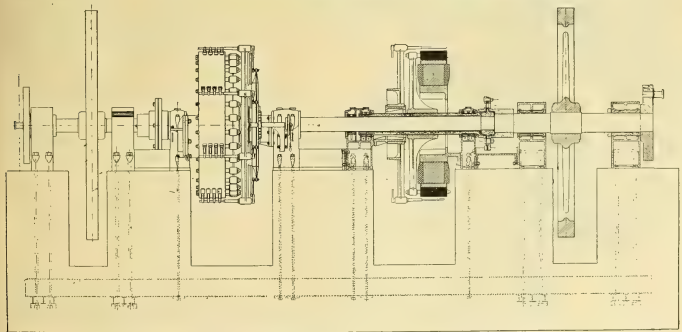
**500 horse power Plant of Ft. Dodge Light & Power Co., Ft. Dodge, Ia. In successful operation since July 1, 1895. Nordberg Corliss Engines, General Electric Monocyclic Generators, 120 revolutions per minute.**



**300 horse power Plant for Chicago Board of Trade. Ames Engines, Westinghouse Generators, 275 revolutions. Now under construction.**



**1,000 horse power Plant for the Englewood & Chicago Electric Railway Co. Willans Engines, Walker Generators, speed 380 revolutions. Now under construction.**



**1,000 horse power Plant for the Suburban Railroad Co., Chicago. Providence Green Engines, Siemens & Halske Generators, 100 revolutions. Now under construction.**

This company owns U. S. patents issued to B. J. Arnold for "Improvements in Electric Power Station Construction," one claim of which reads as follows: "The combination of a series of dynamo electric machines, with a main driving shaft and rotating parts for each dynamo electric machine supported on a hollow sleeve surrounding the main shaft and journaled in independent bearings, with clutch mechanisms (positive, friction or magnetic), whereby such rotating part or sleeve may be positively connected to the shaft at will."

We are prepared to build electric power stations complete, using any make of engines, generators or boilers desired by the purchaser, and give greater reliability in operation for less first cost than is possible with independent direct-coupled units.

We were the first to recommend the purchase of transformers on definite specifications, and to send to purchasers diagrams and full information showing proper methods for transformer testing.

We have courted and **ENCOURAGED COMPARATIVE TESTS,** knowing that our competitors alone had cause to fear them. It is said that

## ....IMITATION IS THE SINCEREST FLATTERY....

Compare the recent advertisements and circulars of several competitors with our advertisements of two years ago. **NOTE THEIR CLAIMS.** We have forced them to make these. We are now forcing them to prove them, which we know full well they will fail to do. We challenge any manufacturer to equal our efficiency and strength of insulation.

Our **PHENOMENAL SUCCESS** has rendered our present factory entirely inadequate to supply the demand for our apparatus. We are now building **A NEW FACTORY FOUR TIMES THE SIZE** of our present one. When this is completed we **HOPE** to be able to fill all orders more promptly.

**Transformers of Any Size.**

**Transformers of Any Voltage to 25,000 Volts.**

**Transformers of the Highest Possible Efficiency.**

**Remember, Efficiency affects your Coal Pile. The cheapest Transformer is sure to prove the most expensive in the end. . . . . ,**

## To Electrical and Steam Contractors.

Sealed proposals will be received by the State Board of Control of the State of Wisconsin up to 12 o'clock noon of Tuesday, May 26, 1896, for the material and labor necessary for the construction of an electric lighting, steam engine and boiler plant with all necessary appurtenances as per complete plans and specifications on file in the office of the State Board of Control, Madison, Wis., also on file in the office of Charles G. Armstrong, Consulting Electrical Engineer, 1306-1307 Great Northern Bldg., Chicago, Ill.

Bids must be accompanied by a certified check in the sum of 2 per cent. of the amount of the bid, payable to the order of Hans B. Warner, President; to be forfeited to the State of Wisconsin in case the bidder or bidders chosen fail to enter into a contract with the Board, and furnish a satisfactory bond for the proper construction of the same, within ten days after the acceptance of their proposal.

Bids must be sealed and addressed to the undersigned, must be plainly marked on the envelope "Proposals for Engine and Boiler Plant" or "Proposals for Electric Lighting Plant" (as the case may be) for the State Prison, Waupun, Wis.

The State Board of Control reserve the right to accept any bid or combination of bids or to reject any or all bids which the Board may deem to the advantage of the State.

By order of the State Board of Control.

HANS B. WARNER, President.
Madison, Wis., April 29, 1896.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

**ELECTRICIAN PUBLISHING COMPANY, - - - Suite 510 Marquette Building, Chicago, Ill.**

## MAYOR'S OFFICE,

SAN ANTONIO, TEXAS, May 9, 1896.

## DESK OUTFIT.....

We have devised the Desk Set, shown in the accompanying illustration, to fill the demand for a reliable, neat and efficient instrument which can be applied to the various systems of wiring now on the market.

This set is fitted with Switch, Double Compound Magnet Receiver, and the same style Transmitter as used on our Long Distance Arm.

The metal work is highly polished and nickeled, and altogether presents a very neat and attractive appearance, an ornament to any Desk.

The Base contains the Induction Coil Switching Device, Signal Key and in the No. 26 Relay and Buzzer.

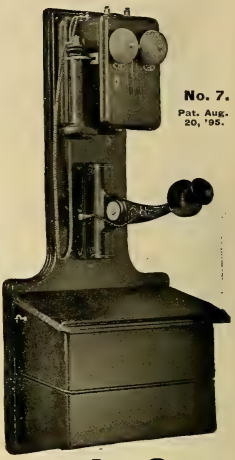
We can furnish this set wired for special systems of wiring. Prices upon application.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**
**Impossibility of Packing under any Conditions;**
**Sensitiveness and Clearness of Articulation;**
**Least Affected by Induction of any Instrument now on the market;**
**Indestructibility—Will last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.



No. 7.
Pat. Aug. 20, '95.

**These are only two of the many styles of instruments which we manufacture. If you are interested send for catalogue. Our Instruments are in use by the U. S. Government.**

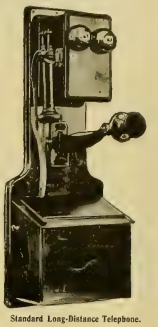
**The Latest UP-TO-DATE Exchange Telephone.**

This telephone is the ideal instrument for Exchanges. It is superior in efficiency, quality and workmanship to any Long-Distance 'Phone on the market. It is adapted to the most exacting service, and is guaranteed to give satisfaction. Notwithstanding the high grade of this instrument, it is sold at a price within reach of all, and generally lower than other companies are asking for their antiquated, out-of-date styles of ten years ago.

☞Any Exchange can have a pair of these Magnificent Instruments on Ten Days' Trial. . . . .



Standard Long-Distance Telephone.

STYLE No. 9.

In connection with our telephone business, we have taken a store in the Liberty Building, corner of Liberty and Greenwich Streets, where, besides the best Telephone on earth, our customers will find a full line of Electrical Supplies. We will furnish anything you want in the Electrical line. State your wants and get our prices before ordering elsewhere. We are well and favorably known in the telephone field, and we propose to be as well and favorably known in the general supply line.

**Telephones Complete or in Parts.** **Write for Catalogue and Trade Discounts.**

* * *

## PROSPECTUS.

**Fact No. 1.**—A great weekly covering the **entire field,** not confined to narrow limits as are those periodicals which make a specialty of some one branch of the trade. * * *

**Fact No. 2.**—One kept up to a **high standard** of excellence through good times and through bad times; the most **liberally illustrated** electrical journal in the world, and the **handsomest typographically.** * * *

**Fact No. 3.**—West of the Alleghanies the paper **eagerly awaited** and thoroughly **read** each week by the electrical public from **1 to 3 days ahead** of its contemporaries in all this territory. **All the news** of the week **already given,** read and digested before other papers arrive. * * *

**Fact No. 4.**—Absolutely **independent;** not engaged in tearing down or building up any one concern; conducted for the trade as a whole, and its mission "*the greatest possible advancement of the electrical science and industry*" in the vast area **monopolized** by its circulation. * * *

**Fact No. 5.**—The **electrical paper** of the **Great West.** No other has ever been able to obtain a foothold in this immense buying section. Many have tried, but one and all have **found the field** already **completely filled** and occupied. * * *

**Fact No. 6.**—A unique position, standing positively **pre-eminent** in the great purchasing sections of the United States. **No other** electrical journal can make a similar claim for **any section** of the country. In the East are several electrical weeklies struggling for supremacy. In the **West** there is **but one** great electrical weekly, and it **covers** the field. * * *

**Fact No. 7.**—West of the Alleghanies a **larger circulation** than **all** of the other electrical journals combined. All the figures so far produced **substantiate** the claim that in this territory its **circulation** is **10 TIMES** that of any other electrical journal.

**Fact No. 8.**—Should you go into **IT** and one other paper, you **can afford** to spend for **western** advertising **10 dollars in IT** where you spend 1 dollar in the other paper.

**Fact No. 9.**—Should you go into all the electrical papers, you **can afford** to spend for **western** advertising as much in **IT** as you spend in **all** the others put together.

**Fact No. 10.**—For **Western** advertising you **cannot really afford** to consider any electrical paper but **IT.** You positively **cannot cover** the field in a thorough manner through any other medium. This is **now plain** to shrewd advertisers.

**Fact No. 11.**—**IT** has a **larger** relative **circulation** in the **East** than has any other electrical paper in the West.

**Fact No. 12. EXTRA IMPORTANT.**—If you have but **ONE ADVERTISEMENT** to place, you should place **it** in this **GREAT WEEKLY,** the paper which can give you the **BEST, BIGGEST** and **MOST COMPREHENSIVE CIRCULATION** throughout the length and breadth of the land.

# Sawyer-Man Electric Company.

The Board of Directors of the Sawyer-Man Electric Company have much pleasure in announcing that the Company has been reorganized and that the manufacture of the Sawyer-Man incandescent lamp has been resumed. This, no doubt, will be welcome news to every user of incandescent lamps in this country, for the reason that for economy, long life and efficiency, the Sawyer-Man incandescent lamp never had a superior on the market.

## WESTON Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

### Illuminated Dial Station Instruments.

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated

### Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milliammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

**ELECTRIC LAMP SIGNS....**

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another. We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**

# THIS ALTERNATING CEILING FAN WORKS.

**We Guarantee It.**

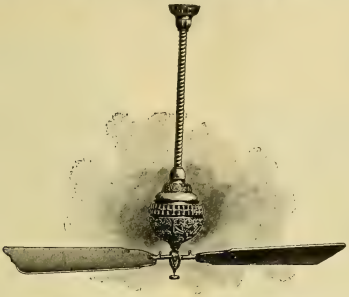
**No Commutator.**

**No Brushes.**

Uses Less Current than any Fan on the Market.

• • •

OUR DIRECT CURRENT FAN WORKS.



Our Guarantee is Good.

Only Fan having Blade Adjuster.
Air can be thrown UP or DOWN.
All Bearings SELF-OILING.

• • •

Ask for New Catalogue and Discounts, and you will send us an order.

The Handsomest Fan ever offered to the trade.

Fans Finished in Bronze, Nickel and Polished Brass.
We manufacture a full line of Belt Fans and Water Motors.

AGENTS WANTED IN LEADING CITIES.

## Hunter Fan & Motor Co.,

(Successors to Tuerk Water Meter Co.,)

FULTON, N. Y.

E. B. Latham & Co, Agents, 136 Liberty Street, New York.

# Sprague Electric Elevator Company,

**Postal Telegraph Building, New York City,**

**BUILDERS OF**

## Electric Passenger and Freight Elevators.

**The Multiple Sheave Screw Machine** Duplicates Hydraulic Service with less than half the water evaporation and coal expenditure.

It has any required speed and capacity. Each machine is an independent unit. Like parts are interchangeable. It has a superior down start. It occupies less space. It is absolutely safe.

**The Worm Gear Drum Machine** is for all classes of intermediate service. It is the most perfect machine of its type built.

**The Automatic House Elevator** is absolutely safe. It requires no operator.

Among typical buildings adopting Sprague Machines are:

Postal Telegraph Building, New York City; Parrott Building, San Francisco; Board of Trade, Chicago; Guaranty Building, Buffalo; Syndicate Building, New York City; Union Trust Building, Detroit; Gerken Building, New York City; Custom House, New York City; Merchants' National Bank, Baltimore; Hotel Walton, Philadelphia; J. T. Williams Office Buildings, New York City; Mabley Building, Detroit; Young Men's Christian Association, New York; Daniells' Stores, New York; Court House and City Hall, Minneapolis; Boston Daily Globe, Boston; Safe Deposit Building, San Francisco; Academy of Music, San Francisco; Canada Life Insurance Co., Montreal; State Mutual Life Assurance Co., Worcester; Johns Hopkins University, Baltimore; Edison Electric Illuminating Co., New York; Currier Bank Building, Los Angeles; Ahrens Building, New York; Wadsworth Building, New York; The Callender, McAuslan & Troup Company's Department Stores, Providence; the residences of Mr. John Jacob Astor and Mr. George Morgan, New York; City and County Court House, Salt Lake City; Graham Building, New York City; Mutual Benefit Insurance Co., Boston; Government Printing Office, War Department, Washington; Wilcox Building, Los Angeles.

Recent contracts include four of the finest and most costly buildings of their respective classes ever projected:

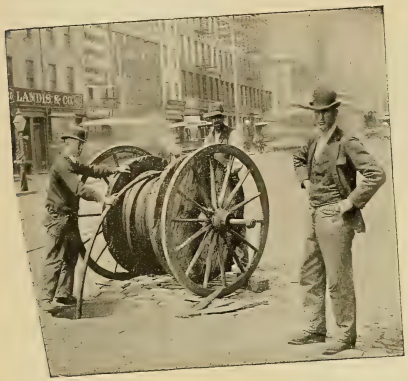
Manhattan Hotel, 9 Elevators. Siegel-Cooper Stores, 21 Elevators.
Commercial Cable Building, 21 Stories.
Mr. John Jacob Astor's New Palatial Hotel, 19 Elevators.

# THE NATIONAL UNDERGROUND CABLE COMPANY,

Sole Manufacturers of Paper Insulated Lead Covered Underground Cables for all classes of service. (Thousands of miles in use.)

## THE NATIONAL CONDUIT MANUFACTURING COMPANY,

Sole manufacturers of Cement Lined Conduits. (Twenty million feet in use.)



HIGH POTENTIAL CABLES A SPECIALTY.

These two companies are now combined under one management, with the result that they are enabled to undertake the building of complete underground systems, including the furnishing of the conduits and the cables, and the doing of all the work. **All work guaranteed.**

**NEW YORK. PHILADELPHIA. CHICAGO. BOSTON.**

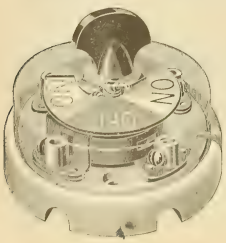
We are making the very best Carbons now on the market, and selling them at prices that you cannot afford to remain unaware of. Operating as we do the largest factory outside of the "Trust," with a daily capacity of 150,000 carbons, the prompt execution of large orders is assured.

## THE AMERICAN CARBON CO.,

**Noblesville, Ind., U. S. A.**

NEW YORK: 219 Havemeyer Bldg. BOSTON: 182 Summer Street. CHICAGO: 1537 Monadnock Bldg.

## THE PERKINS DIAL SWITCH.



For current of from 5 to 50 amperes, and as high as 500 volts.

Shows when current is "ON" or "OFF." Handles a street railway current for lights ....or car heaters....

Our Crookes' Tubes Take Pictures.

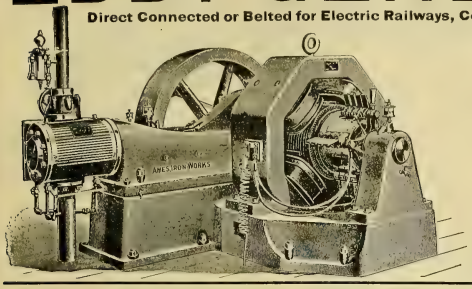
SEND FOR NEW CATALOGUE.

## PERKINS ELECTRIC SWITCH MFG. CO.,

HARTFORD, CONN.

# EDDY GENERATORS.

**Direct Connected or Belted for Electric Railways, Central Stations, Isolated Lighting or Power Plants.**



**Eddy Motors—Slow, Medium or High Speed.**

We build all necessary apparatus for the transmission of Electrical Power through factory or other buildings.

# IMITATION IS THE HIGHEST PRAISE.

When we first offered enclosed arc lamps, doubters SMILED incredulously; NOW they are COPYING the "PIONEER," and while we appreciate this endorsement and the delicate compliment of imitation, we hereby give notice that we intend to

## STOP ALL INFRINGERS ON OUR PATENTS

And are pushing our suit in the U. S. Circuit Court against prominent users of other enclosed arc lamps. We trust this will be taken as fair warning to avoid litigation.

## The Electric Arc Light Co.,

**687 and 689 Broadway, New York.**

LOUIS B. MARKS, M.M.E.,
CHIEF ELECTRICIAN.

The "Pioneer" Enclosed Arc Lamp burns 100 to 150 hours; saves $15 to $20 annually per lamp in carbon and trimming; is shadowless, noiseless, steady, simple and safe.

# Sawyer-Man Electric Company.

The Board of Directors of the Sawyer-Man Electric Company have much pleasure in announcing that the company has been reorganized and that the manufacture of the Sawyer-Man incandescent lamp has been resumed. This, no doubt, will be welcome news to every user of incandescent lamps in this country, for the reason that for economy, long life and efficiency, the Sawyer-Man incandescent lamp never had a superior on the market.

WASHINGTON, D. C., 1333 F Street, N.

# SEVEN THOUSAND

Manhattan Arcs in service. One hundred Edison Central Stations. One pair of half-inch carbons will burn one hundred and fifty hours; will burn singly on incandescent circuits, avoiding the necessity of burning two lamps in series. A perfect diffusion of light is obtained by the use of double enclosed globes. Lamp is fire-proof and absolutely noiseless. Lamps to burn in series on circuits from two hundred to five hundred and fifty volts. Length twenty-four and thirty-seven inches.

# MANHATTAN

## Enclosed Arc Lamps.

Put in a new carbon and trim it once every one hundred and fifty hours. Figure what that will save you.

• • •

**We have on hand five hundred Incandescent Arc Lamps of all makes, which we have displaced by "Manhattans," which we offer complete at $3.00 each.**

• • •

*LOTS OF OTHER FAN OUTFITS*

# BUT ! ! !

The C-W FAN OUTFITS have 6 BLADE, 12 and 16-INCH FANS instead of the usual 10 and 15-inch 4 Blade.

They will therefore do **BIG WORK** if you want it.

The Fan guard is ornamental and substantial and close enough mesh to prevent a Fan blade from flying out should it, by chance, be broken while in operation.

The complete Fan Outfit may not address itself to your eye as pleasantly, as to design and shape, as some others, it having been considered unwise to sacrifice stability to enhance its appearance.

If you want a Fan Outfit for this season and will want it again next season, and several following seasons, you want the **C-W.** Let our Selling Agents talk to or write you.

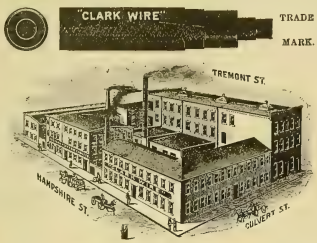
THE

# "CLARK" WIRE.



TRADE MARK.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## Proposals Wanted for Steam and Electric Machinery for City Lighting Plant and for the Operation of Same.

CITY OF MADISON, WIS.—Sealed proposals will be received at the office of the City Clerk of the City of Madison, Wis., until noon of June 12, 1896, for furnishing all labor and materials for the engines, dynamos, pole line and circuits for an electric lighting plant, for said city, and for the operation of same, in accordance with the plans and specifications on file with the city clerk. All bids must be addressed to O. S. Norsman, City Clerk, Madison, Wis., and endorsed on the outside of envelope: "Bids for Electric Lighting Plant and operating same." Each bidder must deposit with his bid a certified bank check for an amount equal to five per cent. of the total cost of the plant, payable to the order of John H. Clark, City Treasurer, which sum shall be forfeited to the City of Madison in case the bidder refuses or neglects to enter into a contract (subject to confirmation by the City Council) within five days after he shall have been notified of the acceptance of his proposal. Checks deposited with rejected bids will be returned to owners on demand. The bidder whose tender is accepted will be required to furnish with his contract an approved bond to the City of Madison, Wis., in such sum, not exceeding the cost of plant; as the Common Council shall determine, conditioned on the full and faithful performance of his part of the contract. Another bond for not exceeding $20,000, running to the people of the State of Wisconsin, will be required, conditioned for the payment of wages earned and material furnished in the performance of the contract. On the proper execution of the contract and bonds, the guarantee deposit will be returned to the contractor. Copies of the plans and specifications can be seen at the office of the City Clerk at Madison, Wis., and of the Consulting Engineer, Frank B. Rae, Consulting Engineer, Room 910 Fort Dearborn Bldg., 134 Monroe St., Chicago.

The City Council expressly reserves the right to reject any or all proposals, or to waive any irregularity in any proposal.

A. A. DYE, Mayor.

O. S. NORSMAN, City Clerk.

Dated at Madison this 12th day of May, 1896.

The ''Western Electrician''

Chicago Ill,

Gentlemen:-

We have just received your May 9th, number, and although it is not requested by personal letter to us we can not but help to tender to you our congratulations upon the appearance of this paper

And in this same letter we wish to take an exception to an item in your own advertisment on page 1xii Fact 5''West of the Alleghanies'' should not appear. We are pretty near as far East of them as we can get and we receive the W.E. as soon as any other paper, and this particular number before the most of them in fact all except Electricity.

Don't be too modest.

Again congratulating you we are

Very truly yours

'Dic. by G. T. E.

SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

# Standard Telephone and Electric Co.

MADISON - - WISCONSIN,
MANUFACTURERS OF THE

**Standard Loud-Speaking, Long-Distance and Exchange Telephone.**

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

**Standard Telephone Exchange Switchboards**

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

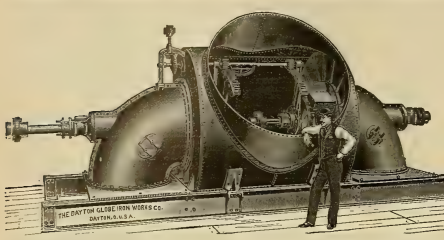
# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.



Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Bickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.17 | 141.58 | 205.27 | 79.76 |
| ¾ " | 16.42 | 122.00 | 127.16 | 185.19 | 82.88 |
| ½ " | 16.78 | 117.33 | 112.60 | 164.74 | 82.18 |
| ¼ " | 17.03 | 111.84 | 98.12 | 145.99 | 79.31 |
| ⅛ " | 16.88 | 118.67 | 85.67 | 118.40 | 75.32 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |

## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.

## SOLAR CARBON AND MANUFACTURING CO.,

MANUFACTURERS OF

Carbon Brushes, Battery Carbons, Solid Electric Light Carbons, For any System, of any degree of hardness.

Soft Cored Carbons (NOT HOLLOW), For Arc Lamps on Incandescent and Railway Circuits

SOLAR CARBON AND MANUFACTURING CO., 95 FIFTH AVENUE, PITTSBURG, PA.

## WESTON Electrical Instrument Co.,

114-120 William St., NEWARK, N. J., U. S. A.

### Illuminated Dial Station Instruments.

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated

### Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters. Ammeters and Milliammeters. Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

## ANDERSON STEEL TROLLEY POLES AND HARPS.

PIVOTAL BOSTON TROLLEYS

Received only Award for Trolleys at Chicago

Manufactured by ALBERT & J. M. ANDERSON, 299-293 A St., Boston Mass.

## STANDARD UNDERGROUND CABLE CO.,

THE ROOKERY, CHICAGO. WESTINGHOUSE BUILDING, PITTSBURG. TIMES BUILDING, NEW YORK.

Cable Contracts Taken Including Installation.

WIRES and CABLES, Overhead and Underground.

## Best Boilers.

Our Boiler Shop is equipped for making large boilers in two sheets as shown in the cut. No seams in fire, no laps to catch scale and mud; bottoms smooth and easily cleaned.

# THIS ALTERNATING CEILING FAN WORKS.

**We Guarantee It.**

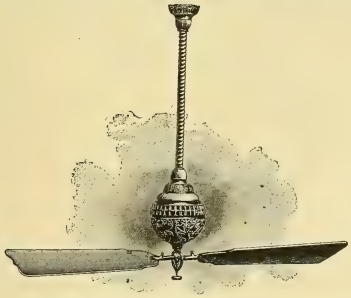
**No Commutator.**

**No Brushes.**

Uses Less Current than any Fan on the Market.

• • •

OUR DIRECT CURRENT FAN WORKS.



## Our Guarantee is Good.

Only Fan having Blade Adjuster.
Air can be thrown UP or DOWN.
All Bearings SELF-OILING.

• • •

Ask for New Catalogue and Discounts, and you will send us an order.

The Handsomest Fan ever offered to the trade.

Fans Finished in Bronze, Nickel and Polished Brass.
We manufacture a full line of Belt Fans and Water Motors.

AGENTS WANTED IN LEADING CITIES.

## Hunter Fan & Motor Co.,

(Successors to Tuerk Water Meter Co.,)

FULTON, N. Y.

E. B. Latham & Co, Agents, 136 Liberty Street, New York.

We take this special method to announce that the word "SAFETY" in connection with INSULATED WIRE and CABLE stands for a product made famous by years of service in leading TELE-PHONE, ELECTRIC LIGHT, and STREET RAILROAD COM-PANIES in all the principal cities of AMERICA.

"SAFETY" Aerial, Underground and Submarine Cable

Is Proverbial for its Efficiency.

We have a unique SOUVENIR that we are presenting to our friends at the Electrical Exposition, which we will be pleased to send to all readers of this advertisement on mention of this paper.

The Safety Insulated Wire & Cable Co., 225 to 229 West 28th St., NEW YORK

# Sprague Electric Elevator Company,

**Postal Telegraph Building, New York City,**

**BUILDERS OF**

## Electric Passenger and Freight Elevators.

**The Multiple Sheave Screw Machine** Duplicates Hydraulic Service with less than half the water evaporation and coal expenditure.

It has any required speed and capacity. Each machine is an independent unit. Like parts are interchangeable. It has a superior down start. It occupies less space. It is absolutely safe.

**The Worm Gear Drum Machine** is for all classes of intermediate service. It is the most perfect machine of its type built.

**The Automatic House Elevator** is absolutely safe. It requires no operator.

Among typical buildings adopting Sprague Machines are:

Postal Telegraph Building, New York City; Parrott Building, San Francisco; Board of Trade, Chicago; Guaranty Building, Buffalo; Syndicate Building, New York City; Union Trust Building, Detroit; Gerken Building, New York City; Custom House, New York City; Merchants' National Bank, Baltimore; Hotel Walton, Philadelphia; J. T. Williams Office Buildings, New York City; Mabley Building, Detroit; Young Men's Christian Association, New York; Daniells' Stores, New York; Court House and City Hall, Minneapolis; Boston Daily Globe, Boston; Safe Deposit Building, San Francisco; Academy of Music, San Francisco; Canada Life Insurance Co., Montreal; State Mutual Life Assurance Co., Worcester; Johns Hopkins University, Baltimore; Edison Electric Illuminating Co., New York; Currier Bank Building, Los Angeles; Ahrens Building, New York; Wadsworth Building, New York; The Callender, McAuslan & Troup Company's Department Stores, Providence; the residences of Mr. John Jacob Astor and Mr. George Morgan, New York; City and County Court House, Salt Lake City; Graham Building, New York City; Mutual Benefit Insurance Co., Boston; Government Printing Office, War Department, Washington; Wilcox Building, Los Angeles.

Recent contracts include four of the finest and most costly buildings of their respective classes ever projected:

Manhattan Hotel, 9 Elevators. Siegel-Cooper Stores, 21 Elevators.
Commercial Cable Building, 21 Stories.
Mr. John Jacob Astor's New Palatial Hotel, 19 Elevators.

# "THE ELECTRA"

HIGH GRADE NUERNBERG CARBONS

FOR DIRECT CURRENT ARC LAMPS. FOR ALTERNATING CURRENT ARC LAMPS.

SEND FOR LATEST PRICE LIST TO

**HUGO REISINGER,** NO. 38 BEAVER STREET, NEW YORK. SOLE IMPORTER FOR THE UNITED STATES AND CANADA.

**IF** you are anxious to secure the latest electrical books, **YOU** should write to the ElectricianPublishing Co., Chicago. You **CAN'T** procure too many reliable, readable books to **READ.**

# IMITATION IS THE HIGHEST PRAISE.

When we first offered enclosed arc lamps, doubters SMILED incredulously; NOW they are COPYING the "PIONEER," and while we appreciate this endorsement and the delicate compliment of imitation, we hereby give notice that we intend to

## STOP ALL INFRINGERS ON OUR PATENTS

And are pushing our suit in the U. S. Circuit Court against prominent users of other enclosed arc lamps. We trust this will be taken as fair warning to avoid litigation.

PIONEERS IN ENCLOSED ARC LIGHTING — THE PIONEER — TRADE MARK

## The Electric Arc Light Co.,

687 and 689 Broadway, New York.

LOUIS B. MARKS, M.M.E., CHIEF ELECTRICIAN.

The "Pioneer" Enclosed Arc Lamp burns 100 to 150 hours; saves $15 to $20 annually per lamp in carbon and trimming; is shadowless, noiseless, steady, simple and safe.

## THE WEST END STREET RAILWAY COMPANY OFFERS

# F-O-R S-A-L-E

**Six General Electric Multipolar 500 K. W. Generators; 4 Pole, Compound Wound, for 500 to 600 Volts.**

These Generators are complete, brass oil piping, brass fittings, marbleized slate panels, with apparatus for complete control and protection of generator. All in first-class order.

FOR FURTHER PARTICULARS AND PRICES, ADDRESS

**H. F. WOODS, = Purchasing Agent, = BOSTON, MASS.**

# SEVEN THOUSAND

Manhattan Arcs in service. One hundred Edison Central Stations. One pair of half-inch carbons will burn one hundred and fifty hours; will burn singly on incandescent circuits, avoiding the necessity of burning two lamps in series. A perfect diffusion of light is obtained by the use of double enclosed globes. Lamp is fire-proof and absolutely noiseless. Lamps to burn in series on circuits from two hundred to five hundred and fifty volts. Length twenty-four and thirty-seven inches.

# MANHATTAN

## Enclosed Arc Lamps.

Put in a new carbon and trim it once every one hundred and fifty hours. Figure what that will save you.

• • •

**We have on hand five hundred Incandescent Arc Lamps of all makes, which we have displaced by "Manhattans," which we offer complete at $3.00 each.**

• • •

## Manhattan General Construction Co.

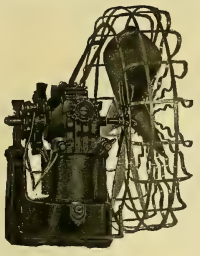
We are making the very best Carbons now on the market, and selling them at prices that you cannot afford to remain unaware of. Operating as we do the largest factory outside of the "Trust," with a daily capacity of 150,000 carbons, the prompt execution of large orders is assured.

## THE AMERICAN CARBON CO.,

**Noblesville, Ind., U. S. A.**



*LOTS OF OTHER FAN OUTFITS*

# BUT!!!

The C-W FAN OUTFITS have 6 BLADE, 12 and 16-INCH FANS instead of the usual 10 and 15-inch 4 Blade.

They will therefore do **BIG WORK** if you want it.

The Fan guard is ornamental and substantial and close enough mesh to prevent a Fan blade from flying out should it, by chance, be broken while in operation.

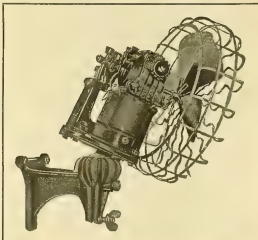
The complete Fan Outfit may not address itself to your eye as pleasantly, as to design and shape, as some others, it having been considered unwise to sacrifice stability to enhance its appearance.

If you want a Fan Outfit for this season and will want it again next season, and several following seasons, you want the **C-W.** Let our Selling Agents talk to or write you.

## *Crocker-Wheeler Elec. Co.,*

MANUFACTURERS AND ELECTRICAL ENGINEERS,

**39 and 41 Cortlandt St., New York.**



WE tell you here only about FANS. This is the FAN SEASON. We also manufacture "The Best" in Dynamos and Motors of Standard and Special Types in all practical sizes. If interested in these please write us. . . . . .

39 and 41 Cortlandt St.

FACTORY:
Pawtucket R. I.

## POSITION WANTED.

All around man for Street Railway or Electric Light. Good Engineer and Machinist and first-class Electrician; any system. Familiar with making tests, repairs and construction work. Address "H." care WESTERN ELECTRICIAN.

## WANTED.

Position by young man having had large practical experience with electric lighting and power machinery, and understands arc light repairing; also experienced in the care of steam plants. Can give good references.

Address "J. V. E."
Care WESTERN ELECTRICIAN.

## WANTED.

A party with money to take either the controlling interest or the whole deal of an electric light plant in a town of 2,000. Have franchise but not enough money to install same. Address "220," care WESTERN ELECTRICIAN.

## WANTED

An energetic business man to investigate a concern manufacturing electric motors and dynamos where money can be made, as the machines are the best, have been well introduced, a large number now in operation. They can be turned out as cheaply as any of the others, and all that is wanted is more capital and a good business man with it, who will take entire charge of the management of the concern, employ his own help without interference, become a director in the company, and look after his own investment.

"S," 108 Times Bldg., New York.

## LIGHT PLANT FOR SALE.

A controlling interest in an electric light plant, located in the most prosperous city of its size in Central Illinois, is offered for sale at a great bargain. Forty-five arc and 3,000 incandescent lamps in circuit. City contract 3 years to run. Only plant in the city. Business growing rapidly. Coal delivered at the boilers for 35 cents per ton for slack, 90 cents for lump. Capital stock $20,000, no bonds. Twenty per cent. earned last year. Good reason for selling. Address for further information. "Dynamo," WESTERN ELECTRICIAN Office.

**Bargains in Machinery for Street Railways.**
One 600 h. p. Corliss engine, one 300 h. p. Corliss engine; one 300 h. p. Westinghouse compound engine; one 250 h. p. Ball automatic engine; two 125 h. p. Ball automatic engines; two 80 h. p. Ball automatic engines; two 125 h. p. generators, 500 volts; four 60 h. p. generators, 500 volts; large stock of automatic engines and dynamos of every description. Also a battery of compound boilers, 750 h. p., 160 h. p. in a pair. FRANK TOOMEY, 131 N. Third Street, Philadelphia.

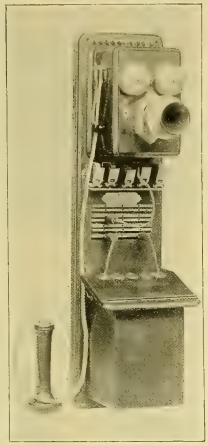
# MAKE AND BREAK TELEPHONES

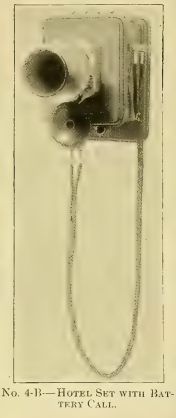
## DO NOT INFRINGE THE BERLINER OR ANY OTHER PATENT.

There is a wide and profitable field for the employment of capital in competing with the Bell Company for telephone business, providing always that the instruments used do not infringe any of the numerous Bell Company patents either on telephones or switchboards. The most important patent is unquestionably the famous Berliner, now in abeyance pending the decision of a suit in the United States Supreme Court. This patent is so broad as to absolutely exclude all battery transmitters except the M. & B. If the Supreme Court *confirms* the decision of the Court of Appeals, which is highly probable, every battery transmitter now manufactured, except the M. & B., is an infringement of that patent, and persons who have been led to invest money in the installment of telephones where these transmitters have been used will not only be liable to lose their investment, but to be mulcted in damages besides. It is absurd to assume that the Bell Company will quietly stand by and see the field occupied by competitive companies, when it is in their power to close every one of them. In view of these unquestionable facts, it behooves capitalists and others who contemplate investing money in telephone enterprises to secure a system which is protected by patents quite as broad as those of the Bell Company—a system entirely free from any possible complication with the Berliner patents. Such a system is the M. & B., which affords perfect protection to capital, at the same time providing the most efficient telephone that modern science has yet evolved.

The M. & B. instruments differ from the many imitations of the Bell type, which are merely attempts at evasion, copies of the earlier forms of mechanism, long since discarded by the Bell Company, or ingenious equivalents of the later microphone instruments, one and all of which are infringements of the basic Berliner patent, which covers fully all such types. The M. & B. Telephone, so far from conforming to the Berliner idea, is the exact opposite of it, and is a pronounced advance in the art of telephony; it is to-day the highest product of that art. As we are not obliged to consider the Berliner patent, our method being its exact opposite, and having nothing in common with it except the end sought to be attained—the transmission of speech—our transmitter conforms exactly to the simplest and most direct method of obtaining the maximum results possible to the art. No complex mechanism or indirect approaches are necessary to avoid encroaching upon the claims of the Berliner patent. We move on straight lines only. This results in a transmitter as simple in construction as it is effective in use, and thus secures the maximum possibilities of the art. Our method also results in the very desirable quality of continuous efficiency, the life of which is only to be measured by the life of the instrument itself.



No. 3.—Station Telephone Set for Factories or Small Towns.



No. 4-B—Hotel Set with Battery Call.

No. 6.—Desk Set.

Another striking peculiarity of the M. & B. is its ability to overcome induction, which is the result, not of any special device, but of the conformation of the transmitter.

In order that our instruments shall be durable and reliable, and possess the highest qualities of excellence during a long period of service, only the best material is used throughout, while the workmanship is of the highest class and under constant expert supervision. So sensitive and delicate an instrument as a high-class modern telephone can not be produced cheaply, and we make no attempt to compete with the output of cheap telephones, with which the market is already overstocked. We are filling orders daily for 'phones to replace these crude and unsatisfactory instruments.

We manufacture six standard styles, which cover the entire requirements of the business, viz.:

No. 1. Long-Distance, Double-Battery 'Phone for trunk lines and long-distance service, guaranteed for 1,000 miles.

No. 2. Standard Exchange 'Phone for exchange work in towns and cities, also for private lines.

No. 3. Station Telephones, with switchboard attachment, twenty connections or less.

No. 4. Interior Sets for hotels, factories, public buildings, etc. Intercommunicating connections where required. With Magneto or Battery Call.

No. 5. Magneto Call Set, same as the Exchange 'Phone, but without backboard and battery box.

No. 6. Desk Sets for offices, etc.

We also furnish Switchboards of our own design and manufacture, non-infringing in every detail, and adapted to every description of exchange work.

Correspondence is solicited. Persons contemplating the organization of telephone companies will find it to their advantage to confer with us either personally or by letter.

**The United States Telephone Construction Company,**
**372 and 374 The Bourse Building,**
**Philadelphia, Pa.**

P. S.—Our new illustrated catalogue will be issued about May 10.

---

### BRIEF EXTRACTS FROM THE WRITTEN OPINIONS OF LEADING PATENT LAWYERS.

* * * Here let me state that up to the present time the Bell Company have had ONLY CONSTRUCTION PATENTS to contend with, and these, without exception, using the BELL METHOD, and having nothing but the single MECHANICAL CONSTRUCTION for the defense.

Now for the first time since telephoning became a necessity, appears a new method that a "Make and Break"—in other words your METHOD of pulsatory or interrupted circuit.

Let us look at its work, examine its action, compare it with the Bell, and I stake my legal opinion upon the assertion that no court in the United States (were Bell to attack you) but would sustain your METHOD and PATENT.

The fact of your having a strong METHOD patent granted upon a new theory and demonstrated physically in its action as a "Make and Break" circuit telephone, both by instantaneous photographing as well as by the use of a Western Union sounder in the battery circuit, is enough to warrant the opinion that you need not fear the Bell Company in court, but should an attack ever be made you will have with you in your support the scientific force of more than twenty Universities in the United States, and the sympathy of thousands upon thousands of the business men of the country.

I have noticed in your Telephone three important features, each being unlike any other telephone within my knowledge:

FIRST. Perfect articulation.

SECOND. Absence of induction.

THIRD. Full volume of voice.

These three points are of themselves of great weight in establishing the difference of method between you and Bell.

Heretofore the test has been between Bell's method and other inventors' mechanical construction.

If Bell ever attacks you it will be method against method, and you will have the scientific men of the nation with you.

It is my opinion, based upon a thorough acquaintance with the Patent practice, and particularly that relating to the electrical department, that your patent for method, as well as your different construction allowed, can and will be sustained in court.

M. F. HALLECK, Washington, D. C.

* * * Any multiplication of words in this connection would be superfluous, and my opinion is that the M. & B. Telephone does not infringe the Berliner patent. In fact, the situation, when correctly understood, does not admit of any other conclusion.

JOHN McDONALD, New York City.

Complying with your request that I should express in briefer form my opinion, I would say, in the first place, I am clearly and positively of the opinion that a telephone working in the manner described in Bonta's patent would not infringe the Berliner patent; and, in the second place, even if the Bonta telephone did, in fact, and contrary to Mr. Bonta's description, work, in part, at least, by means of variable resistance of the circuit, I am still of the opinion that the telephone would not infringe the Berliner patent, provided, as a matter of fact, the breaks in the circuit were even approximately as long and frequent as they would appear to be from Bonta's specification, and from the *experiments tried in the Patent Office before the patent was granted.*

Very truly,

FRANCIS T. CHAMBERS, Philadelphia.

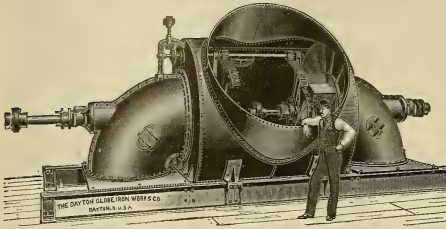
# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.



Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half water than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and witnessed by J. P. Bickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

Aluminum Nickel Alloy.

Manufactured by THE NATIONAL ORE & REDUCTION CO., under Letters Patent dated Sept. 18, 1891, No. 459,494.

This alloy is especially and now universally used for armor plates, gun metal, projectiles, acid pans, propeller wheels, car wheels, steel castings of any description and general foundry castings in either gray iron, malleable iron, brass, bronze and copper castings. It is used very extensively in puddling furnaces, open hearths, reverberatory furnaces and steel converters. Its fluidity and cleansing properties to metals, aside from its strengthening qualities, are attested by indisputable authorities.

**Aluminum Nickel Alloy is reduced from twenty cents to FOUR CENTS per pound in ton or 600-lb. barrel lots. Sold under strict guaranty.**

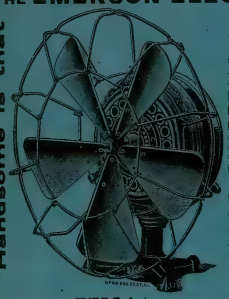
PERU ELECTRIC MFG. CO.
PERU, IND.

PORCELAIN INSULATION Of all Kinds.
We Solicit the making of
SPECAL DESIGNS OF PORCELAIN.

THE EMERSON ELECTRIC MFG. CO.,
ST. LOUIS, MO.,
And 112 Liberty St., New York.

"Handsome is that Handsome does."



TYPE E. I. I.

NOTE THIS
Current Consumption:

"Meston" 12-inch fan, 60 to 70 watts.
" 16-inch fan, 70 watts.
Induction 12-inch fan, 7,200 alts., 80 to 90 watts.
Induction 16-inch fan, 7,200 alts., 110 to 125 watts.
Induction 12-inch fan, 16,000 alts., 90 to 100 watts.

CHEAPEST
Fan Motors on the market because
BEST.

# The Best Money

A central station earns is that which comes from **increase of day load.**

TAILORS' IRONS, LAUNDRY IRONS AND GLUE POTS

Earn this kind of money. These devices and other electrically heated devices (all of which are guaranteed) are made by the

American Electric Heating Corporation,

Havemeyer Building, NEW YORK. Sears Building, BOSTON, MASS. CHICAGO.

High E.M.F.

Long Life.

Say! Mr. Contractor, have you ever stopped

To figure what it costs you to put in shelves, boxes, etc., besides running additional battery circuit necessary in installing the ordinary form of cells. If you have, you are aware that by using the Hang-Up Dry Battery you always save enough in labor and material to pay cost of battery on every contract.

THEY DON'T DRY OUT.

Especially adapted to Telephone and Street Railway Work.

WRITE FOR "DRIVE A NAIL" AND PRICE LIST. TRY IT.

THE F. J. Pearson Mfg. Co.,
SECURITY BUILDING, ST. LOUIS, MO.

THE DUGGAN CLEAT
LEADS THEM ALL.

Patented Nov. 14, 1893.
FOR SALE BY THE TRADE.

When ordering see that you get the
DUGGAN.
Made one wire, two wire, and three wire. . .
They are V shape.
They grip like a vise.
No sagging wire when once stretched.
They are made of finest glazed porcelain. 10 of them used to 1 of any other make.

SIZES.
No. 1 holds wire 16 to 8.
No. 2 holds wire 6 to 00.

IMPERIAL PORCELAIN WORKS, 369 Wabash Ave., Chicago, Ill. FACTORY: TRENTON, N. J.

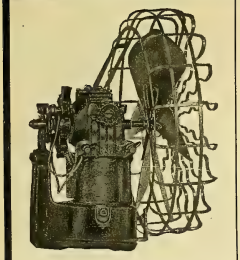
## ONE DOLLAR EACH.

We are making the very best Carbons now on the market, and selling them at prices that you cannot afford to remain unaware of. Operating as we do the largest factory outside of the "Trust," with a daily capacity of 150,000 carbons, the prompt execution of large orders is assured.

## THE AMERICAN CARBON CO.,

Noblesville, Ind., U. S. A.



*LOTS OF OTHER FAN OUTFITS*

# BUT!!!

The C-W FAN OUTFITS have 6 BLADE, 12 and 16-INCH FANS instead of the usual 10 and 15-inch 4 Blade.

They will therefore do **BIG WORK** if you want it.

The Fan guard is ornamental and substantial and close enough mesh to prevent a Fan blade from flying out should it, by chance, be broken while in operation.

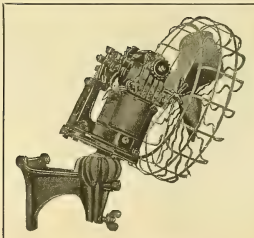
The complete Fan Outfit may not address itself to your eye as pleasantly, as to design and shape, as some others, it having been considered unwise to sacrifice stability to enhance its appearance.

If you want a Fan Outfit for this season and will want it again next season, and several following seasons, you want the C-W. Let our Selling Agents talk to or write you.

## Crocker-Wheeler Elec. Co.,

MANUFACTURERS AND ELECTRICAL ENGINEERS,

**39 and 41 Cortlandt St., New York.**



WE tell you here only about FANS. This is the FAN SEASON. We also manufacture "The Best" in Dynamos and Motors of Standard and Special Types in all practical sizes. If interested in these please write us. . . . . .

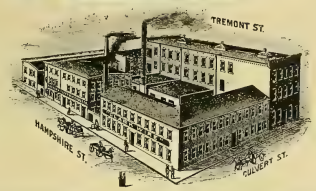
THE

# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.

TRADE MARK.



In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## WANTED POSITION,

By a salesman of ability, with clean record, sober and industrious, well versed in electric machinery and supplies, competent to figure, contract and engineer construction work, superintend and install lighting and electric power plants. Good references. Address

"CHICAGO,"

Care WESTERN ELECTRICIAN, Suite 510 Marquette Bldg , Chicago, Ill.

## WANTED.

A party with money to take either the controlling interest or the whole deal of an electric light plant in a town of 2,000. Have franchise but not enough money to install same. Address "2210," care WESTERN ELECTRICIAN.

# WANTED

An energetic business man to investigate a concern manufacturing electric motors and dynamos where money can be made, as the machines are the best, have been well introduced, a large number now in operation. They can be turned out as cheaply as any of the others, and all that is wanted is more capital and a good business man with it, who will take entire charge of the management of the concern, employ his own help without interference, become a director in the company, and look after his own investment.

"S," 108 Times Bldg., New York.

## FOR SALE.

One 1,000 light incand scent dynamo and one 100 light incandescent. Both direct current, compound wound.

L. A. HINE & CO.,
234 E. Lake Street,
CHICAGO.

# FOR SALE.

A rare opportunity is offered to purchase a modern factory well equipped with a full line of machinery, tools and patterns used in the manufacture of a well known and successful make of dynamos and motors. The factory is located within 100 miles of Chicago, in a thriving railroad center and manufacturing town of 30,000 population. The electrical machinery now being manufactured is simple in construction and operation, and has been successfully on the market for several years.

Satisfactory reasons will be given for selling and every opportunity for investigation will be offered to intending purchasers.

If desired present owners will retain part interest. Address

"WESTERN FACTORY,"

**The Ohio Storage Battery Co.,** 52 WADE BUILDING, CLEVELAND, OHIO, U. S. A.

**A VALUABLE BOOK FOR ENGINEERS AND FIREMEN NOW READY.**

## MODERN EXAMINATIONS OF STEAM ENGINEERS or PRACTICAL THEORY EXPLAINED and ILLUSTRATED.

BY W. H. WAKEMAN.

**12 mo. Cloth. 272 pages. 53 Chapters.**

Containing a complete list of 300 questions such as will be asked of any Engineer when taking examination for U. S. Government or State License, all of which are fully answered in the text.

PRICE, $2.00

By mail, postpaid, to any part of the world

This book while especially adapted for engineers' examinations, is also intended as a practical guide to Engineers, Firemen, Boiler Makers, Machinists, and others, in daily practice.

The author being a practical steam engineer himself, well knows the wants of the working engineer, and has put into this work such knowledge and information as is best adapted to their use, making it altogether the most complete and comprehensive guide for the busy workers in the engine room, boiler works and machine shops that has ever been published.

As one engineer who has read the book says: "I think there are few engineers that it wouldn't do some good. It seems as if it was a review of all I have ever read, and a lot more besides."

The author has treated of a very great variety of subjects which are of vital importance to all who wish to improve and extend their knowledge of steam engineering, and has explained the rules and formulas given, in the simplest manner possible, and has worked out examples by them, so that all who can read may understand them.

The 300 questions are an important feature of the book, they are entirely separate from the 53 chapters of reading matter, and were written after many years of practical experience and careful research by the author.

His connection with the Boardman Manual Training High School at New Haven, Conn., as Instructor in Steam Engineering, his 12 years of active membership in the N. A. S. E., and his position as Instructor of No. 10 of Conn., a sturdy branch of the National Organization, makes him especially competent in this part of the work.

The many flattering commendations which this book has already received from competent judges and high authorities, speak well for its value.

## SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half gate than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—June 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.16 | 119.17 | 141.68 | 305.27 | 79.76 |
| ¾ " | 16.42 | 122.00 | 127.18 | 195.19 | 82.68 |
| ½ " | 16.78 | 117.33 | 112.60 | 175.74 | 82.18 |
| ¼ " | 17.03 | 111.80 | 96.12 | 149.99 | 79.31 |
| ⅛ " | 16.88 | 138.67 | 89.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.33 | 128.00 | 134.18 | 199.66 | 80.50 |
| ¾ " | 16.56 | 134.80 | 120.85 | 188.14 | 83.09 |

Aluminum Nickel Alloy.

Manufactured by THE NATIONAL ORE & REDUCTION CO., under Letters Patent dated Sept. 18, 1891, No. 459,494.

This alloy is especially and now universally used for armor plates, gun metal, projectiles, acid pans, propeller wheels, car wheels, steel castings of any description and general foundry castings in either gray iron, malleable iron, brass, bronze and copper castings. It is used very extensively in puddling furnaces, open hearths, reverberatory furnaces and steel converters. Its fluidity and cleansing properties to metals, aside from its strengthening qualities, are attested by indisputable authorities.

Aluminum Nickel Alloy is reduced from twenty cents to FOUR CENTS per pound in ton or 600-lb. barrel lots. Sold under strict guaranty.

## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.
They are entirely fire and damp proof, sides and base being porcelain.
They can be wired without taking apart, saving time and labor.
The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.
They are positively non-arcing.
They can be placed in groups and are easily accessible in all their parts.
The buttons indicate by the touch whether on or off.
They are finished with brass, nickel or copper face plates, and all parts are interchangeable.
The Switch is 10 ampere, Double Pole.
Price $2.00. A small extra charge for any special finish desired.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations.........$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations.........$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages.........$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition.........$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition.........$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches.........$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches.........$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables.........$1.00
Gives more *Practical* information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations.........$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth.........$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth.........$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone.........$0.50

**Bottone, S. R.**—The Dynamo, How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 89 illustrations.........$1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to.........$0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers.........$0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth.........$2.00
Paper.........1.00

**Cox, Frank P.**—Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated.........$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged.........$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways. Second edition, revised and enlarged. 183 illustrations.........$2.50

**Desmond, Chas.**—Electricity for Engineers. Part I. Constant Current. A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition.........$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards.........$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations.........$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition.........$3.00
Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.
Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892.........$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition.........$2.00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations.........$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised.........$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations.........$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations.........$3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions.........$1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated.........$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy.........$0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs, Translated from the French. With additions by C. J. Wharton. With illustrations.........$2.50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations.........$5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivison and Distribution. A practical handbook. Third edition.........$3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated.$0.50
[Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated.........$1.00

**Kapp, Gisbert.**—Dynamos, Alternators and Transformers. 138 illustrations.........$4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892.........$7.25
In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather.........$1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations.........$2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

**Lockwood, T. D.**—Practical Information for Telephonists. 12mo, cloth. N. Y.........$1.00

**Meadowcroft, W. H.**—The A. B. C. of Electricity. 36 Illustrations.........$0.50

**Martin, T. C.**—Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 500 pp. 300 Illustrations, second edition.........$4.00

**Martin, T. C. and Wetzler, J.**—The Electric Motor and its Applications. Third edition. With an Appendix on the Development of the Electric Motor since 1888. By Dr. L. Bell. 300 Illustrations.........$3.00

**Maver, and Davis, M. M.**—The Quadruplex. With Chapters on the Dynamo-Electric Machine in Relation to the Quadruplex. The Practical Working of the Duplex Telegraph Repeaters and the Wheatstone Automatic Telegraph. 63 illustrations.........$1.50

**McClure, J. B.**—Edison and his Inventions, with Full Explanations of the Telephone, Phonograph, Tasimeter, Electric Light and all his Principal Discoveries, etc. .$1.00

**Niaudet, Alfred.**—Elementary Treatise on Electric Batteries. Translated from the French by L. M. Fishback. Illustrated.........$2.50

**Noll, Augustus.**—How to Wire Buildings. A manual of the art of interior wiring. Illustrated.........$1.50

**Pope, Franklin Leonard.**—Modern Practice of the Electric Telegraph. A technical Hand-book for Electricians, Managers and Operators. 185 illustrations. 14th edition, rewritten and enlarged.........$1.50

**Prindle, H. B.**—A Popular Treatise on the Electric Railway of to-day. Fully illustrated.........$0.25

**Russell, Stuart A.**—Electric Light Cables and Distribution of Electricity. 107 illustrations.........$2.25

**Salomons, Sir David.**—Electric Light Installations. Vol. 1. The Management of Accumulators. A Practical Handbook. 7th edition, revised and enlarged. With illustrations. 12 mo, cl. London, 1893.........$1.50

**Sloane, T. O'Conner.**—Electricity Simplified. The Practice and Theory of Electricity, including a Popular Review of the Theory of Electricity, with Analogies and Examples of its Practical Application in every-day life. Illustrated.........$1.00

**Sloane, T. O'Connor.**—The Standard Electrical Dictionary. A Popular Dictionary of Words and Terms used in the practice of Electrical Engineering, 350 illustrations.$3.00

**Sloane, T. O'Connor.**—Electric Toy Making for Amateurs, including Batteries, Magnets, Motors, Miscellaneous Toys.........$1.00

**Sloane, T. O'Connor.**—The Arithmetic of Electricity. A Manual of Electrical Calculations by Arithmetical Methods, including numerous rules, examples and tables in the field of practical electrical engineering and experimenting. Third edition, revised.........$1.00

**Tesla, Nikola.**—Experiments with Alternate Currents of High Potential and High Frequency. A lecture delivered before the Institution of Electrical Engineers, London. With a portrait and biographical sketch of the Author. Illustrated.........$1.00

**Tesla, Nikola.**—Lectures on the Electro-Magnet. Illustrated.........$1.00

**Thurston, Prof. R. H.**—Stationary Steam Engines, especially adapted to Electric Lighting Purposes. Treating of the development of Steam Engines, the Principles of Construction and Economy, with description of Moderate and High Speed Engines. With many folding plates.........$1.50

**Thomson, Prof. Elihu.**—What is Electricity? Illustrated.$0.25

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. A Series of Lectures, with an introduction by Franklin L. Pope. 16mo. Numerous illustrations, fancy boards (Van Nostrand's Science Series, No. 66).........$0.50

**Thompson, Sylvanus P.**—Polyphase Electric Currents and Alternate-Current Motors. Mailed to any address in the world on receipt of.........$3.50

**Thompson, Sylvanus P.**—Recent Progress in Dynamo-Electric Machines, being a Supplement to Dynamo-Electric Machinery. 16mo. (Van Nostrand's Science Series, No. 75).........$0.50

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. Fourth edition, revised and rewritten. Numerous illustrations and 29 plates. 1,000 pages.........$6.00

**Trevert.**—How to Make Electric Batteries at Home. Illustrated.........$0.25

**Urquhart.**—Electro-Plating. A Practical Hand-book on the Deposition of Copper, Silver, Nickel, Gold, Aluminum, Brass, Platinum, etc. Second edition; carefully revised, with additions.........$2.00

**Walker, F.**—Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous illustrations. 16mo, boards. (Van Nostrand's Science Series, No. 98).$0.50

**Webb, H. L.**—A practical Guide to the Testing of Insulated Wires and Cables. Illustrated.........$1.00

**Webb, Herbert Laws.**—Telephone Hand-book, Illustrated. 12mo, cloth. Chicago, 1895.........$1.00
The only complete work on the Telephone. All possible information for any one interested in Telephones and how to make and operate them.

# ELECTRICIAN PUBLISHING CO.,

.....Suite 510 Marquette Building, Chicago.....

# ROTH BROS. & CO.,

30-34 Market Street, CHICAGO,

Manufacturers of

REWIRED WITH RAVEN WHITE CORE WIRE

—OFFICE—
The Ferris Wheel Co.
1131 THE ROOKERY.

CHICAGO, April 30, 1896.

NEW YORK INSULATED WIRE CO.,
320 Dearborn St., Chicago, Ill.

GENTLEMEN:—After carefully considering the merits of the various brands of wire upon the market, we have decided to use your "Raven White Core" exclusively for rewiring the Ferris Wheel.

As you are aware, the wire upon the wheel is very much exposed and the test will no doubt be a most severe one.

Yours very truly
THE FERRIS WHEEL CO.
By L. V. Rice, Mgr.

**GRIMSHAW WHITE CORE.** Used exclusively for all Incandescent Lighting at World's Columbian Exposition.

**RAVEN WHITE CORE.** Used in some of the largest buildings in the United States.

**COMPETITION LINE WIRE.** Used by some of the largest Central Stations and Fire and Police Departments in the U.S.

**GRIMSHAW TAPES, COMPETITION TAPES AND SPLICING COMPOUNDS.**

**WESTON Electrical Instrument Co.,**
114-120 William St., NEWARK, N. J., U. S. A.

Illuminated Dial Station Instruments.

These instruments are based upon the same general principle and are just as accurate as our regular Standard Portable Direct Current Voltmeters and Ammeters, but are much larger, and the working parts are inclosed in a neatly designed, dust-proof cast-iron case which effectively shields the instruments from disturbing influences of external magnetic fields.

Weston Standard Illuminated Dial Station Ammeter.

Weston Standard

Portable Direct Reading Voltmeters and Millivoltmeters, Ammeters and Milammeters, Wattmeters and Voltmeters, for Alternating and Direct Current Circuits.

Our portable instruments are recognized as standards throughout the civilized world.

Our Semi-Portable Laboratory Standard Voltmeters and Ammeters are still better.

They are the most reliable, absolute standards for Laboratory use.

**ANDERSON STEEL TROLLEY POLES AND HARPS.**

PIVOTAL BOSTON TROLLEYS
Received only Award for Trolleys at Chicago

Manufactured by ALBERT & J. M. ANDERSON, 289-293 A St., Boston, Mass.

**STANDARD UNDERGROUND CABLE CO.,**
THE ROOKERY, CHICAGO. WESTINGHOUSE BUILDING, PITTSBURG. TIMES BUILDING, NEW YORK.
Cable Contracts Taken Including Installation.
**WIRES and CABLES,** Overhead and Underground.

# HARDTMUTH CARBONS,

**Cored and Solid for Direct Lighting.**

## ...LARGE IMPORTATION JUST ARRIVED...

General Western Agents:

## Chicago Edison Company,

**..DEALERS IN ELECTRIC LIGHTING SUPPLIES..**

**Edison Building, 139 Adams Street, CHICAGO, ILL.**

## WESTERN ELECTRIC FAN MOTOR.

THE BEST ON THE MARKET.

Iron-Clad Armature, Self-Oiling Bearings, Carbon Brushes, Perfectly Noiseless and Sparkless. Three Speeds, and Fans in any Finish. Slow Speed, with all the Advantages of High Speed.

....WRITE FOR PRICES....

## Western Electric Co.,

....CHICAGO....

**ELECTRIC LAMP SIGNS....**

## NEW ERA IN ELECTRIC ADVERTISING.

Each lamp is a single letter, which greatly simplifies the construction of a sign, and permits an unlimited advertising display. This sign is low-priced, economical of operation, easily read, very conspicuous, and may be changed in a moment from one form of words to another. We manufacture High Grade Incandescent Lamps. Lamps of any voltage furnished.

**Ask your NEAREST SUPPLY HOUSE for Sample or write**

## DICKINSON ELECTRIC SUPPLY CO.,

**High Grade Incandescent Lamps,**

American Tract Society Building, NO. 150 NASSAU STREET, NEW YORK.

"H.W.J." The Season's Favorite. "H.W.J."

TROLLEY LINE INSULATORS.

**VULCABESTON** Controller Parts and Special Insulating Pieces.

Wooden Tree Insulators.

Send for June Catalogue.

## H. W. JOHNS MFG. CO.,

New York. Philadelphia. 240 Randolph St., Chicago. Boston.

**IF** you are anxious to secure the latest electrical books, **YOU** should write to the ElectricianPublishing Co., Chicago. You **CAN'T** procure too many reliable, readable books to **READ.**

## THE CARD ELECTRIC COMPANY,

**Mansfield, Ohio.**

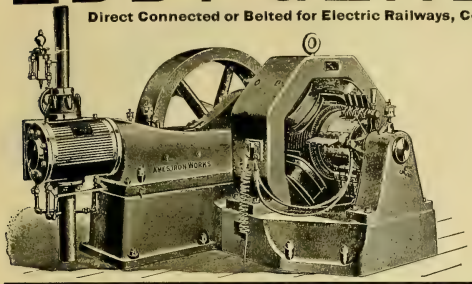
**CARD** Generators for Power Transmission and Isolated Lighting. Generators are all Multipolar and Slow Speed.

**CARD** Multipolar Slow Speed Stationary Motors. Reversible Motors and Controllers for Rolling Mills, Bridges, Traveling Cranes and Elevators,

**Agents Wanted in Unoccupied Territory.** **Write for Estimates.**

# EDDY GENERATORS.

**Direct Connected or Belted for Electric Railways, Central Stations, Isolated Lighting or Power Plants.**



**Eddy Motors—Slow, Medium or High Speed.**

**We build all necessary apparatus for the transmission of Electrical Power through factory or other buildings.**

## The Eddy Electric Mfg. Co.,

**WINDSOR, CONN.**

NEW YORK, H. B. Coho & Co., Mail and Express Building.

Have You Heard About

## New Orient Lamps?

WELL, LISTEN!

They are made throughout of the very best materials obtainable.

They are made from **start** to **finish** by **skilled** workmen and are mechanically perfect.

They are carefully and thoroughly tested by means of instruments made **especially** for the purpose, and **ONLY PERFECT** Lamps are allowed to leave the factory.

They are **uniform in efficiency, voltage** and **candle-power** and are fully guaranteed.

They are of **HIGH EFFICIENCY** and you will **save money** by **using them.**

They are **not** the **lowest priced** lamps on the market, but **they ARE** the **CHEAPEST** lamps obtainable, if the **ratio of light given off** to **the current consumed** is taken into consideration.

We want you to know about these things, and if you can find it to your advantage to deal with us, we would be pleased to hear from you.

# The Electric Motor and Its Applications.

BY T. C. MARTIN AND JOSEPH WETZLER.

*THIRD EDITION.*

With an Appendix by Dr. Louis Bell, bringing the book down to date.

***Cloth, 315 large quarto pages, 353 Illustrations. Price, $3.00.***

The wealth of information contained in the three hundred and odd large double-column pages of this important work is equaled in few special technical treatises, even those of a professedly exhaustive character. More than one hundred different motors are described and illustrated—many in great detail—and the different applications are similarly fully treated. Many of the illustrations are full page, and the details of construction, particularly of armatures, are fully illustrated. The treatment is simple, clear and concise, and little mathematics is employed, the work being essentially of a practical and largely of a descriptive character. The section on alternating motors resumes in a simple manner without mathematical formulæ, the principles upon which they are based, and that on thermo-magnetic motors treats this interesting class in greater detail than can be found in any other publication. An interesting feature is the historical method of treatment, by means of which the different steps in the advance of theories and design can be clearly traced, and the varying results of explorations in many directions instructively followed.

## CONTENTS.

Chapter I. Elementary Considerations.—Chapter II. Early Motors and Experiments in Europe.—Chapter III. Early Motors and Experiments in America.—Chapter IV. The Electrical Transmission of Power.—Chapter V. The Modern Electric Railway and Tramway in Europe.—Chapter VI. The Modern Electric Railway and Street-car Line in American.—Chapter VII. The Use of Storage Batteries with Electric Motors for Street Railways.—Chapter VIII. The Industrial Application of Electric Motors in Europe.—Chapter IX. The Industrial Application of Electric Motors in America.—Chapter X. Electric Motors in Marine and Aërial Navigation. Chapter XI. Telpherage.—Chapters XII, XIII. Latest American Motors and Motor Systems.—Chapter XIV. Latest European Motors and Motor Systems.—Chapter XV. Alternating Current Motors.—Chapter XVI. Thermo-magnetic Motors.—Appendix. The Development of the Electric Motor since 1888.

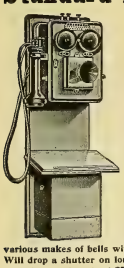
MADISON - - WISCONSIN,

MANUFACTURERS OF THE



**Standard Loud-Speaking, Long-Distance and Exchange Telephone.**

**Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.**

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

**Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.**

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, entire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

**Standard Telephone Exchange Switchboards**

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

THE MARQUETTE BUILDING.

# NOTICE OF REMOVAL.

Owing to the steady and uninterrupted growth of the WESTERN ELECTRICIAN, we have found it necessary to seek larger and more commodious quarters, and therefore desire to announce that we have moved from 6 Lakeside Building to . . . . . .

## SUITE 510 MARQUETTE BUILDING,

northwest corner Adams and Dearborn Streets, where in future all correspondence should be addressed. . . . . .

The Marquette is the finest office building in Chicago, and is but one block east of our old location. Our new offices are not only very handsome and thoroughly well equipped with all modern appointments and conveniences, but they occupy nearly **twice the space of our old quarters.** . . . . . .

Visit us in our new home. You will be pleased to see your favorite journal so handsomely housed. . . . . .

We take this opportunity to assure our patrons and friends that their orders for advertisements, subscriptions or books will receive, with improved facilities even more perfect attention than in the past. . . . . .

PRACTICAL
DYNAMO BUILDING,
With detail drawings and instructions for winding. Giving correct sizes of wire, dimensions of iron, etc. Also diagram for house wiring. . . . . .
BY L. C. ATWOOD.
Profusely illustrated. Size of page, 10x8 inches. Price, $3.
"This work is gotten up especially for amateur builders and non-professional men. All measurements and instructions for winding are taken from machines in actual service. Particular attention has been given to every detail of construction, that they may be thoroughly understood. This work will be of great value, not only to those who wish to build dynamos, but to superintendents, engineers and workmen who have the care of established systems."—*From Preface.*

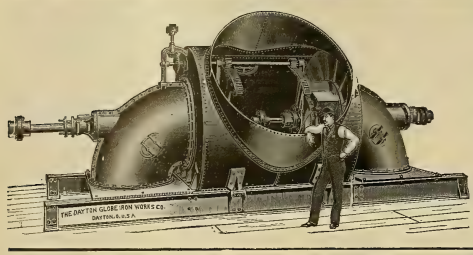
## THE NEW AMERICAN LEADS.



Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half gate than any other turbine, as evidenced by the following, copied from certified tests made at Lowell, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.17 | 141.58 | 205.27 | 79.76 |
| ¾ " | 16.42 | 122.00 | 127.18 | 195.19 | 84.58 |
| ⅝ " | 16.78 | 117.35 | 112.69 | 173.74 | 82.18 |
| ½ " | 17.03 | 111.83 | 98.12 | 149.99 | 79.31 |
| ⅜ " | 16.88 | 118.67 | 82.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |

Aluminum Nickel Alloy.

Manufactured by THE NATIONAL ORE & REDUCTION CO., under Letters Patent dated Sept. 18, 1891, No. 459,494.

This alloy is especially and now universally used for armor plates, gun metal, projectiles, solid cans, propeller wheels, car wheels, steel castings of any description and general foundry castings in either gray iron, malleable iron, brass, bronze and copper castings. It is used very extensively in puddling furnaces, open hearths, reverberatory furnaces and steel converters. Its fluidity and cleansing properties to metals, aside from its strengthening qualities, are attested by indisputable authorities.

Aluminum Nickel Alloy is reduced from twenty cents to FOUR CENTS per pound in ton or 600-lb. barrel lots. Sold under strict guaranty.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations......$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations......$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages......$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition......$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition......$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book,** much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches......$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches......$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables......$1.00
Gives more *Practical* information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations......$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth......$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth......$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone......$0.50

**Bottone, S. R.**—The Dynamo, How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations......$1.00

**Bottone, S. R.**—Electro-Motors. How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to......$0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers......$0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams
Cloth......$2.00
Paper......1.00

**Cox, Frank P.**—Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated......$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged......$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways, Second edition, revised and enlarged. 183 illustrations......$2.50

**Desmond, Chas.**—Electricity for Engineers Part I. Constant Current A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition......$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards......$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations......$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition......$3.00
Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.
Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892......$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition......$2.00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations......$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised ..$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations......$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations......$3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions......$1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated......$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy......$0.50

REWIRED WITH RAVEN WHITE CORE WIRE

—OFFICE—
**The Ferris Wheel Co.**
1131 THE ROOKERY.

CHICAGO, April 30, 1896.
NEW YORK INSULATED WIRE CO.,
320 Dearborn St., Chicago, Ill.

GENTLEMEN:—After carefully considering the merits of the various brands of wire upon the market, we have decided to use your "Raven White Core" exclusively for rewiring the Ferris Wheel.

As you are aware, the wire upon the wheel is very much exposed and the test will no doubt be a most severe one.

Yours very truly
THE FERRIS WHEEL CO.
By L. V. Rice, Mgr.

# In Preparing This New Catalogue

We have been mindful of the needs of all our customers, and our sole aim has been to publish that which would prove helpful and serviceable to all who purchase electrical material of any kind. Our friends kindly say that we have not only achieved this purpose, but describe it as the "largest, handsomest and most complete electrical supply catalogue ever issued," "an encyclopedia of all other catalogues," "a reference book of everything electrical."

**Send a small order and receive a copy.**

## METROPOLITAN ELECTRIC CO.,

---

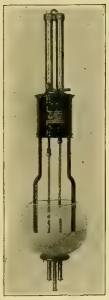
## DOUBLE CARBON, 14 HOUR, SERIES

# ARC LAMPS.

Double Carbon Ornamental Arc Lamp.

Points of Superiority over Single Large Carbon Arc Lamps:

**30 Per Cent. Economy in Operation,**
**Greater Volume of Light,**
**No Energy Wasted in Heating Large Carbons,**
**Most Rapidly Trimmed, Lighter in Weight.**



Double Carbon Plain Arc Lamp.

**THOUSANDS OF OUR LAMPS BURNING IN ALL SORTS OF WEATHER FOR**

## FIFTEEN YEARS

**ARE OPERATING AS SATISFACTORILY AS WHEN FIRST INSTALLED.**

**This is no Ninety Day Test!**

Our Double Carbon Arc Lamps start promptly, are easily adjusted, feed regularly, are not liable to get out of order, burn steadily, operate at low cost, are durable and simple, are maintained at slight expense.

Induction 16-inch fan, 7,200 alts., 110 to 125 watts.
Induction 12-inch fan, 16,000 alts. 90 to 100 watts.

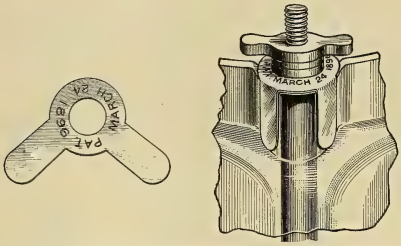
**CHEAPEST**

Fan Motors on the market because

**BEST.**

# HERE YOU ARE!

## What is It? What Does It Do?



**It is a Zinc Holder for use in the ordinary Porous Cup batteries.**

**It keeps the zinc rod in the spout of the jar, where it belongs, and prevents it from wobbling around and leaning against the porous cup.**

**It is the most useful and the handiest little trick ever gotten up for a battery. All you have to do is to put the rod through the hole and bend the arms down close against the sides of the spout. Every jar should have one. Only costs a penny. Saves you from ten to fifty times that much.**

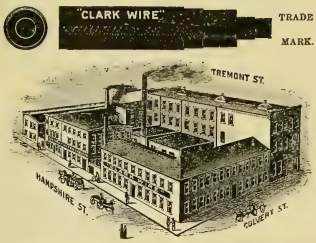
THE

# "CLARK" WIRE.

For Switchboard, Railway and Motor use, we make all sizes of Stranded and Flexible Wire and Cables with Clark's Insulation.

The Clark Wire has been before the public and in use for the past nine years, and has met with universal favor. Thousands of miles of this wire have been sold, and are in use throughout the United States and Foreign Countries, and the demand for it is constantly increasing, because it always gives perfect satisfaction.



TRADE MARK.

In a Letter from the Inspector of the Boston Fire Underwriters' Union, he states: "A Thoroughly Reliable and Desirable Wire in every respect."

The Rubber used in insulating our Wires and Cables is especially chemically prepared, and will not deteriorate, oxidize or crack, and will remain flexible in extreme cold weather, and is not affected by heat.

We guarantee our Insulation wherever used, Aerial, Underground or Submarine, and our net prices are as low, if not lower, than any other first-class Insulated Wire.

We shall be pleased to mail Catalogues with Terms and Discounts for Quantities.

## SOLD ON... THEIR MERITS.

In placing this instrument on the market we take pleasure in stating that after a series of tests made by one of the largest railroad corporations in the United States, and by several of the best informed Telephone Experts in the country, we have been informed that our instruments far surpass any telephone now on the market, for the following reasons:

**Simplicity in Construction;**

**Impossibility of Packing under any Conditions;**

**Sensitiveness and Clearness of Articulation.**

**Least Affected by Induction of any Instrument now on the market.**

**Indestructibility—Will Last a Lifetime with ordinary care, and will be as effective after 5 years' use as the day they were set up.**

**A Test of this instrument will prove every claim we have made for it, and we simply ask a trial to convince the buyer.**

We furnish the Transmitter Arm to those who may wish to replace the transmitters on other makes of instruments.

**For Prices and Discounts write to**

Aluminum Nickel Alloy.
Manufactured by THE NATIONAL ORE & REDUCTION CO., under Letters Patent dated Sept. 18, 1891, No. 459,494.
This alloy is especially and now universally used for armor plates, gun metal, projectiles, acid pans, propeller wheels, car wheels, steel castings of any description and general foundry castings in either gray iron, malleable iron, brass, bronze and copper castings. It is used very successfully in puddling furnaces, open hearths, reverberatory furnaces and steel converters. Its fluidity and cleansing properties to metals, aside from its strengthening qualities, are attested by indisputable authorities.
Aluminum Nickel Alloy is reduced from twenty cents to FOUR CENTS per pound in ton or 600-lb. barrel lots. Sold under strict guaranty.

Summer Homes.
In the Lake regions of Wisconsin, Northern Michigan, Minnesota, Iowa and Dakota, there are hundreds of charming localities pre-eminently fitted for summer homes. Nearly all are located on or near lakes which have not been fished out. These resorts are easily reached by railway and range in variety from the "full dress for dinner" to the flannel-shirt costume for every meal. Among the list are names familiar to many of our readers as the perfection of Northern summer resorts. Nearly all of the Wisconsin points of interest are within a short distance from Chicago or Milwaukee, and none of them are so far away from the "busy marts of civilization" that they cannot be reached in a few hours of travel, by frequent trains, over the finest road in the northwest—the Chicago, Milwaukee & St. Paul Railway. A description of the principal resorts, with list of summer hotels and boarding houses, and rates for board, will be sent free on application to F. A. MILLER, Assistant General Pass. Agent, Chicago, Ill.

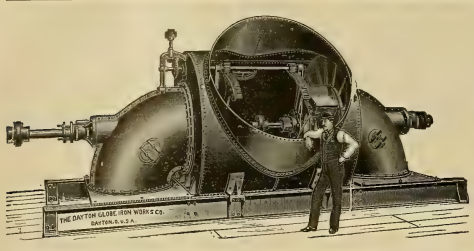
# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.



Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half gate than any other turbines, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

# WATER POWER.

## GOVERNED FOR ELECTRICAL WORK.

The limit of government of water-power is often determined by the design and construction of plant. Consult us if possible before completing your plans.

With **REPLOGLE'S COMPOUND REGULATORS** we are prepared to undertake and **guarantee** the government of water-power for all purposes, including **Electric Railway, Power and Lighting Plants.** We make and sell all of Replogle's Electrical and Mechanical Governors and other devices for the government of water-power. Expert advice furnished on application. If results of your present system are not satisfactory, write us. Address all inquiries to

**THE REPLOGLE GOVERNOR WORKS,**

## The Painter-Morrison Push Button Flush Switch.

PATENTED DECEMBER 22, 1891.

This Switch is absolutely the only Flush Switch on the market combining simplicity of construction with perfection of mechanism.

They are entirely fire and damp proof, sides and base being porcelain.

They can be wired without taking apart, saving time and labor.

The finishing plate can be made to harmonize with other decorations of the room, and need not be put on till all other work is done.

They are positively non-arcing.

They can be placed in groups and are easily accessible in all their parts.

The buttons indicate by the touch whether on or off.

They are finished with brass, nickel or copper face plates, and all parts are interchangeable.

The Switch is 10 ampere, Double Pole.

Price $2.00. A small extra charge for any special finish desired.

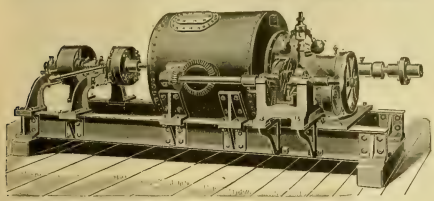
# Victor Turbine Water Wheel.



**Cylinder or Register Gate—Close Regulation and High Efficiency at Full and Partial Gate.**

The attention of ELECTRIC COMPANIES is called to this **CELEBRATED WATER WHEEL** as particularly adapted to their use, on account of its **remarkably steady motion, high speed and great efficiency and large capacity** for its **diameter,** being **double the power** of most wheels of the same diameter. It is used by a number of the leading electric companies with great satisfaction. In the economical use of water it is without an equal, producing the highest per cent of useful effect **guaranteed.**

*SEND FOR CATALOGUE AND PARTICULARS.*

The accompanying engraving represents a single 10-inch Victor Turbine on horizontal shaft to develop 36 H. P. under 38 feet head. Arranged with 12-inch Worrell Friction Coupling at one end to disconnect pulley.

We are now prepared to furnish Victor Turbines, either single or in pairs, on horizontal shafts, and where the situation admits of their use we recommend them.

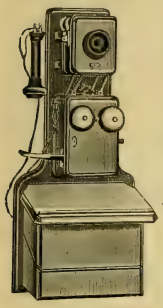
# VIADUCT MFG. COMPANY



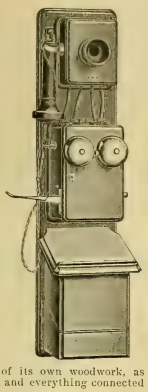
Is the **oldest** concern of the kind in this country, with one exception, manufacturing

**Magneto Bells, Telephones, District Telegraph Messenger Boxes**

and other appliances.

It has had 18 years' experience; 5 years as licensed manufacturer of the American Bell Telephone Company. It has made more Magneto Bells than all the other manufacturers in the country. Its standard work is known by all experienced telephone men.

The works are located at the Relay Station, Baltimore & Ohio Railroad, and run by water power.



It manufactures all of its own woodwork, as well as brass, iron, steel and everything connected with its output.

Send for new catalogue and mention this paper.

# Standard Telephone and Electric Co.

MADISON - - WISCONSIN,
MANUFACTURERS OF THE

**Standard Loud-Speaking, Long-Distance and Exchange Telephone.**

Perfect in Detail, of Highest Efficiency and Best Possible Electrical and Mechanical Construction.

Equipped with **Our New Magneto Bell** provided with specially powerful Generator having large field magnets of best quality of magnetic steel, laminated armatures with ample wire space, and combining the qualities of large quantity and high voltage; polarized bells with centrally pivoted armatures (the patent on same having now expired) and high co-efficient of self-induction in proportion to winding, the whole adapted to meet the most exacting requirements of service.

Will ring bells on long lines of high resistance. Will ring a large number of bells in series on short lines. Will ring on a line various makes of bells with different windings. Will work with any make of switchboard. Will drop a shutter on long lines, etc., etc.

Sole Licensees for sale of **Milde Battery Transmitter** in the United States. Patent granted April 17th, 1894. For simplicity, small dimensions, satire multi-contact, and powerful transmission, it has no equal. No adjustment required. Will not pack or get out of order.

**Standard Telephone Exchange Switchboards**

Manufactured and controlled by us are the most rapid and efficient apparatus of the kind now before the public, embracing novel and original features possessed by no others; require where power generator is used but three moves to answer a subscriber's call, ring number wanted, and connect the lines. Estimates for complete equipment of exchanges and toll line systems promptly furnished.

### Low Excursion Rates to Buffalo, N. Y.
**Via the Baltimore & Ohio R. R.**

On July 5 and 6 the Baltimore & Ohio Railroad will sell excursion tickets to Buffalo, N. Y., at rate of one fare for the round trip, plus $2.00, for membership fee, account National Educational Association Meeting. Tickets will be good for return until July 12, inclusive, but are subject to an extension until September 1, if deposited with Joint Agent of Buffalo Terminal Lines at Buffalo on or before July 10, 1896.

For further information call on or address L. S. Allen, Ass't Gen'l Pass'r Agent, Chicago, Ill.

### Half Rates to Washington, D. C.
**Via the Baltimore & Ohio R. R.**

On July 4, 5, 6 and 7 the Baltimore & Ohio Railroad will sell excursion tickets to Washington, D. C., at a rate of one fare for the round trip, account of Young People's Society of Christian Endeavor Convention.

Tickets will be good for return until July 15, but are subject to an extension until July 31, provided they are deposited with Joint Agent at Washington, D. C., prior to 6 o'clock p. m., July 14.

For further information call on or address L. S. Allen, Ass't Gen'l Pass'r Agent, Chicago, Ill.

### Summer Homes.

In the Lake regions of Wisconsin, Northern Michigan, Minnesota, Iowa and Dakota, there are hundreds of charming localities pre-eminently fitted for summer homes. Nearly all are located on or near lakes which have not been fished out. These resorts are easily reached by railway and range in variety from the "full dress for dinner" to the flannel-shirt costume for every meal. Among the list are names familiar to many of our readers as the perfection of Northern summer resorts. Nearly all of the Wisconsin points of interest are within a short distance from Chicago or Milwaukee, and none of them are so far away from the "busy marts of civilization" that they cannot be reached in a few hours of travel, by frequent trains, over the finest road in the northwest—the Chicago, Milwaukee & St. Paul Railway. A description of the principal resorts, with list of summer hotels and boarding houses, and rates for board, will be sent free on application to F. A. MILLER, Assistant General Pass. Agent, Chicago, Ill.

## NOTICE.

TO THOSE INTERESTED IN ELECTRIC LIGHTING.

If you haven't read Buckley's "ELECTRIC LIGHTING PLANTS; THEIR COST AND OPERATION," you should order a copy at once. It is the only work of its kind in print and will prove an inseparable companion. It is just the book thousands of men have been waiting for; it will be what you want. 275 pages. Illustrated. Cloth, $2.00. Paper cover, $1.00. Postage free.

# Progress the Order of the Age.

## THE NEW AMERICAN LEADS.

Recent improvements made in the New American Turbine have increased the power as per their diameter, and produced greater efficiency from whole to half gate than any other turbine, as evidenced by the following, copied from certified tests made at Holyoke, Mass., on the dates named, and signed by A. F. Sickman, engineer in charge of experiments, and E. S. Waters hydraulic engineer.

The originals of these certificates and tests of other sized wheels can be seen at our office.

**Test of a 45-in. Wheel—July 9, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.46 | 119.37 | 141.58 | 205.37 | 79.76 |
| ¾ " | 16.49 | 122.00 | 127.18 | 195.19 | 82.68 |
| ½ " | 16.78 | 117.33 | 112.60 | 175.74 | 85.18 |
| ¼ " | 17.05 | 111.80 | 98.12 | 149.99 | 79.31 |
| ⅛ " | 16.88 | 118.67 | 82.07 | 118.40 | 75.52 |

**Test of a 42-in. Wheel—July 14, '94.**

| | Head | Rev. per Min. | Cu. Ft. per Sec. | H. P. | Per Cent. |
|---|---|---|---|---|---|
| Whole Gate | 16.33 | 128.00 | 194.38 | 299.56 | 80.50 |
| ¾ " | 16.56 | 134.80 | 120.85 | 188.14 | 83.04 |
| ½ " | 16.59 | 129.33 | 104.88 | 162.89 | 82.77 |
| ¼ " | 17.13 | 125.25 | 92.76 | 144.40 | 79.21 |
| ⅛ " | 17.48 | 121.00 | 70.80 | 98.88 | 70 60 |

Aluminum Nickel Alloy.

Manufactured by THE NATIONAL ORE & REDUCTION CO., under Letters Patent dated Sept. 18, 1894, No. 459,494.

This alloy is especially and now universally used for armor plates, gun metal, projectiles, acid pans, propeller wheels, car wheels, steel castings of any description and general foundry castings in either gray iron, malleable iron, brass, bronze and copper castings. It is used very extensively in puddling furnaces, open hearths, reverberatory furnaces and steel converters. Its fluidity and cleansing properties to metals, aside from its strengthening qualities, are attested by indisputable authorities.

Aluminum Nickel Alloy is reduced from twenty cents to FOUR CENTS per pound in ton or 600-lb. barrel lots. Sold under strict guaranty.

# KNOWLEDGE IS POWER.

Everyone engaged in the electrical business should keep posted on the developments in the art by reading the latest books on the subject. We are headquarters in the West for electrical books and can fill orders for any work published, promptly on receipt of price. We call your special attention to the following standard books:

**Allsop, F. C.**—Electrical Bell Construction; Treatise on the Construction of Electric Bells, Indicators, and similar apparatus. 177 illustrations........$1.25

**Angell, J.**—Elements of Magnetism and Electricity, with Practical Instructions for the Performance of Experiments, and the construction of cheap apparatus. One hundredth thousand. 160 illustrations........$1.00

**Atkinson, Philip.**—The Elements of Electric Lighting. Seventh edition, fully revised, and new matter added. 104 illustrations. 260 pages........$1.50

**Atkinson, Philip.**—The Elements of Dynamic Electricity and Magnetism. 406 pages and 117 illustrations. Second edition........$2.00

**Ayrton, W. E.**—Practical Electricity; a Laboratory and Lecture Course for First-year Students of Electrical Engineering, based on the Practical Definitions of the Electrical Units. With numerous illustrations. Sixth edition........$2.50

**Badt, Lieut. F. B.**—New Dynamo Tenders' Hand Book. This is, as the name indicates, a **New Book**, much more complete than the old one, with all the information, instructions and rules which are required by practical men, as Dynamo Tenders, Linemen, Stationary Engineers, and owners and operators of all kinds of Electric Plants. It is the only book of the kind published in the English language. 226 pages, 140 illustrations, flexible cloth binding, size of type page 5½x3 inches........$1.00

**Badt, Lieut. F. B.**—Incandescent Wiring Hand-book. A timely book containing full illustrations for incandescent wiring and complete information concerning methods of running wires, location of safety devices, splices, insulation, testing for faults, wire gauges, general electrical data, calculating sizes of wires, wiring fixtures, elevators, buildings, isolated and central station plants. The only book of the kind published. Type page 5½x3 inches, flexible cloth binding, 66 pages, 35 cuts and 5 tables, 3 of which are 12x18 inches........$1.00

**Badt, Lieut. F. B.**—Bell Hangers' Hand-ook. Just the book for people engaged in selling, installing or handling electric batteries, electric bells, elevators, house or hotel annunciators, burglar or fire alarms, electric gas lighting apparatus, electric heat apparatus. 106 pages, 97 illustrations, flexible cloth binding. Type page 5½x3 inches.$1.00

**Badt, Lieut. F. B.**—Electric Transmission Hand-book. First edition, three thousand copies. 97 pages, 22 illustrations, 27 original tables........$1.00
Gives more *Practical* information on the subject than any work published to date. The book contains all necessary information for Power Producers, Capitalists, Agents, Engineers and Motor Inspectors. With this book anybody may make estimates on the cost of Transmission Plants.

**Bedell, Fred'k and Albert C. Crehore.**—Alternating Currents; An Analytical and Graphical Treatment for Students and Engineers. Second edition. 112 illustrations........$2.50

**Blakesley, T. H.**—Papers on Alternating Currents of Electricity for the use of Students and Engineers. Third edition, enlarged. 12mo, cloth........$1.50

**Bonney, G. E.**—Electro-Plater's Hand Book. A Manual for Amateurs and Young Students on Electro-Metallurgy. 60 illustrations. 208 pages. 12mo, cloth........$1.25

**Bottone, S. R.**—Electrical Instrument Making for Amateurs. A Practical Hand-book, with 48 illustrations. Fourth edition. Enlarged by a chapter on the Telephone........$0.50

**Bottone, S. R.**—The Dynamo, How Made and How Used. A Book for Amateurs. Eighth edition, with additional matter and 39 illustrations........$1.00

**Bottone, S. R.**—Electro-Motors, How Made and How Used. A Handbook for Amateurs and Practical Men. Reduced to........$0.50

**Bottone, S. R.**—How to Manage the Dynamo. A Hand-book for Ship Engineers, Electric Light Engineers and Electro-Platers........$0.60

**Buckley, W. J.**—Electric Lighting Plants, their cost and operation. 275 pages, many illustrations and diagrams.
Cloth........$2.00
Paper........1.00

**Cox, Frank P.**—Continuous Current Dynamos and Motors. An Elementary Treatise for Students and Engineers. Illustrated........$2.00

**Crocker, F. B., and Wheeler, S. S.**—The Practical Management of Dynamos and Motors. With a special chapter by H. A. Foster. Illustrated. Second edition, revised and enlarged........$1.00

**Crosby, O. T., and Dr. Louis Bell.**—The Electric Railway in Theory and Practice. A Complete Treatise on the Construction and Operation of Electric Railways, Second edition, revised and enlarged. 183 illustrations........$2.50

**Desmond, Chas.**—Electricity for Engineers Part I. Constant Current A clear and comprehensive treatise on the principles, construction and operation of Dynamos, Motors, Lamps, Indicator and Measuring Instruments; also a full explanation of the electrical terms used in the work. Part II. Alternate Current Apparatus. Containing an explanation of the principles governing the generation of, and a description of the instruments and machinery used in connection with Alternate Electric Currents. Illustrated. Revised edition........$2.50

**Dyer, A.**—Induction Coils. How Made and How Used. Third edition. Boards........$0.50

**Fleming, J. A.**—Short Lectures to Electrical Artisans. A course of Experimental Lectures delivered to a Practical Audience. Fourth edition. 74 illustrations........$1.50

**Fleming, J. A.**—The Alternate Current Transformer in Theory and Practice. Vol. I. The Induction of Electric Currents, 500 pages, fully illustrated and with copious index. Second edition........$3.00
Synopsis of contents; Chapter 1. Introductory. 2. Electro-Magnetic Induction. 3. The Theory of Simple Periodic Currents. 4. Mutual and Self Induction. 5. Dynamical Theory of Current induction.
Vol. II. The Utilization of Induced Currents, 8vo. cloth. London, 1892........$5.00

**Gore, G.**—The Art of Electro-Metallurgy, including all Known Processes of Electro Deposition. Fourth edition........$2.00

**Gordon.**—School Electricity. Sources, Currents, Measurement, Telegraphy, Telephony, Lightning, Electrolysis, Induction, etc. 262 pages, with 140 illustrations........$2.00

**Grier, Thos. G.**—Wiring for Motor Circuits. A handy little pamphlet containing tables for wiring and for motor service, arranged in convenient form for ready reference.$1.00

**Haskins, C. H.**—The Galvanometer and its Uses. A Manual for Electricians and Students. Fourth edition, revised ..$1.50

**Haskins.**—Transformers. Their Theory, Construction and Application Simplified. 38 illustrations........$1.25

**Hawkins, C. C. and F. Wallis.**—The Dynamo, its Theory, Design and Manufacture. 190 illustrations........$3.00

**Hering.**—Practical Directions for Winding Magnets and Dynamos. 12mo. cloth, reprint without additions.....$1.25

**Hopkins, Geo. M.**—Experimental Science. Elementary, Practical and Experimental Physics, 650 Illustrations $4.00

**Hopkinson.**—Original Papers on Dynamo Machinery and Allied Subjects. Illustrated........$1.00

**Hopkinson, Dr. John.**—Dynamic Electricity; Its Modern Use and Measurement, chiefly in its Application to Electric Lighting and Telegraphy........$0.50

**Hospitalier, E.**—Domestic Electricity for Amateurs, Translated from the French. With additions by C. J. Wharton. With illustrations........$2 50

**Houston, Prof. E. J.**—A Dictionary of Electrical Words, Terms and Phrases. Third edition, re-written and greatly enlarged. Large 8vo. 562 pages, and 570 illustrations........$5.00

**Kapp, Gisbert.**—Electric Transmission of Energy and its Transformation, Subdivison and Distribution. A practical handbook. Third edition........$3.00

**Kapp, Gisbert.**—Alternate Current Machinery Illustrated.$0.50
[Vol. 96 Van Nostrand's Science Series.]

**Kapp, Gisbert.**—Alternating Currents of Electricity. Their Generation, Measurement, Distribution and Application. Authorized American ed. With an introduction by William Stanley, Jr. Illustrated........$1.00

**Kapp, Gisbert.**—Dynamos, Alternators and Transformers. 138 illustrations........$4.00

**Kempe, H. R.**—A Handbook of Electrical Testing. Fifth edition. 200 illustrations. 8vo. cloth. London, 1892.....$7.25
In this edition there is a considerable amount of new matter; the old matter has been thoroughly revised.

**Kempe, H. R.**—The Electrical Engineer's Pocket Book. Modern Rules, Formulæ, Tables and Data. 32mo, leather........$1.75

**Lockwood, T. D.**—Electricity, Magnetism and Electric Telegraphy. A Practical Guide and Handbook of General Information for Electrical Students, Operators and Inspectors. 376 pages, 152 Illustrations........$2.50

**Lockwood, T. D.**—Electrical Measurement and the Galvanometer; its Construction and Use. Second edition... $1.50

**Lockwood, T. D.**—Practical Information for Telephonists. 12mo, cloth. N. Y........$1.00

**Meadowcroft, W. H.**—The A. B. C. of Electricity. 36 Illustrations........$0.60

**Martin, T. C.**—Inventions, Researches and Writings of Nikola Tesla. With special reference to his work in polyphase currents and high potential lighting. 500 pp. 300 Illustrations, second edition........$4.00

**Martin, T. C. and Wetzler, J.**—The Electric Motor and its Applications. Third edition. With an Appendix on the Development of the Electric Motor since 1888. By Dr. L. Bell. 300 Illustrations........$3.00

**Maver, and Davis, M. M.**—The Quadruplex. With Chapters on the Dynamo-Electric Machine in Relation to the Quadruplex. The Practical Working of the Duplex Telegraph Repeaters and the Wheatstone Automatic Telegraph. 63 illustrations........$1.50

**McClure, J. B.**—Edison and his Inventions, with Full Explanations of the Telephone, Phonograph, Tasimeter. Electric Light and all his Principal Discoveries, etc. .$1.00

**Niaudet, Alfred.**—Elementary Treatise on Electric Batteries, Translated from the French by L. M. Fishback. Illustrated........$2.50

**Noll, Augustus.**—How to Wire Buildings. A manual of the art of interior wiring. Illustrated........$1.50

**Pope, Franklin Leonard.**—Modern Practice of the Electric Telegraph. A technical Hand-book for Electricians, Managers and Operators. 185 illustrations. 14th edition, rewritten and enlarged........$1.50

**Prindle, H. B.**—A Popular Treatise on the Electric Railway of to-day. Fully illustrated........$0.25

**Russell, Stuart A.**—Electric Light Cables and Distribution of Electricity. 107 illustrations........$2.25

**Salomons, Sir David.**—Electric Light Installations. Vol. 1. The Management of Accumulators. A Practical Hand-book. 7th edition, revised and enlarged. With illustrations. 12 mo, cl. London, 1893........$1.50

**Sloane, T. O'Conner.**—Electricity Simplified. The Practice and Theory of Electricity, including a Popular Review of the Theory of Electricity, with Analogies and Examples of its Practical Application in every-day life. Illustrated........$1.00

**Sloane, T. O'Connor.**—The Standard Electrical Dictionary. A Popular Dictionary of Words and Terms used in the practice of Electrical Engineering, 350 illustrations.$3.00

**Sloane, T. O'Connor.**—Electric Toy Making for Amateurs, including Batteries, Magnets, Motors, Miscellaneous Toys........$1.00

**Sloane, T. O'Connor.**—The Arithmetic of Electricity. A Manual of Electrical Calculations by Arithmetical Methods, including numerous rules, examples and tables in the field of practical electrical engineering and experimenting. Third edition, revised........$1.00

**Tesla, Nikola.**—Experiments with Alternate Currents of High Potential and High Frequency. A lecture delivered before the Institution of Electrical Engineers, London. With a portrait and biographical sketch of the Author Illustrated........$1 00

**Tesla, Nikola.**—Lectures on the Electro-Magnet. Illustrated,........$1.00

**Thurston, Prof. R. H.**—Stationary Steam Engines, especially adapted to Electric Lighting Purposes. Treating of the development of Steam Engines, the Principles of Construction and Economy, with description of Moderate and High Speed Engines. With many folding plates.....$1.50

**Thomson, Prof. Elihu.**—What is Electricity? Illustrated.$0.25

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. A Series of Lectures, with an introduction by Franklin L. Pope. 16mo. Numerous illustrations, fancy boards (Van Nostrand's Science Series, No. 66)........$0.50

**Thompson, Sylvanus P.**—Polyphase Electric Currents and Alternate-Current Motors. Mailed to any address in the world on receipt of........$3.50

**Thompson, Sylvanus P.**—Recent Progress in Dynamo-Electric Machines, being a Supplement to Dynamo-Electric Machinery. 16mo. (Van Nostrand's Science Series, No. 75)........$0.50

**Thompson, Sylvanus P.**—Dynamo-Electric Machinery. Fourth edition, revised and rewritten. Numerous illustrations and 29 plates. 1,000 pages........$6 00

**Trevert.**—How to Make Electric Batteries at Home. Illustrated........$0.25

**Urquhart.**—Electro-Plating. A Practical Hand-book on the Deposition of Copper, Silver, Nickel, Gold, Aluminum, Brass, Platinum, etc. Second edition; carefully revised, with additions........$2.00

**Walker, F.**—Practical Dynamo Building, for Amateurs. How to wind for any output. With numerous illustrations. 16mo, boards. (Van Nostrand's Science Series, No. 98).$0.50

**Webb, H. L.**—A practical Guide to the Testing of Insulated Wires and Cables. Illustrated........$1.00

**Webb, Herbert Laws.**—Telephone Hand-book, Illustrated. 12mo, cloth. Chicago, 1895........$1.00
The only complete work on the Telephone. All possible information for any one interested in Telephones and how to make and operate them.

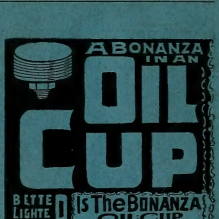
**BOOK ORDERS**
GIVEN PROMPT ATTENTION.
Electrician Publishing Co.,
Suite 510 Marquette Bldg., CHICAGO.

**GRAPHITE SPECIALTIES**
FOR ELECTRICAL USES:
Graphite Rods of Various Lengths, from 1-5 Ohm to 100 Ohms Resistance to the inch. Graphite Boxes and Crucibles, Resisting Heats of 4,000 Degrees. Inquiries Gladly Answered.
**JOS. DIXON CRUCIBLE CO., Jersey City, N.J.**



**VULCANIZED FIBRE CO.** ESTABLISHED 1873.
SOLE MANUFACTURERS OF **HARD VULCANIZED FIBRE**
In Sheets, Tubes, Rods, Sticks, and Special Shapes to order. Colors, Red, Black and Gray. Send for Catalogue and Prices.
FACTORY: WILMINGTON, DEL. **The Standard Electrical Insulating Material of the World.** OFFICE: 14 DEY ST., NEW YORK.

REWIRED WITH RAVEN WHITE CORE WIRE

OFFICE
**The Ferris Wheel Co.**
1131 THE ROOKERY.

CHICAGO, April 30, 1896.
NEW YORK INSULATED WIRE CO.,
320 Dearborn St., Chicago, Ill.

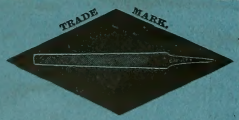
GENTLEMEN:—After carefully considering the merits of the various brands of wire upon the market, we have decided to use your "Raven White Core" exclusively for rewiring the Ferris Wheel.
As you are aware, the wire upon the wheel is very much exposed and the test will no doubt be a most severe one.
Yours very truly
THE FERRIS WHEEL CO.
By L. V. Rice, Mgr.

**GRIMSHAW WHITE CORE.** Used exclusively for all Incandescent Lighting at World's Columbian Exposition.
**RAVEN WHITE CORE.** Used in some of the largest buildings in the United States.
**COMPETITION LINE WIRE.** Used by some of the largest Central Stations and Fire and Police Departments in the U.S.
**GRIMSHAW TAPES, COMPETITION TAPES AND SPLICING COMPOUNDS.**

**New York Insulated Wire Company,**
MAIN OFFICE: 13-17 Cortlandt St., New York. BRANCHES: CHICAGO: 320 Dearborn St. BOSTON: 134 Congress St. SAN FRANCISCO: 102 Sacramento St.

**Black Diamond File Works.**
Est. 1863. Inc. 1895.

We make any kind of File or Rasp known to the File Trade.



Prompt attention to special work. Files made to order to suit any purpose.

**Our regular goods are on sale in every leading Hardware Store in the United States and Canada.**

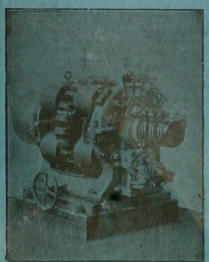
Electric Lighting and Power Apparatus.



No. 10 Arc Dynamo, 100 lights, 2,000 candle power.

Three circuits run from an 80 light 4,000 volt Brush dynamo: the maximum potential between any two points on the circuits, or dynamo, not exceeding 1,500 volts. This will be exhibited at the Brush exhibit at the National Exhibition in New York.

Agencies in all large cities.
